Agent : HOOPERB

Call Details :

Movement of soil to a site in Brighton. There has been a lot of soil brought onto this site. It seems to be used for a dumping ground. They aren't sure of where the soil came from. They company doing work on the site has had an approval from the local council to do work on the site. Client is concerned that the soil may have come from a FA area. The name of the company is Rosenlund Demolision.

Special Instructions

Hi,

Client would like to know if this can be investigated.

Thanks

Beth

Subject: Report from a member of the public regarding dumping of materials and demolition work
Importance: High

Hi all,

We received a call from a sch3(10)(1)(b) Confidential source of information regarding dumping of materials and demolition work.

Confidential source believes the company are using the site to dump materials on and that they are also conducting some demolition work. Confidential source doesn't know where the materials are coming from, he has just noticed that there is a lot of suspicious activity going on on site.

The company is - Rosenlund
The site is - 11 Maclean St, Brighton

The site is outside the RA and I see that Rosenlund are on a Risk Management Plan (866). I see from FAMS that Mark conducted an audit of 11 Maclean St on 10/2/14, speaking to the site foreman in regards to material movement and compliance with Fire Ant movement controls.

sch3(10)(1)(b) Confidential source thanked for his report and told him I would forward his information onto our inspectorate team for any further investigation that they deemed necessary.

Kind Regards,

Alex Fulton
