Fire ant carrier movement restrictions

**Moving soil?** To move soil from a property within biosecurity zone 1 you must have a biosecurity instrument permit unless:

- the soil remains within zone 1 or zone 2.
- the soil is moved to a waste facility within zone 1 or zone 2.

**Moving mulch, manure, baled hay or straw, potted plants or turf?** To move these fire ant carriers from a property within biosecurity zone 1 you must either:

- follow procedures outlined in the Biosecurity Regulation 2016;
- move the material to a waste facility within zone 1 or zone 2.
- move the material within 24 hours of being on the property.
- obtain a biosecurity instrument permit from an inspector.

**Moving other fire ant carriers** (e.g., mining/processing products or by-products, compost): To move these fire ant carriers from a property within biosecurity zone 1 you must either:

- follow procedures outlined in the Biosecurity Regulation 2016;
- move the material to a waste facility within zone 1 or zone 2.
- move the material within 24 hours of being on the property.
- obtain a biosecurity instrument permit from an inspector.

**Moving soil?** To move soil from a property within biosecurity zone 2 you must have a biosecurity instrument permit unless:

- the soil remains within zone 2 or is moved to zone 3;
- the soil is moved to a waste facility within zone 3.

**Moving mulch, manure, baled hay or straw, potted plants or turf?** To move these fire ant carriers from a property within biosecurity zone 2 you must either:

- follow procedures outlined in the Biosecurity Regulation 2016;
- move the material to a waste facility within zone 2;
- move the material within 24 hours of being on the property.
- obtain a biosecurity instrument permit from an inspector.

**Moving other fire ant carriers** (e.g., mining/processing products or by-products, compost): To move these fire ant carriers from a property within biosecurity zone 2 you must either:

- follow procedures outlined in the Biosecurity Regulation 2016;
- move the material to a waste facility within zone 2;
- move the material within 24 hours of being on the property.
- obtain a biosecurity instrument permit from an inspector.

**Moving soil?** To move soil from a property within biosecurity zone 3 you must have a biosecurity instrument permit unless:

- the soil remains within zone 3;
- the soil is moved to a waste facility within zone 3.

**Moving mulch, manure, baled hay or straw, potted plants or turf?** To move these fire ant carriers from a property within biosecurity zone 3 you must either:

- follow procedures outlined in the Biosecurity Regulation 2016;
- move the material to a waste facility within zone 3;
- move the material within 24 hours of being on the property.
- obtain a biosecurity instrument permit from an inspector.

For soil movement within the zones you must meet the General Biosecurity Obligation, see www.qld.gov.au/biosecurity for more information.

*All includes fill, clay, xeriscaping and any material removed from the ground at a site where earthworks are being carried out.*
