File Note

File Reference: TBA

Date: 09/12/2013

File Name: Charters Towers Regional Council (CTRC) Flying– Fox dispersal

Subject (Detail): EHP compliance of CTCRC flying fox dispersal under permit WIFF13807313, Lissner Park, Charters Towers – Matthew Brien (EHP)

I (005 Wildlife Ranger Matthew Brien) arrived at Lissner Park, Charters Towers, along with wildlife rangers Karen Dabinett (005), and Wade Kelly (003), at approx. 17:35 to undertake compliance during the dispersal of Flying foxes (reds and blacks) from Lissner Park by CTCRC who were operating under permit WIFF13807313. Upon arrival, CTCRC had cordoned off the park and prevented public access. Police were on hand, along with dozens of people operating under the guidance of CTCRC within the park. Hundreds of people lined the streets. We (EHP) entered the park and were greeted by Mark Crawley (CEO), Ramon Jayo, Bill Hussey, and a vet with ABLV vaccination appointed by CTCRC (name forgotten). At around 17:45 CTCRC commenced dispersal activities, which included car horns, paint ball guns aimed at trees, and smoke/foggers. At 17:55, two choppers arrived, fireworks (no shells) were let off in open spaces beside trees and fire hoses were aimed at trees. I (Matthew Brien) directed Wade Kelly to observe and monitor fireworks and paintball activities in one section of the park, and Karen to observe and monitor fire hoses in another section. I remained in the middle of the park to monitor entire situation and to liaise with Council (Mark Crawley, Ramon Jayo, and council appointed vet vaccinated against ABLV). At around 18:00 I received a phone call from a lady that told me 1xfemale black flying fox with a baby had landed on the ground outside Lissner Park and was in the hands of wildlife carers (unknown). I asked for the location, and directed the council vet to take any flying foxes into care in order to assess and treat any potential injuries. At 18:05, I observed the council vet talking with people at the edge of the park. He then returned and informed me that they had a flying fox wrapped up in a blanket/towel but refused to hand it over. At 18:05, Karen informed me that fire hoses that were aimed at trees were getting too close to the bats. Karen and myself then instructed council staff to aim lower and not at animals, which they did. At around 18:10, Wade informed me that paint balls that were aimed at trees were getting too close to bats. Wade and myself instructed them to aim lower and not near bats and council staff complied. At around 18:50, all EHP officers (Matt, Karen, Wade) walked through the entire park to check for any injured or dead flying foxes. We counted 5-10 little reds dead but >2 days old on ground/in trees, and no freshly dead or injured bats were found. At 19:00, CTCRC ceased dispersal activities as the majority of bats had left, and the public were allowed access to the park. EHP staff (Matt, Karen, Wade) left Lissner Park at around 19:05. I (Matthew Brien) briefed the Director and Senior ranger by phone of the events that occurred before departing Charters Towers.

At no time did myself or my team witness or observe a flying fox get injured or die as a result of dispersal activities. At no time was I provided with evidence that a flying fox had been injured or killed by dispersal activities. Charters Towers City Council was compliant with the conditions of their permit (WIFF13807313) throughout the dispersal.
