

Fisheries Act 1994

General fisheries permit

23 March 2022

s.78B(2)

JAMES COOK UNIVERSITY
39 CARMODY STREET
TOWNSVILLE QLD 4812

Issued by: Fisheries Licensing

Permit Number	Issue Date	Expiry Date
258063	23 March 2022	23 March 2025

General Activities

1. The holder is authorised to take, be in possession of and release the following regulated fish from Queensland waters in the Lizard Island and MacGillivraies Reef region, the Greater Lizard Island region and the Orpheus Island region, for research purposes only. Permitted number to take is per year and includes both undersized and oversized fish where regulated by size.

Common Name	Species Name	Permitted Number to Take
a regulated cod, rockcod or grouper other than camouflage grouper, flowery rockcod, greasy rockcod or Maori rockcod	List in Fisheries (General) Regulation 2019: Schedule 5, Part 1 - Particular cod and grouper	90
a species of regulated surgeonfish	List in Fisheries (General) Regulation 2019: Schedule 5, Part 6 - Particular surgeonfish	30
coral	Class Anthozoa or Hydrozoa	320
a regulated coral trout or a combination of regulated coral trout	List in Fisheries (General) Regulation 2019: Schedule 5, 2019: Schedule 7, Part 2 - Particular coral trout.	20
Any fish species not already mentioned in this table or within Schedule 2 of the Fisheries Declaration		2300

Call Centre: 13 25 23

Algae	Divisions Chlorophyta, 300 Rhodophyta and Phaeophyta	Extracted for chemicals or used as habitat in experiments
-------	--	---

2. The holder is authorised to use the following apparatus:

- No more than 14 light traps
- No more than 1 plankton nets: Up to 3m x 16m
- No more than 1 seine net: Up to 10m in length, up to 3m drop, mesh size between 0.5mm and 40mm.
- No more than 10 underwater breathing apparatus
- Clove Oil
- Prescribed apparatus as detailed in Chapter 4, Part 4 (Division 1 and 2) of the Fisheries Declaration 2019. All prescribed apparatus detailed in this section can be used in both non-tidal and tidal waters.

CONDITIONS

- The permit extends to the holder, employees of the holder and any person authorised by the holder. A person authorised by the holder must have a copy of the permit and written authorisation signed by the authority holder which states the name of the person undertaking the authorised activities, the authorised activities to be undertaken and the period of the authorisation.
- Marine plants are protected in Queensland under provisions of the Fisheries Act 1994. The removal, destruction or damage of marine plants requires authorisation under DAF's accepted development requirements or through a development application under the Planning Act 2016.
- The accepted development requirements for operational work that is the removal, destruction or damage of marine plants allow for limited marine plant collection for research
https://www.daf.qld.gov.au/_data/assets/pdf_file/0005/1258394/daf-adr-marine-plants.pdf (refer to work type 1.16 at the bottom of page 9). Please note this limits collection to a 20 litre bucket full of marine plants per day. All other requirements of the code need to be met including notification as per section 3 of the document.

Apparatus

- The holder must ensure that all apparatus used during authorised activities is marked clearly with the holder's name, address and Department of Agriculture and Fisheries permit number.
- The holder must ensure that nets are only set across the partial width of a creek or river, navigation channels or any other area where the placement of nets may be hazardous to boat traffic.
- The holder must be in attendance of apparatus at all times. In attendance means within 100 metres when nets have been set. Light traps are the only exceptions and can be left unattended for an 18 hour period.

Fish

- The holder must ensure that all fish released back into the wild are done so at the same site of collection for that fish.

2. The holder must ensure that all fish specimens taken are for research purposes only.
3. The holder must ensure that all fish taken unintentionally during authorised activities are returned to the water as soon as practical, with as little harm or injury as possible.
4. The holder must ensure that all species (including threatened, endangered, or protected species) taken unintentionally during authorised activities are returned to the water as soon as practical, with as little harm or injury as possible.

Reporting

1. A sign, minimum dimensions of 30cm x 50cm, with the message "Scientific Research in progress under DAF authority number 258063" is to be displayed within 15 metres of authorised activity.
2. The holder must notify the local office of the Queensland Boating and Fisheries Patrol not less than 48 hours prior to any activities commencing under this permit.
3. The holder must notify Fisheries Queensland of any interaction with a non-target threatened, endangered, and protected species within seven days after the interaction by email to fisheriesmanagers@daf.qld.gov.au.
4. The holder must submit a written report for each calendar year the permit is valid. The report must outline the number and species of fisheries resources taken (including released, taken and incidental mortalities), apparatus used, locations fished and days fished and under which authorised activity the fish were taken. Report must be submitted to the Chief Executive, Fisheries Queensland, fisheriesmanagers@daf.qld.gov.au by the end of February in the next year.

Compliance

1. The holder must ensure that the authorised activities described in this authority only occur whilst the authority is valid.
2. The holder or any person acting under the authority of the holder must carry this permit (or a copy) during authorised activities and produce it at any time on request for inspection by an officer authorised under the Fisheries Act 1994.
3. This authority only relates to the Fisheries Act 1994 and associated fisheries regulations and enables the holder to carry out the authorised activities listed above only. All rules and regulations outlined in other State and Federal legislation such as the Biosecurity Act 2014 and the Nature Conservation Act 1992, must be adhered to at all times.

AUTHORISED ACTIVITIES

General Activities

1. The holder is authorised to take and be in possession of up to 96 pieces of Acropora species coral, up to a maximum of 12cm each piece. Coral must be collected from Sable Chief Rocks, Facing Island Reef and Seal Rocks Reef and used to rehabilitate Manning Reef and Seal Rocks only.

Authorised Apparatus

2. The holder is authorised to use the following apparatus:
 - a. No more than 10 underwater assisted breathing devices
 - b. No more than 12 hammer and chisel
 - c. No more than 80L of marine cement/epoxy
 - d. No more than 40 temporary aquaria
 - e. No more than 10 snorkel kits
 - f. No more than 10 SCUBA kits
 - g. No more than 2 handheld air-powered tools

CONDITIONS

1. The permit extends to the holder, employees of the holder and any person authorised by the holder. A person authorised by the holder must have a copy of the permit and written authorisation signed by the authority holder which states the name of the person undertaking the authorised activities, the authorised activities to be undertaken and the period of the authorisation.

Part 4 (Division 1 and 2) of the Fisheries Declaration 2019. All prescribed apparatus detailed in this section can be used in both non-tidal and tidal waters.

CONDITIONS

Apparatus

1. The holder must ensure that all apparatus used during authorised activities is marked clearly with the holders name, address and Department of Agriculture and Fisheries permit number.

Fish

2. The holder must ensure that all fisheries resources are for research purposes only.
3. The holder must ensure that all fish taken unintentionally during the authorised activities are dealt with as required by section 163 of the Fisheries Declaration 2019 (immediately released in water deep enough to escape / not left in apparatus out of the water).
4. The holder must ensure that all fish taken and used for research purposes, and which are released back into the wild are done so at the same site of collection for that fish and as soon as practical with as little harm or injury as possible.
5. The holder must ensure that all fish taken and that are not released back into the wild, are disposed of into a bin or other container that the person reasonably believes will be collected and disposed of at a waste facility or waste disposal site, as defined in the Waste Reduction and Recycling Act 2011 (e.g. local council bin collection) as soon as practicable after the fish is no longer required for the intended research purpose.
6. The holder must ensure that there is a clear written procedure detailing how the fish taken are to be dealt with, including how they are to be handled to minimise harm when intended on being released back into the wild, or how they are to be disposed of. The holder must provide a copy, or unrestricted access to a copy of the procedure to all persons that may undertake authorised activities.
7. The holder must ensure that all species (including threatened, endangered or protected species) taken unintentionally during authorised activities are returned to the water as soon as practical, with as little harm or injury as possible.
8. The holder must consider the risk of localised depletion of fish species when sampling repeat sites within and between years.
9. The holder or a person undertaking authorised activities must ensure that all fish classified as restricted matter under the Biosecurity Act 2014 caught during the authorised activities are to be destroyed and disposed of appropriately by burial or placing in a rubbish bin dealt with as required by Chapter 2, Part 3, Division 2 of the Biosecurity Act 2014 (killed and disposed of).

Coral

Common Name	Species Name	Permitted Number To Take
Family Acroporidae and Pocilloporidae	Acropora spp. Alveopora spp. Anacropora spp. Astreopora spp. Isopora spp. Montipora spp, Pocillopora spp.	170

Authorised Apparatus

4. The holder is authorised to use the following apparatus:
- No more than 30L clove oil
 - No more than 10 hammer and chisel
 - No more than 10 hand spears
 - No more than 10 handheld shovels
 - No more than 10 hand-operated corers: height up to 300mm, diameter up to 180mm
 - No more than 10 hand-operated grab samplers: dimensions up to 210mm x 180mm x 180mm
 - No more than 10 light traps
 - No more than 10 underwater breathing apparatus
 - Apparatus prescribed for a recreational fisher under Chapter 4, Part 4 (Division 1 and 2) of the Fisheries Declaration 2019. All prescribed apparatus detailed in this section can be used in both non-tidal and tidal waters.

CONDITIONS

Apparatus

- The holder must ensure that all apparatus used during authorised activities is marked clearly with the holder's name, address and

Call Centre: 13 25 23

Facsimile: (07) 3229 8182

Website: www.daf.qld.gov.au

It is your responsibility to advise of any change of address

Department of Agriculture and Fisheries permit number.

2. The holder must be in attendance of apparatus at all times. In attendance means within 100 metres when nets have been set. Fyke nets, recreational fish traps and recreational crab pots are the only exceptions and can be left unattended for an 18-hour period.

Fish

3. The holder must ensure that all fish specimens taken are for research purposes only.
4. The holder must ensure that all fish taken unintentionally during the authorised activities are dealt with as required by section 163 of the Fisheries Declaration 2019 (immediately released in water deep enough to escape / not left in apparatus out of the water).
5. The holder must ensure that all fish taken and used for research purposes, and which are released back into the wild are done so at the same site of collection for that fish and as soon as practical with as little harm or injury as possible.
6. The holder must ensure that all fish taken and that are not released back into the wild, are disposed of into a bin or other container that the person reasonably believes will be collected and disposed of at a waste facility or waste disposal site, as defined in the Waste Reduction and Recycling Act 2011 (e.g. local council bin collection) as soon as practicable after the fish is no longer required for the intended research purpose.
7. The holder must ensure that there is a clear written procedure detailing how the fish taken are to be dealt with, including how they are to be handled to minimise harm when intended on being released back into the wild, or how they are to be disposed of. The holder must provide a copy, or unrestricted access to a copy of the procedure to all persons that may undertake authorised activities.
8. The holder must ensure that all species (including threatened, endangered or protected species) taken unintentionally during authorised activities are returned to the water as soon as practical, with as little harm or injury as possible.
9. The holder must consider the risk of localised depletion of fish species when sampling repeat sites within and between years.
10. The holder or a person undertaking authorised activities must ensure that all fish classified as restricted matter under the Biosecurity Act 2014 caught during the authorised activities are to be destroyed and disposed of appropriately by burial or placing in a rubbish bin dealt with as required by Chapter 2, Part 3, Division 2 of the Biosecurity Act 2014 (killed and disposed of).

Reporting

11. The holder must ensure that a sign, minimum dimensions of 30cm x 50cm, with the message "Scientific Research in progress under DAF authority

Call Centre: 13 25 23

Facsimile: (07) 3229 8182

Website: www.daf.qld.gov.au

It is your responsibility to advise of any change of address

number 260383" is to be displayed within 15 metres of authorised activity.

12. The holder must notify the local office of the Queensland Boating and Fisheries Patrol not less than 48 hours prior to any activities commencing under this permit.
13. The holder must notify Fisheries Queensland of any interaction with a non-target threatened, endangered, and protected species within seven days of the interaction by email to fisheriesmanagers@daf.qld.gov.au.
14. The holder must submit a written report for each calendar year the permit is valid. The report must outline the number and species of fisheries resources taken (including released, taken and incidental mortalities), apparatus used, locations fished and days fished and under which authorised activity the fish were taken. Report must be submitted to the Chief Executive, Fisheries Queensland, fisheriesmanagers@daf.qld.gov.au by the end of February in the next year.

Compliance

15. The holder must ensure that the authorised activities described in this authority only occur whilst the authority is valid.
16. The holder must carry this permit (or a copy) during authorised activities and produce it at any time on request for inspection by an officer authorised under the Fisheries Act 1994.
17. This authority only relates to the Fisheries Act 1994 and associated fisheries regulations and enables the holder to carry out the authorised activities listed above only. All rules and regulations outlined in other State and Federal legislation such as the Biosecurity Act 2014 and the Nature Conservation Act 1992, must be adhered to at all times.

General fisheries permit

26 October 2022

s.78B(2)

Military Road, Southern Cross University
Centre for Coastal Biogeochemistry
LISMORE NSW 2480

Issued by: Fisheries Licensing

Permit Number	Issue Date	Expiry Date
260475	26 October 2022	26 October 2025

AUTHORISED ACTIVITIES

Authorised Persons

1. The permit extends to the holder, employees of the holder and any person authorised by the holder. A person authorised by the holder must have a copy of the permit and written authorisation signed by the authority holder which states the name of the person undertaking the authorised activities, the authorised activities to be undertaken and the period of the authorisation. Any reference to "the holder" refers to all people authorised under the permit.

Authorised Fish

2. The holder is authorised to take, tag, genetic sample, and release fisheries resources from Queensland tidal waters for research purposes only.
3. The holder is authorised to take and be in possession of the following regulated species taken from Queensland waters, namely waters around Heron Island, One Tree Island and Lizard Island for research purposes only. Permitted number to take is per year and includes species regulated by form, gender, number, maximum size, minimum size, volume, maximum weight, and minimum weight.

Coral
