Biosecurity Act 2014 Area Freedom Certificate

I certify that to the best of my knowledge the area described below of the state of Queensland is free of the pest *Bactericera cockerelli* (tomato/potato psyllid). This statement is made on the basis of surveillance, phytosanitary measures to prevent entry of this pest into Queensland and that there is no record of this pest being found in Queensland.

Description of Area:

- All of the State of Queensland
- That part of the state of Queensland Comprising of the following:

Signature:

Name: Mike Ashton

Official designation: General Manager, Plant Biosecurity and Product Integrity and
Chief Plant Health Manager for Queensland.

Date: 16 February 2017
