Questionnaire:	Specify visitor type Accommodation guest
Did they receive an information pack with their permits	Yes
Did they read the Dingo Brochure	Yes
Did the people follow 'dingo safe' messaging? (Ranger to assess)	Yes
Comments:	the protection of an individual followed dingo safe messaging by not jogging alone and when approached by the dingoes they stood back to back while attempting to deter the dingoes.

Detailed report of events:

Ranger 7026936 was initially informed of interaction at 0700 by Yidney Rocks apartment managers.

was interviewed together at 0730 by ranger 7026936, the following is an account of the dingo interaction.

At 0645 on the 26/10/2014, two ladies were jogging north along the beach 50m south of the Oaks. The ladies noticed that two dingoes were running along the beach parallel with them 30m towards the dunes. They stopped jogging when they saw the dingoes, which then began approaching. As the dingoes approached within 5m, the two ladies stood back to back and tried to make themselves look tall whilst attempting to keep calm.

The two dingoes began circling the ladies whilst they stood back to back. The dingo with a red tag in its left ear began to growl whilst circling. The two ladies started to yell for help. This continued for approximately two minutes until the red tagged dingo began lunging at from behind whilst they were distracted by the untagged dingo in front of them. The two dingoes continued to circle, while the red tagged dingo lunged at both once on her left thigh and twice on her right knee/thigh (see photo's below). The red tagged dingo also bit on her left calf however did not break the skin (see photo's below) Whilst this was occurring the ladies were screaming out for help. kicked the red tagged dingo in the head on two occasions which made the dingo momentarily back away, before continuing to growl, circle and attempt to bite the two ladies.

The interaction occurred for approximately five minutes until a witness staying in accommodation at the Oaks noticed what was occurring. drove his white dual cab straight towards the dingoes as they were circling. was within 20m the two dingoes ran off. then entered the dual cab and asked to drive them back to their accommodation at Yidney Rocks.

and were interviewed, however could not offer any further information to what was provided by. Both were able to confirm that one of the dingoes involved had a red tag in its left ear and that the other dingo was an untagged female.

she began receiving medical treatment by local ambulance officer at 0730 who shortly after transported her to receive further medical treatment at the Hervey Bay hospital.

Additional comments and notes:

Over the last two months there have been three threatening dingo interactions between Poyungan rocks and Eli creek involving BWR13m and an untagged female together. There are three trail cameras that are currently in use within the area between Eli Creek and Poyungan Rocks. These cameras have only recorded two dingoes since September 2014, BWR13m and an untagged female. Both dingoes have regularly been recorded at each of these sites together.

has been shown some photographs of a dingo suspected to be involved in this interaction (BWR13M) and has confirmed that the dingo that attacked them had an identical tag to the dingo in the photos. It was unable to confirm identity of second untagged female dingo.

Interrogation of the ear tag register was carried out. Dingoes were eliminated from this search that did not have:

- red in their tag,
- a tag with red base colour including button colour
- button location on inside of ear (dingoes tagged south of Indian Head are tagged this way)

This search resulted in three dingoes matching this criteria:

- RYR08m, Tagged at Eurong. Last recorded observation was February 2010 at Eurong
- YRY08m, Tagged at Dundubara. Last recorded observation was Eli Creek July 2011.
- BWR13m, Tagged in One Tree Rocks camp zone. Multiple current observations between Poyungan Rocks and Eli Creek, between 3 September 2014 and 27 October 2014.

A detailed management history of BWR13m has been compiled and attached to this report.

Action taken: QPWS management notified, interview of and witness conducted. Additional dingo safe briefings targeted in area and area's adjacent to interaction. Campground closures implemented between Poyungan rocks and Eli creek. Happy Valley and Yidney Rocks accommodation managers notified.

Proposed further action: Continue to educate visitors in area with regard to dingo safety

Did they receive an information pack with their permits **No**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **was walking with her children as they swam down the creek.**

Detailed report of events: At approx. 0930 as walking down Eli Ck with her children 11 yrs and 10 yrs. They had entered the creek at the top entry point, the children were floating. As the children progressed down the creek floated close to the southern bank. At this point a dingo jumped from the southern bank into the creek and grabbed her by the hair ran to and screamed at the dingo which released. Two teenaged boys 14 yrs and 15 yrs were up the creek a short distance away on seeing the incident they ran in and chased the dingo across the creek to the north.

Additional comments and notes: displayed slight signs of injury the dingo had grabbed him by the hair and her children were unable to identify the animal involved. Described the dingo as being tagged in the left ear with a white, red and blue tag. BWR13M was involved in a code D at 0735hrs in the same area.

Action taken: Interview conducted, visitors in area briefed, SR Fraser Island informed, report generated

Proposed further action: Continue patrolling and briefing regime with emphasis on families with children
