Dear John,

I am one of the new group of data validators correcting and updating the Contaminated Sites Register. The following three sites have been notified as having prescribed purpose activities on them and thus they should be on the Register. However, we are unable to list the sites as Probable on the register, without confirmation from Council as to prescribed purpose activities.

The three sites involve multiple parcels of land on sites in Gympie town. I have included all the details from our database and maps for each site, all I need from you is a return of this fax with the appropriate information confirmed by Council.

Thankyou for assisting us to clear up these sites by confirming them on the Register, or allowing us to delete them from "Possible" category which they are currently classified as.

Yours sincerely,
