Subject: RE: Curra State Forest 700

Andrew,

Following your request for input to the proposed shooting range at SF 700 Curra I offer the following comments for consideration.

- GYMG70007 is a current harvesting area under sale for sawlogs, poles, girders and veneer. Sawlog harvesting is currently active however intentions are to temporarily relocate operations to other areas in the near future. Best estimates at this point in time suggest harvesting may not be completed for approximately 2 years dependant on weather and log supply requirements. This sale area is being strategically harvested to balance short haul sawlog supply to the current Permittee. Poles, girders and veneer harvesting may be integrated or subsequent to sawlog harvesting.
- This forest is considered productive dry sclerophyll and has future re-harvest potential in about 20+ years following current harvest completion. The current forest harvesting operation is being undertaken in accord with the Code of Practice and as such not all commercial timber is being removed and salvage of further resource would be required.
- This is a natural forest of uneven age, size and species distribution.
- From a timber perspective GYMG70007 is considered one of the most productive areas within the entire SF.
- There are 7 apiary sites located within GYMG70007 all of which fall within or are very close to the proposed shooting range and buffer footprint.
- Shrapnel in trees is a serious safety concern when sawing logs or processing timber.
- Forest Products does not have any SGP holders and there are no permitted foliage harvesting activities on SF 700 Curra at this point in time.
- There are no known quarry resources of significance in GYMG70007
- There are a number of roads and tracks that traverse through the proposed footprint that provide important access for management and fire control
- It is understood the future highway bypass corridor may impact on the southern end of GYMG70007

I understand that GYMG70003 or GYMG70004 was the previous proposed site for this shooting range. Forest Products considers GYMG70003 or GYMG70004 much better alternatives with significantly less impacts on other forest users and values for the following reasons;

- Both have natural amphitheatres where the range could be aligned into the landscape to improve safety within a smaller footprint
- Harvesting has been completed
- Remaining forest is much less productive than GYMG70007 resulting in significantly less impact on future timber production values
- Both have steeper terrain than GYMG70007 resulting in fewer alternative access points thereby improving safety
- There are no apiary sites in GYMG70003 and only 3 in GYMG70004 (2 of which are on the eastern boundary)
- Both areas are further away from state rail and highway road corridors
- There are no known quarry resources of significance.
- Less access tracks and roads of significance to fire and management activities
- Fewer neighbours and neighbouring blocks are generally larger in size.

Is the area proposed to be excised or a lease issued? Any permit, lease, licence etc should be conditioned such that the shooting range must co-operate with other legitimate forest users to ensure safety and that shooting may be restricted to weekends when forest harvesting activities are being undertaken.

I don't believe there are any provisions for compensation for loss of timber production on SF, however I note the State's current commitment to provide resources to support an ongoing native forest timber industry.

A further point for consideration is that there are a number of existing active shooting ranges already established in the Gympie area; Sexton (Lot 109/LX315), Imbil (Lot 135/FTY1911), Sandy Creek (Lot 19/RP226325) and Banks

RTI RELEASE - DAFF

Pocket (Lots 17 & 18/RP221336) and it would be prudent that co-location with these sites be completely explored prior to establishment of a separate new site.

If you require any clarification or have any further queries please do not hesitate to contact me.

Regards.

John,

Thanks for getting back to me. I must also apologise that my request may duplicate recent emails from Kathy Kingsford. I'm just talking with Kathy now and have just read the emails. The information below may be useful in gaining further understanding. Please note that this is a VERY rough indication based on information provided to our Minister by Gympie Regional Council.

See below a very rough indicative map of the location of the proposed shooting range within Curra 700 and specifically MUID GYMG70007. The large footprint is the safety template of around 250 ha and the smaller is the 5 ha proposed range for clearing. Appreciate any information that you may be able to supply. s73 - Irrelev

s73 - Irrelevant Information

Andrew,

Your below email request to Bill Gordon today refers.

I am seeking some information from FP operational staff and will provide you with comment and response to your questions either this Friday or on Monday if that is OK in terms of timeframe.

RTI DE

If you had a rough sketch of the proposed area that you could forward it would make life easier but if not we will provide comment on the MUID as a whole.

Subject: Curra State Forest 700

Hello Bill,

Sport and Recreation is once again looking into the feasibility of a shooting range on the existing Curra SF (700/FTY1491) on the advice that our Minister want to 'make it happen'.

In recent discussions with Geoff Brittingham and Ash Williams they suggested we contact DAFF as Curra SF may be scheduled for harvesting in the near future.

Initial research would indicate that the GYMG70007 area would contain any future range. My research has discovered that this area is not a DFA for harvesting in the next 3 years.

I have a couple of questions that I'd appreciate any assistance you could provide in answering to enhance my understanding of the situation and assist in future briefing:

1. Do you had any indication of forwarding scheduling for harvesting in this area?
2. Would "dry sclerophyll" be an accurate description of this forest?
3. Approximate age and species of the targeted timber?
4. Should this range proceed an indicative safety footprint of 250 ha has been provided, with a 5 ha cleared area for the actual range(s). Would DAFF bring forward any schedule to clear the 5 ha area? Within the remaining safety template area would harvesting occur prior to any revocation, after revocation (as per schedule)? If after, would the possibility of lead within timber be an issue (saw blades, etc). Would this be selective harvesting or clearing (the forest provides a physical barrier as well as noise mitigation)?
5. Are there any existing apiary, foliage harvesting or other permits within GYMG70007?
6. If harvesting within the indicative 250 ha is not possible, is it likely that there would be any compensation payable for "loss of product"?

Sorry for all the questions. Your advice is appreciated.

Thanks

Andy

WHEELER Kathy

From: LUDLOW John
Sent: Tuesday, 3 December 2013 4:23 PM
To: SPENCER Scott
Cc: UNDERHILL Barry
Subject: RE: Corella Range Complex - Request for Briefing
Attachments: RE: Curra State Forest 700; SF 700 shooting range proposal.pdf

Scott,

I met with David Gibson this morning including a visit to the forest. We were accompanied by Mr Ron Owen (Curra Shooters Association, ex councilor and vocal local business man – owns a gun shop) plus regional reps from NPRSR - Mick Cubis from QPWS and Kathy Rogers from Sport and Rec.

Mr Owen is the representative of the Curra Shooters Association and the key advocate for this proposal. He was fairly vocal about wanting the current site in GYMG70007 as they have invested significant resources in identifying the site and overlaying safety templates for their various firearm classes. I learnt today that this proposal is not for a single range but rather a number of ranges all co-located within the larger footprint which makes me even more concerned about its compatibility with timber harvesting and other forest uses. Mr Owen's long term plans are for a national standard shooting complex and for all local Gympie gun clubs to relocate to this site, but not sure this is fully supported by all clubs. There was a study into the area about a decade ago which should provide some additional information about their proposed location and alternative options. Mr Owen has promised to supply a copy of that study.

I put forward Forest Products position and supporting arguments (refer attached email) as to why there are better locations (GYMG70003 and/or GYMG70004) within the SF than the current proposed site in GYMG70007. NPRSR support our position. Mr Gibson was not aware of the variety and intensity of other users in this part of the forest but now has a much greater appreciation of the issues with this proposed location. GYMG70007 has the highest use of any area within this State Forest as it is closest to Gympie, easily accessible, terrain is undulating and there are lots of existing access tracks. I have since been made aware of some correspondence from Cooloola Trail Care Alliance to the then Minister for Environment in September 2011 raising concerns about dislocation of other legitimate users and need for consultation with other forest users on this matter.

Mr Owen claimed that they were told in the early 2000's that GYMG70007 was Forestry's preferred site but despite repeated requests by Mr Gibson has not been able to produce any correspondence to confirm that. The climate has changed significantly since then as that would have been in the early days of the SEQFA when we were implementing a single harvest and transition to protected area estate.

Mr Owen is looking for the same benefits as all other forest users, being cheap land close to town with good access. The difference with a shooting range is they cannot safely co-locate with other users so they are effectively an exclusive use. Mr Owen did concede that any area of the SF was better than none so I believe he would take the alternative site in order to secure a deal. Mr Gibson was pushing that point as well. I also suggested that the alternative sites would actually be better in the long term from an access point of view once the proposed highway realignment was completed and they were less likely to be crowded out by future urban development.

NPRSR are leading this action and they have been instructed to deal with Gympie Regional Council as the proposed recipients of a lease/permit over the relevant area of the forest.

If you need any clarification or more info please let me know.

Cheers!

Lachlan,

I have confirmed that the best person to brief the Member for Gympie on the rifle range matter is John Ludlow our SE Forestry Manager. He is actually based in Gympie and could do the briefing locally -- he has appropriate maps etc but if Mr Gibson wanted, he could also show him the site. According to John, the site we have identified may actually be better -- less commercial forestry disruption, a natural amphitheartre, no apiary sites, fewer access points so safety is improved etc etc.

I know its normal protocol for the Minister to have a rep at these sorts of briefing and if you want that, I will arrange for John to come down. But if the Minister and the Member are ok it would be best to do it locally. Let me know the outcome and we will make the apparoprate arrangements either way. If its in Gympie, I will ensure John provides feedback for your information

Thanks Lachlan

I will have to check who has been saying what -- is it us, or National Plarks or it HP Plantations? Rifle range interaction with forestry operations is a long standing issue. Not 100% sure about this one -- we have apparently suggested in one instance an alternative site as it has less impact on quality native forest -- not plantation.

So the answer is obviously yes we can arrange a face to face brief, but we will have to get back to you tomorrow about what we know on this one and who is the best person to talk to the Member about it.

Hi Elisabeth & Lachlan

I refer to my telephone conversation with Lachlan earlier today.

Mr Gibson is seeking a Departmental briefing from forestry staff regarding the proposed Corella Range Complex near Gympie. It is understood that DAFF have advised that they do not prefer the original range site and Mr Gibson is seeking a briefing on this.

Mr Gibson would like the briefing to be provided during the next sitting week of Parliament.

A representative from Minister Dickson's office will also be attending the briefing.

I look forward to hearing back from you at your earliest regarding this matter.

Hon Vicky Darling MP
Minister for Environment
Level 13, 400 George Street
GPO Box 2454, Brisbane QLD 4001

26 September 2011

RE Proposed excision of a portion of State Forest 700FTY1491 (Gympie) for a combined Shooting Sports Precinct.

Dear Minister

I am writing on behalf of the Cooloola Trail Care Alliance (CTCA).
We are a non-profit community group that advocates for trail based passive recreation (cycling, bushwalking and horse riding) and the maintenance of sustainable trails in natural bushland areas for public enjoyment, health and wellbeing.

It has come to the attention of our members through the local media that a substantial area of SF 700FTY1491 that provides a significant trail asset for nature-based passive recreation is being considered by the Government as a potential site for relocating and consolidating an amalgamation of shooting sport activities.

I have attached for your reference two maps of the SF 700FTY1491.
The first map shows the full extent of the State Forest and illustrates the distribution of actively used trails that we have mapped within it.
The second map shows the high concentration of active trails that we have mapped occurring to the south of Wood Road.
Being only 10km from the centre of Gympie Township this southern area of the forest is, in our experience, the most actively used due to it being within easy riding distance from town and having reliable mobile phone coverage (for safety).
In our view the myriad of maintained trails within this remnant eucalypt forest provides a significant natural recreational asset worth preserving for the benefit of active healthy communities and future generations.

Our purpose in writing is to respectively request three things of you:

1. If the proposal to provide a large shooting precinct within SF 700FTY1491 is to be considered by Government, that all of the affected community and stakeholders be actively consulted and engaged in the planning and decision making process; and
2. If the community is to have an area of natural recreational asset alienated for the exclusive use of a specific interest group, that the community be appropriately compensated for the loss of recreation area and environmental values that would result; and
3. That any broadscale clearing of remnant vegetation and destruction of wildlife habitat that would be required to establish firing ranges and the like within such a shooting precinct is appropriately offset in accordance with the policies of your Government concerning environmental offsets associated with development.

Thank you again for your time and attention and we look forward to hearing from you on this issue.
Yours Sincerely

Sch4p4(6) Personal
President

RTI DLM RELEASE - DAFF

Queensland Government

Ref CTS 17532/11

31 OCT 2011

Office of the Minister for Environment

Sch4p4(6) Personal Information
President
Cooloola Trail Care Alliance
Sch4p4(6) Personal Information

Dear Sch4p4(6) Personal

Thank you for your letter of 26 September 2011 concerning the proposed excision of a portion of State Forest 700 FTY1491 for a combined Shooting Sports Precinct. The Minister for Environment has asked me to respond on her behalf.

The Minister was approached by the Member for Gympie, Mr David Gibson MP, with a proposal to use Curra State Forest for the purpose of a national standard shooting complex.

The Minister subsequently met with Gympie Regional Council's Mayor Ron Dyne and Chief Executive Officer Mr Bernard Smith and Sunshine Coast Regional Council's Mayor Bob Abbot on 6 October 2011, to discuss the proposal to locate a combined sport shooting precinct in more detail.

Under the South East Queensland Forests Agreement, the Curra State Forest is scheduled to be dedicated as protected area under the *Nature Conservation Act 1992*. The proposal to use Curra State Forest for the purpose of a national standard shooting complex raises a number of issues.

A facility of this type is unlikely to be consistent with the management principles of a state forest. Any proposal to use the state forest would therefore require a revocation of the required land area and the provision of appropriate offsets and associated transfer of tenure.

This process requires the identification of a suitable area; the lodgement of the planned revocation with the Governor-in-Council; and ultimately, the tabling of the revocation on the floor of Parliament. Suitable conservation land offsets must be provided for this to occur, and associated native title issues would need to be addressed. Collectively, these issues are not straightforward.

Accordingly, before any land is earmarked for a national standard shooting complex, it would appear essential that a thorough audit and demand analysis of existing club arrangements and needs is undertaken. It is my expectation that a detailed land use analysis would form part of this audit process, thereby informing government at all levels of the most appropriate site, or sites and tenure. It is expected that the community and interested stakeholders would be consulted in regard to any proposed change of use of the state forest, as part of this process.

RTI DL RELEASE - DAFF

In the meantime, the Minister has requested that officers from the Department of Environment and Resource Management immediately undertake further investigations of unallocated state land in the area with a view to exhausting all other possible options to locate a shooting complex in the first instance.

The Minister thanks you for bringing this matter to her attention and hopes this information clarifies the situation. Should you wish to discuss the matter further, please contact Mr Geoff Brittingham, Regional Manager of the department on telephone 5459 6110.

Yours sincerely

Kathy / Mick,

Thanks for attending today and for the support. I agree with Mick in that I think it will be a long hard road ahead yet, a point confirmed by the attached correspondence (you may have already seen) that was presented to me by an interested party after my return from today's meeting. They also handed me a map which shows the detailed network of trails used in GYMG70007. I suspect Mr Owen won't go to an alternative site without a fight either. I have also since heard from several sources that there isn't much support from the other clubs around Gympie to relocate to Curra, which is at odds with today's claims.

Copy of a map I did up following today's meeting is also attached – hope it's not too big to come through.

Cheers!

John Ludlow
