Comments

Detailed report of events: At 0800 on the 3/01/14, sch4p3 was fishing on the water's edge in front of Winnam CZ. He turned around and noticed a dingo running towards him. He backed into the water to his knee depth, as he was not comfortable with how close the dingo was to him (2m). The dingo remained at that distance long enough for sch4p3 to take a photo of it. sch4p3 then yelled at and chased the dingo away.

Additional comments and notes: sch4p3 showed a dingo ranger the photo of the dingo involved in the interaction. This photo clearly showed a delaminated orange tag in the left ear, with the colours Green Blue and White that remain around the edge of the tag.

Action taken: Briefed camper, generated and circulated report.

Proposed further action: Continue to brief campers and guests to the Oaks residents in relation to dingo safety.

Faxed/emailed date: 7/01/14

Comments

Detailed report of events: sch4p3(3) walked from his accommodation at the Oaks to the water to get some salt water in a bucket. After he had filled the bucket he noticed that Two dingoes were approaching him. When they were 1m from him, sch4p3(3) father drove their car down to prevent the dingoes from approaching closer. sch4p3(3) hopped in the car and the dingoes moved on.

Additional comments and notes: sch4p3(3) P father commented that when they were both in the car, the dingoes were sniffing around the area that sch4p3(3) had been standing with the bucket. This is an indication that the dingoes were soliciting food from sch4p3(3) P

Action taken: Briefed sch4p3(3) and his family. Generated and circulated report.

Proposed further action: Continue to brief new guests to accommodation at the oaks in relation to dingo safety.

Faxed/mailed date: 7/01/14

Comments

Detailed report of events: While on patrol QPWS ranger observed GBW11m and 2 untagged juvenile male dingoes loitering around a group of fishermen getting their fishing gear out of their vehicle at Eli CZ. The fishermen actively discouraged the dingoes by yelling at them, clapping their hands and kicking sand towards them. The dingoes were only deterred for a short while before returning.

As the fishermen left the vehicle and headed towards the ocean the three dingoes moved towards the car where they were again discouraged by a female visitor sitting in the vehicle. GBW11m then headed north along the beach while the two untagged juveniles followed the fishermen to the water's edge. The juveniles were again discouraged by the fishermen and it took several attempts for the dingoes to move away.

GBW11m and the two juveniles then headed into two campsites within the Eli CZ, where they were chased off by campers, before heading north along the beach towards Eliz Creek.

Additional comments and notes: GBW11m and the 2 juveniles showed highly habituated behaviour, showing no wariness of people or vehicles and proving difficult to move along when discouraged.

Action taken: Fishermen spoken to and dingo briefing given. Report generated and circulated.

Proposed further action: Increase patrols between Poyungan and Eli Creek while visitation and dingo activity are high.

Comments **QPWS rangers have given dingo safe briefings to these residents.**

Detailed report of events: QPWS ranger on patrol observed two female visitors actively discouraging an untagged female juvenile dingo in front of the residences at the Oaks. The ranger stopped to speak with the visitors and was told that the dingo had been hanging around for a while while they had been on the beach swimming and fishing. She was showing no signs aggression but they were conscious of discouraging her from loitering.

The dingo loitered in the area while the conversation was happening, being yelled at and chased off several times. The dingo would retreat to the dunes for a short time (around 1min) before returning to the beach.

Additional comments and notes: There is a known habituated pack of dingoes in this area who have been frequently seen around the residences at the Oaks. Residents in the houses have been actively discouraging (yelling, clapping hands) any dingoes that come close to the houses. QPWS rangers have visited the houses on several occasions to give dingo safe briefings and talk to the residents.

Action taken: Interview conducted and dingo safe messaging reinforced. Patrols of the area continued.

Proposed further action: Continue dingo safe briefings of incoming residents and regular contact with all residents.

Increase patrols in this area while visitation and dingo activity are high.

Comments **The couple have a baby so thought it best to stay at the fenced Dundubara camp ground the day after the interaction.**

Detailed report of events: At approx 17:30 on the 21/01/2014, sch4p3(3) Prejudice the protection of an individual and children were unpacking the car at their camp in the Gurruman camping area. Whilst unpacking they moved their youngest child to the annex of their tent and continued unpacking. When sch4 checked on her child she noticed a male dingo approaching the baby. The dingo approached within 4 meters of the child but was scared away when the sch4 screamed and sch4p3 ran at the dingo yelling at it.

Later that night two dingoes (described as two males, one large and the other small) were loitering around their tent, regularly stopping to look into the window and the door sch4p3 yelled at them, scaring them away but they'd return.

sch4p3 and his family moved to Dundubara the following day.

Additional comments and notes: sch4p3 noticed one of the dingoes had scarring all over the back of its head.

No tags were noticed on the dingoes.

Action taken: Interaction reported to rangers. Interview taken and report generated and circulated.

Proposed further action: Continue ranger patrols through the camp areas. Install trail cameras within the area for dingo monitoring purposes.

Comments

Detailed report of events: sch4p3(3) Prejud and his adult sons had been camping in the Maheno CZ. They noticed in the first couple of days that at least two or more dingoes were coming through their camp area in the evenings at night looking for food scraps and then moving on when chased away. On the evening of the 23rd of January all the campers were sitting on the dunes adjacent to their camp when they heard some noise under their annex. They turned to see a dingo attempting to take the lid off a plastic food box that had been used for dinner, a male dingo was biting at the box and one of the campers chased it away. The light was dim but it was believed that two or more dingoes were present in the area.

Additional comments and notes: It was suggested to the campers that plastic boxes, unless stored safely, were not secure enough to stop dingoes

Action taken: Report taken and patrols continued.

Proposed further action: Continue patrols of camping areas and briefings to campers.

Comments

Detailed report of events: At approx. 22:00 on 24/1/2014 camper sch4p3(3) and her three friends were 20 mtrs away from their tent when they heard noises nearby, inspection found two dingoes had ripped the flyscreen on the tent and one had grabbed a bag with personal items, they yelled and chased the dingoes, one dingo dropped the bag and both took off into the foredune area. Later on in the evening they saw two dingoes again, they reacted the same way by yelling and chasing the dingo away, that was their last interaction.

Additional comments and notes:

Action taken: Report generated and circulated.

Proposed further action: Continue ranger presence (patrolling) in the Maheno/Whaba/Eugarie to brief visitors.

Did they receive an information pack with their permits Yes	
Did they read the Dingo Brochure Unknown	
Did the people follow 'dingo safe' messaging? (Ranger to assess) Yes	
Comments Had been briefed by tag along leader	

Detailed report of events: Palace tag along tour leader called into the office to report some theft and incidentally mentioned that there were regularly 5 dingoes loitering around their camp and proving very difficult to discourage. The dingoes were reported to have lay down on the foredunes between the beach and the camp, and move into the camp approaching the barbecue when cooking dinner and generally when clients are loitering around. Attempts were made to shoo the dingoes away (yelling at and advancing towards) but the dingoes usually only retreat momentarily before moving towards the camp again.

Additional comments and notes: Reporter stated that he couldn't identify any of the dingoes as it is too dark when they are being seen, although he said that one dingo appears larger than the others.

Action taken: Reported. Agreed that it might be time for the group to move camping areas when the leader suggested this.

Proposed further action: Trap and tag dingoes as required, consider temporary closure of camping zone to settle dingo activity.

Did they read the Dingo Brochure **Unknown**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **Didn't think throwing bait back into the water was encouraging or feeding dingoes.**

Detailed report of events: Rangers observed 2 mature aged adults fishing in water with their bucket on the sand approximately 20 metres behind them. PWW12m and an UT13m_Eur juvenile were laying watching the pair. PWW12m eventually got up and moved south while the juvenile moved towards the bucket, put it's head into the buck and pulled something out.

The older female retreated from the water and moved towards the bucket, shooping the dingo away and returning to the water with the bucket. The dingo stayed with them and continued to hang around. The older male reeled in this lined and discarded the bait by throwing it towards the water. The dingo immediately went to the item and ate it. The couple started to walk towards their camp in the camping area.

Rangers spoke to the couple regarding food availability and encouraging dingoes.

Additional comments and notes: These 2013 born juveniles are displaying increased signs of habituation

Action taken: Persons advised of secure bait options and implications to the dingo when habituated. Report generated.

Proposed further action: Patrols are being conducted early morning and late afternoon in this area while visitation and dingo activity is high.

Comments	

Detailed report of events: Whilst sitting on the rear verandah of the Central Station eastern barracks, we observed an untagged female adult dingo (estimated age approximately 5 years due to lighter fur colour) emerge from below the building and proceed to sniff around the lawn underneath the adjacent mango tree (which had dropped some fruit). The dingo was aware of our presence but showed little interest in, nor wariness of us. She was walking around with her tail curled over and a darker patch on her right ear may indicate a healed scar from a previous tag, although the ear did not appear torn. She moved west and then disappeared under the western barracks and wasn't sighted again. Observation lasted approximately one minute.

Additional comments and notes:

Action taken: Reported.

Proposed further action: Consider securing underneath building to prevent dingo access/sheltering. Trap and tag dingo for identification purposes.

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments

Detailed report of events: Campers reported that a young male dingo with the tag BWR in the left ear was hanging around their camp for various parts of the day.

It came in close on numerous occasions and was shooed off. At one stage it came in and started to chew the gas pipe from their gas bottle. The dingo made vocalisations towards the people in a non aggressive manner and slept in their vicinity for up to an hour approx. 30 metres away.

Later in the afternoon it returned but was not interested in hanging around.

Additional comments and notes: This report was obtained when general conversation with other campers prompted the reporting campers to discuss their interaction. The gas pipe may have had fat or something similar that caused the dingo to attempt to chew on it.

These 2013 born juveniles are displaying increased signs of habituation

Action taken: Report generated.

Proposed further action: Patrols are being conducted early morning and late afternoon in this area while visitation and dingo activity is high.

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **"No" to above question as the campers stored some food inside a tent. This tent was not the tent they were sleeping in.**

Detailed report of events: Rangers took the opportunity to speak with these campers as they were returning from other duties (servicing Middle Rocks amenities). They were in the process of packing up their camp to move to another location on the island.

They were asked if they had any negative dingo interaction to report.

They indicated that their spare tent that was being used for storing gear had been ripped on the night of Saturday 8th February 2014.

No one was inside the tent at the time.

sch4p3(3) P heard noises from the vicinity of the tent that was ripped as the dingo was in the process of trying to gain entry to the tent.

sch4p3(3) P states that as soon as he alighted from his tent the dingo ran off. He was unable to identify any distinguishing features of the animal.

sch4p3(3) P states that they had some items of unopened food and also a loaf of bread inside a lidded crate inside the tent.

The dingo did not gain access to the inner tent but ripped through the flysheet of the tent.

Additional comments and notes: Campers were given information regarding the need to store food in their vehicle when camping in beach camping zones. They appeared to be well prepared for their stay and simply didn't believe that a dingo would try and rip their tent in order to access a box containing food.

sch4p3(3) P and his party (total = 3) were intending to move to the Carree camping zone later today (10/2/14)

Action taken: Dingo/food safety messages highlighted for the group.
Encouraged to report any further negative dingo interaction during the remainder of their stay on FI.

Proposed further action: Nil.

Comments **The Eurong resort guest was practicing her martial arts alone on the beach.**

Detailed report of events: sch4p3(3) Prejud was practicing her sch4p3(3) on the beach at 05:45 on 8/02/2014 near Wongai camping area, when she noticed a dingo approaching her possessions she had placed approx. 20 meters away on the foredunes. The dingo ran up to her possessions and stole one of her thongs. The dingo then ran away with the thong in its mouth. sch4p3(3) chased and yelled at the dingo that subsequently dropped the thong and kept running.

Additional comments and notes: The dingo was described as smaller than an adult with large ears and feet. This indicates that the dingo is most likely a juvenile and most likely part of the 2013 Eurong pack.

No other identification such as an ear tag could be seen as the dingo was too far for sch4p3(3) to see.

The 2013 Eurong pack juveniles are displaying increased signs of habituation.

Action taken: Details of the interaction were taken and a report generated and circulated. RIC notified.

Proposed further action: Continue ranger patrols of the eastern beach and camp areas. Liases campers. CTO's and visitors to obtain unreported interactions.

<p>Questionnaire: Specify visitor type unknown</p> <p>Did they receive an information pack with their permits Unknown</p> <p>Did they read the Dingo Brochure Unknown</p> <p>Did the people follow 'dingo safe' messaging? (Ranger to assess) Unknown</p> <p>Comments</p>	
<p>Detailed report of events: At 15:45 on the 9/02/2014, Ranger 7028018 was driving north on patrol when an oncoming vehicle flashed their lights and stopped the ranger. The driver of the on coming vehicle reported that there was a deceased dingo approx. 100 meters south of Eli Creek.</p> <p>The deceased dingo was located by the ranger and removed off the beach. The dingoes warm body temperature and no obvious signs of rigor mortis indicated that it had only recently died.</p> <p>Whilst removing the dingo a group of RBAC vehicles stopped and the group leader asked the ranger what had happened. The ranger responded that it was a deceased dingo possibly caused by a vehicle strike (detailed examination of the animals injuries by the ranger confirmed that a severe impact such as consistent with vehicle strike had killed the animal).</p> <p>Subsequently the group leader then reported that earlier that morning approx. 10:00am he had and the group had seen 3 vehicles near Happy Valley intentionally swerving and aiming at 3 dingoes. One of the vehicles narrowly missed a dingo.</p> <p>The tag along driver was unable to describe the vehicles, identify any registrations or supply any photos of the interaction.</p> <p>The details of the driver and the ranger were exchanged and the driver said he would notify QPWS if he recognised any of the vehicles involved in the swerving incident during his stay on the island.</p>	
<p>Additional comments and notes: The deceased dingo was a juvenile from a known habituated pack.</p> <p>The deceased dingo was semi submerged in the incoming tidal waters when it was removed. No evidence of a vehicle were seen due to the incoming tidal water.</p>	
<p>Action taken: Details of the interaction were taken and a report generated and circulated. RIC notified.</p>	
<p>Proposed further action: Continue ranger beach patrols. Further investigating the report of visitors intentionally trying to injure wildlife and enforce compliance where possible.</p>

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **actively discouraged dingo by yelling at it and using her fishing rod.**

Detailed report of events: Rangers on patrol observed a **Prejudice the protection of an individuals right** fishing on the beach approx 100 meters south of Yidney Rocks being repeatedly approached and harassed by a juvenile female dingo. As they got closer they observed that the dingo was tagged and was identified as GGPI13f.

sch4p3(3) P was actively discouraging the dingo by yelling at it, using her fishing rod when the dingo got within 1m, and moving away from the dingo.

QPWS rangers spoke with **sch4p3(3) F** who stated that the dingo had been hanging around for a while, and she had moved closer to the accommodation to be 'on the safe side'. QPWS rangers discouraged the dingo by yelling at it and clapping hands, at which point the dingo moved around 20m away.

sch4p3(3) P was observed walking back towards Yidney houses, and GPI13f continued to follow her, running a short distance to catch up. QPWS rangers drove towards the dingo and put their vehicle between **sch4p3(3) P** and the dingo. Rangers continued to move with the **sch4p3(3) P** using their vehicle and yelling/clapping to discourage the dingo, until **sch4p3(3) F** reached the accommodation.

The dingo was observed a short time later still actively following and trying to hang around **sch4p3(3) P** at the **sch4p3(3) Prejudice the protection of an sch4p3(3) F** threw an item at the dingo, chasing and clapping at it eventually causing it to retreat back to the beach.

Additional comments and notes: GGPI13f is a highly habituated juvenile from a known pack around the Oaks area. **sch4p3(3) P** also advised ranger 7026466 that she suspected a known local **sch4p3(3) P** from the **sch4p3(3) Prejudice the protection of an sch4p3(3) F** was feeding this pack of dingoes.

Action taken: Report generated and circulated. This area and the Eurong area is being regularly patrolled for high risk interaction behaviour.

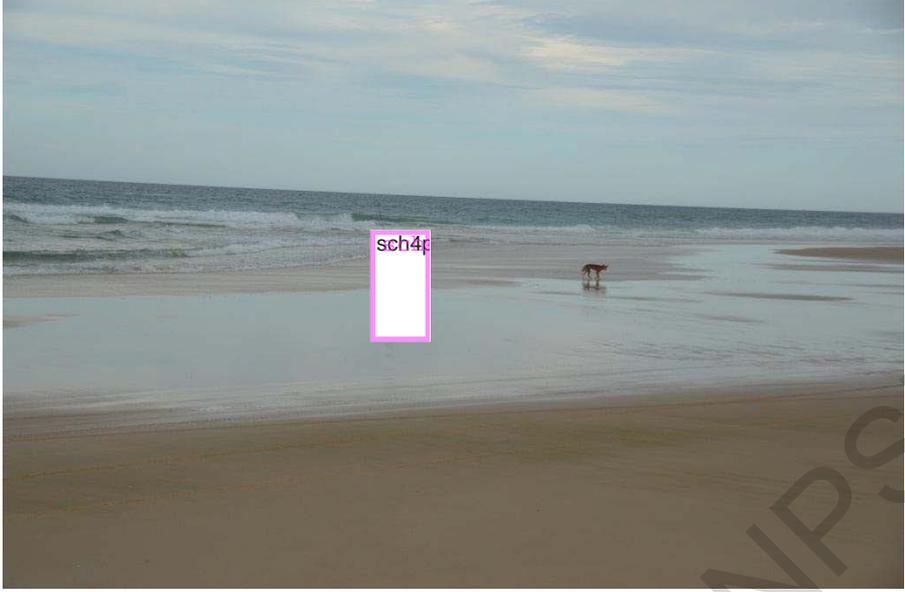

Proposed further action: Continue patrols in this area, including early mornings and late afternoons. Continue visitor education and camper briefings. Rangers will revisit Yidney Resort managers regarding dingo safety messages and support for educating their patrons who are fishing, swimming, walking etc in this area.

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **No**

Did they read the Dingo Brochure **No**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **The car hire company Fraser Magic delivered a comprehensive dingo safety briefing to the campers prior to their departure.**

Detailed report of events sch4p3(3) Prejudice the t and 3 other campers arrived at their chosen camping site on the beach 2km south of the Eurong township (Wongai CA) at approx. 17:00pm on the 19/02/2014.

The visitors set up their camp and proceeded to cook dinner around 18:30pm. Whilst cooking their dinner they noticed a dingo lying up in the fore dunes watching them. sch4p3(3) Prejudice the noticed that the dingo had a tag, describing it as a 'shiny thing' in its left ear.

Once the campers finished their dinner they packed up their cooking equipment and food and stored it in their vehicle, as per the recommendations given to them by Fraser Magic. They then carried their chairs down to the beach to watch the sunset.

At approx. 19:00pm sch4p3(3) Prejudice the and friends returned to their camp to find both their tents ripped into, their bags torn apart and clothing and other camping equipment dragged out of their tents and piled into a single pile approx. 10 meters away. Dingo prints were all around the camp but no dingoes were seen.

The campers packed up their camp and booked into a room at Eurong Resort.

Additional comments and notes: No colours on the ear tag were seen.

The Eurong pack is active within the area the interaction occurred and display very habituated behaviour.

Action taken: Eurong Resort notified QPWS Eurong Base of the interaction. Interview conducted and report generated and circulated. RIC notified.

Proposed further action: Continue Ranger patrols and camper briefings. Continue monitoring of the area for identification of dingoes frequenting the area.

Questionnaire: Specify visitor type **resident**

Did they receive an information pack with their permits **click to select**

Did they read the Dingo Brochure **click to select**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **click to select**

Comments **Reporting resident also observed a family group nearby being 'harassed' by the same dingo**

Detailed report of events: Resident rang Eurong office at 655hrs to report an interaction with "the same dingo that rangers had observed her being harassed by the previous afternoon" - refer to separate interaction report. She also reported that the same dingo was currently harassing a family group on the beach with a young child. Ranger 7027904 was dispatched to scene to intervene/investigate. Family group fishing on the beach near the northern bypass entrance was interviewed first - no dingo was present at this time. Male family member reported no issue with any dingoes that morning. Reporting resident was interviewed and stated that she had been fishing and the dingo had been loitering very close to her over an extended period, she had a couple of fish in her bait/catch bag that the dingo was possibly interested in. Resident eventually decided that it was in her best interests to move away from the persistent dingo - as she walked back to her premises the dingo followed her closely (within 2m) all the way until she was inside her house (up to back door). The resident stated that the dingo then allegedly left and 'harassed' the family group on the beach, although this group denied interaction with any dingo during interview.

Additional comments and notes: Resident stated that this dingo commonly frequents around the property and close to nearby infrastructure, including accessing verandahs.

Action taken: Two parties allegedly involved interviewed. Reported to NRM.

Release

Proposed further action: Monitor behaviour, adjacent camping zones already closed, educate and brief nearby visitors.

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **No**

Did they read the Dingo Brochure **No**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **The campers only received their permits from the QPWS visitor center at Rainbow Beach. No information packs were supplied. The campers received all their 'dingo safe' meessaging from ranger briefings on Fraser Island.**

Detailed report of events: At approx. 24:00 on the 22/02/2014, [sch4p3(3) Prejudice] were woken up at their One Tree Rocks camp by a dingo tearing into the front door of their tent. [sch4p3(yelled and bashed the side of the tent to scare the dingo away. The dingo promptly ran away.

No identifying features of the dingo could be described due to it being dark.

[sch4p3(3) Prejudice] packed up their camp the following morning and booked into a room at the Eurong Resort.

Additional comments and notes: [sch4p3(3) Prejudice] confirmed that a young male dingo with a GY tag (GY13m) and a female with a red tag (6Red10f) visited their camp earlier that day. [sch4p3(tried to yell and chase the two dingoes away but they both lay down in the shade under a tree approx. 15 meters away from their camp and went to sleep.

The 2013 Eurong pack juveniles are displaying increased signs of habituation.

Action taken: The campers notified the Eurong Resort of the interaction. The resort notified rangers. Ranger interviewed the campers and generated and circulated a report. Dingo ranger and SMU 2IC notified.

Proposed further action: Continue ranger patrols and briefings within all camp areas along the eastern beach. Consider camp area closure of Wongai & One Tree Rocks CA's during the busy easter period.

Comments

Detailed report of events: The following interaction was reported to QPWS rangers at Rainbow Beach by [sch4p3(3) Prejudice the protection of an individual] NRM ranger 7028018 conducted an in-person interview.

At approx. 21:30 [sch4p3(3) Prejudice] was watching television at the Yidney Rocks accommodation when [sch4p3(3) Prejudice] looked up at the closed screen door and noticed a large male dingo sitting on [sch4p3(3) Prejudice] veranda staring at [sch4p3(3) Prejudice]. [sch4p3(3) Prejudice] chased the dingo away. Once outside [sch4p3(3) Prejudice] noticed 3 more dingoes asleep on one of the other apartment verandas. The other dingoes were unresponsive to any deterrents.

Additional comments and notes: The large dingo was described as an adult dingo and the 3 other dingoes asleep on the veranda were described as smaller. All three dingoes are most likely members of the known habituated pack frequenting between Poyungan and Eli Creek.

No ear tags were seen as it was dark and [sch4p3(3) Prejudice the protection of an individual's ri]

Action taken: QPWS notified of the interaction by Yidney Rocks staff. NRM ranger conducted an in person interview and generated and circulated a report. RIC notified.

Proposed further action: Continue ranger patrols of the eastern beach and camp areas. Increase ranger briefings to visitors at Yidney Rocks and The Oaks accommodation during the easter holidays.

Comments

Detailed report of events: sch4p3(3) and four other friends heard a noise in the kitchen area outside of their tent at approximately 11.00pm on the 3.03.14 at Wyuna CZ. They did not investigate the disturbance but in the morning sch4p3(3) discovered one of their eskies had been dragged along the sand, opened and had a whole chicken missing from it's contents. The latch on this particular esky was not a common rubber loop but the dingo managed to open it.

Additional comments and notes: The campers had been noticing a large male dingo loitering in the area every day generally in the afternoon. As we (rangers) were taking notes about this dingo interaction, a large male dingo with a delaminated red or pink ear tag approached the camping area and was chased off by sch4p3(3) P

Action taken: Reported incident and continued patrols in camp zones. The campers secured their ice boxes and storage boxes with ratchet straps.

Proposed further action:

Comments **Regular Fraser Island camper**

Detailed report of events: At 2:30pm I was driving through along the beach past Yurru Camp Zone and I saw a camper close to the water with two dingoes watching closely. I stopped the vehicle and one of the dingo's came close to the QG ute, I sounded the horn to get him away from the vehicle. I got out of the vehicle and talked to the camper. I stayed with camper until dingoes moved on.

Additional comments and notes:

Action taken: report generated and forwarded

Proposed further action: Continued patrols and monitoring of GREEN tagged dingoes behaviour

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **The school teacher responsible for safety briefing the students told the students to chase the dingoes away by running towards them whilst waving your arms and yelling. When asked if they received any dingo safety information with their permits they said yes. The correct dingo safety information was forwarded (verbally) onto them by rangers.**

Detailed report of events: Rangers 7028018 & 7028122 were approached by two teachers from Tweed Valley Adventist College, at approx. 22:00 at the QPWS ranger base, Eurong. The teachers reported a dingo interaction and showed genuine concern for their students safety.

At approx. 21:00 two students from Tweed Valley Adventist College staying at One Tree Rocks camping area, returned to their tents to find the front door of their tent torn. Nothing was missing but the students noticed dingo foot prints all around their tent. No dingoes were seen that night but the students and teachers commented that a couple of dingoes were loitering around their camp earlier that day. The school student interviewed said he had a container of powdered energy drink that had teeth marks in it.

Since this interaction 4 more tents have been torn. The teachers are now following ranger advice to lock away all items while the tents are unoccupied. It was also recommended that the school group relocate to a fenced camp ground such as Central Station or Dundubara.

Additional comments and notes: A known very habituated dingo pack occupy the One Tree Rocks camping area. The dingoes that have ripped the tents and were loitering earlier that day around their camp were most likely part of this pack.

The teachers reported that none of the dingoes have shown aggressive behaviour directly towards people. All the tents have been unoccupied when they were torn.

Action taken: Interview conducted and report generated and circulated. RIC notified and a dingo safety briefing delivered by a dingo ranger to the school group. Rangers are regularly patrolling the camp area and contacting the school group leaders.

Proposed further action: Continue ranger patrols and visitor briefings. Increase ranger patrols and visitor briefings during the Easter holiday period. Consider closing the Wongai and One Tree Rocks camping areas during the busy Easter holiday period and dingo mating season.

Did they read the Dingo Brochure **click to select**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **Staff chased the dingo away**

Detailed report of events: It was reported by resort staff that a green tagged young male had been seen loitering around the resort area. Staff had chased it off but found it difficult to deter only retreating a short distance eventually loosing interest and leaving.

Additional comments and notes: Description consistant with GGG13M also seen by Ranger 7027330 earlier in the day loitering around backpackers at the Pinnacles. The dingo is showing no aggression at this stage however is displaying a high level of habituation.

Action taken: Briefed campers in resort, Report generated

Proposed further action: Monitor GGG13M, ensure camper briefing regime maintained

Comments

Detailed report of events: During a patrol Ranger 7027330 noticed a juvenile dingo sitting behind a group of backpackers (RBAC) who were collecting pippies. The ranger asked the guide if he had seen the dingo sitting and watching. The guide said he had seen the dingo in the area but had not seen it approach. At this point the ranger positively identified the dingo as GGG13M by its ear tag. The ranger then chased the dingo away. The dingo retreated approx. 10m and did not leave the area until the backpackers left the scene.

Additional comments and notes: This animal is showing no signs of aggression however is displaying high levels of habituation.

Action taken: Report generated

Proposed further action: Monitor animal, brief camps in area

Comments

Detailed report of events: QPWS rangers were performing scheduled maintenance on the Eurong fence and grids on the morning of 16/03/2014 when they noticed fresh dingo tracks inside the fence. After locating the dingo, rangers were able to release GGPu13m through a vehicle access gate on 18/03/2014.

The following morning (19/03/2014) the Eurong Resort staff notified dingo ranger 7028018 of another dingo inside the fenced area. PuGR13m was persued for several days until he was trapped on the night of 24/03/2014.

Additional comments and notes: GGPu13m & PuGR13m are members of a highly habituated pack frequenting around Eurong.

Action taken: Eurong Resort & QPWS senior management notified of the dingo inside the fence. Rangers loacted and released the dingoes.

Proposed further action: Continue the regular fence inspections and ensure all gates and grids function .

Comments **The fishermen were together as a group and not spread out along the beach. Rangers recommended that if a dingo approaches them in the future that they should pack up and relocate. It was also suggested that making contact with a dingo is considered 'interfering with wildlife' under legislation.**

Detailed report of events: At approx. 21:00 on the evening of the 16/03/2014, a group of 8 were fishing on the beach approx. 1km south of Yidney Rocks when they were approached by an untagged dingo (described as 'one of the young ones'). The dingo approached within a couple of meters and showed no signs of being wary of the group. One of the fishermen feeling uncomfortable with the close proximity of the dingo whacked it on the hind legs to scare it away. When the fishermen struck the dingo the two gang hooks attached to his fishing line lodged themselves in the dingoes hind leg. The dingo yelped and ran away with the two hooks still lodged in its leg.

The fishermen reported the interaction to sch4p3(3) Prejudice the protection of an individuals right to priva who promptly contacted QPWS rangers.

Additional comments and notes: The untagged dingo is most likely a juvenile who's part of the habituated pack occupying the area between Poyungan and Eli Creek.

Action taken: QPWS rangers were notified by Yidney Rocks management. QPWS senior management notified. Interview conducted and a report generated and circulated. Rangers are patrolling the beach looking for the dingo.

Proposed further action: Continue patrolling the beach to locate the dingo. Once the dingo is located QPWS rangers will administer first aid to remove the hooks.

Questionnaire: Specify visitor type **commercial tour operator**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **The bus driver allowed the passengers to exit the bus and approach the dingo at close proximity to take photos.**

Detailed report of events: At approx. 12:30 on the 19/03/2013 rangers commuting off the island noticed a tour operator and his passengers approaching a dingo (GGG13m) on the beach. On arrival sch4p3(3) F (discovery bus driver) had the majority of his passengers out of the bus taking photos of the juvenile male dingo GGG13m (see attached photos).

sch4p3(3) F was quick to say that he had talked with a head ranger in the past about stopping and letting passengers out of the bus to take photographs, and was under the impression that this was ok. When asked who the ranger was he was unsure and couldn't remember the person's name. Ranger 7027118 asked sch4p3(3) to board the passengers and that they could simply take photo's from within the bus to prevent the habituation process of any dingo.

Additional comments and notes: GGG13m regularly displays very habituated behaviour.

Action taken: Rangers stopped and spoke to the tour operator. Photos taken and report generated and circulated.

Proposed further action: Continue ranger patrols and visitor briefings along the beach and within the camp areas. Recommend to all tour operators allowing passengers to leave the tour vehicle to photograph dingoes at close proximity to cease this activity as its increasing the chances of dingoes becoming habituated and it may increase the chances of an adverse human/dingo interaction.

Comments **The beach wormer left bait unsecured and available for dingoes to access.**

Detailed report of events: At 12:55 on 19/03/2014 commuting rangers 7027118 & 7027940 noticed an unidentified dingo eating a fish frame 50m north of the parked vehicle [sch4p3(3) Prejudice the protection of an in] registered to professional beach wormer [sch4p3(3) Prejudice the prote] was questioned where the dingo aquired the fish frame and he replied by saying that while he was preparing worm burly in a bucket he left the bucket to go to the other side of the vehicle, during this time the dingo had rushed in and took a couple of frames from the bucket.

Ranger 7027118 stressed the importance of dingo food security, along with the procedure for disposing fish offal.

Additional comments and notes: BPuR12m was seen and identified watching the professional beach wormers at Gabala at 15:30.

Action taken: Rangers interviewed the professional beach wormer. Report generated and circulated.

Proposed further action: Continue ranger beach patrols and visitor briefings. Continue ranger vigilance on enforcing appropriate food security measures are practiced by all visitors to Fraser Island.

Comments

Detailed report of events: While travelling up the beach two rangers noticed a sch4p3(3) Pri Land cruiser parked with three dingoes within a couple of metres of it, when the rangers got within 50 metres the vehicle took off towards the south, on pulling up, the rangers noticed dry dog food scattered over the sand and the dingoes eating the dog food, the rangers turned around and attempted to catch up with the vehicle but were only able to get it's number plate sch4p3(3) P as it continued to increase it's speed beyond a safe limit, the rangers were loaded with a mop up unit and water and chose not to continue. The info was passed onto the southern rangers, on returning to the scene two of the dingoes took off and one stayed eating something on the ground, the dingoes had eaten all the dog food, there was also a lot of opened/crushed Eugarie on the ground. I received a radio call from a NRM/SMU rangers who had spoken to/interviewed the driver of the vehicle at the Eurong out grid, a conversation took place and the driver said he had stopped to look at the dingoes but had no part in feeding them. He was asked if there were any other vehicles in the area, he replied there was another with a trailer, the rangers that first noticed the incident believed there we no other vehicles to the north or the south. The NRM/SMU rangers that were speaking to the driver advised them on the regulations and sent them on their way.

Additional comments and notes:

Action taken: Report generated and circulated and vehicle details put on file

Did they receive an information pack with their permits **click to select**

Did they read the Dingo Brochure **click to select**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **The guide got down to dingoes level to take a photograph with an iPhone. This action encouraged the dingo to approach him.**

Detailed report of events:

s.68(4)(c) Copyright infringement infringement

Additional comments and notes: Dingo looks to be a 2013 born juvenile and possibly male according to s.68(4)(c) post. No sign of aggressive behaviour noted. s.68(4) is a long term guide on Fraser Island and is aware of the QPWS dingo safe messages and appropriate behaviour around dingoes. These actions from experienced guides have been known to encourage visitors to act in a similar manner towards dingoes.

Action taken: incident reported. Guide will be spoken to regarding these actions and the possible interpretation by readers of the post who may attempt the same actions in order to obtain a close photograph and put themselves and a dingo at unnessessary risk.

Proposed further action: Remind CTO operators and guides of their permit obligations and QPWS dingo safety messages to mitigate risk between humans and dingoes.

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **The campers stored their bbq in their tent.**

Detailed report of events: At 7am on the 24/03/2014 sch4p3(3) Prejudi and three other friends left their camp at One Tree Rocks Camping Area. When they arrived back at their camp at approx. 8pm the same day they noticed that a dingo had torn a hole in their tent fly mesh and pulled the drip tray off their bbq and licked it clean. Dingo tracks outside and around their tent confirmed it was a dingo.

Additional comments and notes: GGpu13m was seen hanging around their camp that evening. GGpu13m is a member of a the highly habituated pack that frequently loiter around campers in the One Tree Rocks camping area.

Action taken: Campers interviewed and a report generated and circulated.

Proposed further action: Continue regular ranger patrols through the camp and visitor day use areas.

--

Detailed report of events: Three dingoes were loitering around sch4p3(3) camp continuously - when the camp was left vacant the dingoes came in and attempted to access a plastic food box by chewing on the handles. Dingoes were discouraged on several occasions but they continued to loiter in the area.

Comments

Detailed report of events: sch4p3(3) Prejudice the were fishing at the southern end of Yuru CZ with their adult daughter. While fishing GGG13M and BWY13M were loitering around the family threw sand and pumice stone at them to deter the animals. This had little to no effect. The dingoes lost interest over time and left the area.

Additional comments and notes: GGG13M and BWY13M are showing high levels of habituation. GGG13M is regularly seen in this area.

Action taken: Report generated

Proposed further action: Patrol and monitor these animals

Comments

Detailed report of events: Campers were setting up their tents when a male dingo (green,green,green tag) took a tent rope and ran off with it. The Campers didn't chase after the dingo. Later on they took a walk on the beach and retrived their rope that the dingo had taken earlier on. Green comes to theR camp site daily and sits at their campsite. Campers said this green tagged dingo has been seen chasing other dingoes through their campsite.

Additional comments and notes: It is important to note that the family did not chase the dingo away from their camp site and ignored it. We informed them that they shouldn't let it loiter in the area near their camp site.

While conducting camper briefings a colleague and I saw a dingo in the Maheno CZ (couldn't see the tag). It kept its distance from the family.

Action taken: Report generated and forwarded

Proposed further action: Continued patrols and monitoring GGG13m dingoes behaviour

Comments

Detailed report of events: Rangers on patrol at Eli Creek on 05/04/2014 were advised of an incident which occurred out the front of Eurong the previous evening.

A male visitor was on the beach fishing when he noticed three dingoes within 5m of him. He banged two pieces of poly pipe (rod holders) together and yelled at the dingoes and 2 of them moved away and continued along the beach. The third dingo only moved back a short way and advanced again before the visitor kicked sand at it. The dingo moved about 15m away and lay down.

The visitor moved his car closer to him and put his sealed bait bucket in the back of the ute.

The dingo stayed in the area as long as the fishermen were fishing.

Additional comments and notes: No tags were noticed.

Action taken: Report generated. RIC notified.

Proposed further action: Continue patrols in the area. Consider closing Wongai and OTR CZ if interactions continue in this area.

Comments

Detailed report of events: A family camping at One Tree Rocks camping area went early morning fishing and returned at approx. 11:30 to find a dingo stuck in the annex of their tent. The campers had left the tent annex door slightly open and two other members of their group witnessed two dingoes entering the tent. One of the dingoes left the tent but the other couldn't find the exit. The dingo was stuck for a number of hours until the owners of the tent returned and let the animal out.

The dingoes didn't damage any of the campers property.

The dingo in the tent was described as having a red tag in its left ear. The first dingo was described as having a green tag in its left ear.

Additional comments and notes: The green tagged dingo is most likely GGPu13m and the red tagged dingo BWR13m. Both dingoes regularly hang around the OTCA and are part of the Eurong habituated pack. BWR13m was seen by rangers only a couple of hours after the interactoin loitering around other campers in OTCA.

Action taken: Camp briefing delivered by rangers. Interview conducted and a report generated and circulated.

Proposed further action: Continue camp briefings. Continue early morning and afternoon ranger patrols for compliance, community liaising, risk mitigation and monitoring purposes during the busy Easter holiday period.

Comments

Detailed report of events: While repairing the Waddy Point beachfront access road rangers saw four dingoes engaging in a fight between the pack, this unfolded in front of the rangers who managed to get a photo and possibly saw a brown tag on the large male. Rangers followed the dingoes and two ran around the dingo fence towards the sand blow and two ran up the ranger residence driveway towards the RIC house, while following the dingoes rangers spoke to a girl aged 9 at the Dorrigo outside the ranger base with no adult present, her parents were camping in the fenced area, they advised her to go back to the fenced area with her parents.

Additional comments and notes: Possibly and most likely the pack reported in a code D on 1.4.2014

Action taken: Report generated and circulated.

Proposed further action: Continued dingo patrolling/raising awareness and camper briefings.

Comments

Detailed report of events: Ranger 708020 on patrol noticed a dingo in close proximity to a vehicle. As the QPWS vehicle approached the dingo moved and sat about 10m away from the vehicle, watching the two professional wormers at the water's edge. When the ranger stopped to identify the dingo (6Red10f) the dingo moved further back towards the dunes and sat down again watching the wormers. The ranger was in the area for another 15 minutes on patrol and the dingo was in the same spot when they left.

Additional comments and notes: The professional wormers are known to QPWS rangers. The female dingo is part of a known habituated pack in the area.

Action taken: Report compiled and circulated.

Proposed further action: Continue patrols, including morning and afternoon. Continue briefings with campers and visitors. Monitor behaviour of the known pack in the area. Consider closing Wongai and OTR campzones if interactions continue to occur.

Comments

Detailed report of events: While on patrol a QPWS ranger noticed a dingo sitting within 5m of a parked vehicle. As the ranger got closer the dingo was chased away by the occupants.

The dingo was identified as GGPI13f.

The dingo continued south along the beach towards a further two parked vehicles. As the dingo approached the occupants of the vehicles got into their cars and watched as the dingo sniffed around.

The dingo was chased off by a male visitor and retreated up the sand dune where it continued to watch as the occupants packed away their belongings.

The dingo then headed over the sand dune towards the Yidney Rocks accommodation. The ranger parked on the beach and walked up to the accommodation to look for the dingo and brief the visitors staying in the accommodation.

The dingo was observed sitting on top of the dune watching the activity on the grass in front of the accommodation. The dingo slowly approached the group (5-10m at a time) before descending and walking around the edge of the grassed area. The ranger observed the dingo, while briefing the visitors, and chased the dingo off as she approached the group by yelling and clapping their hands.

The dingo retreated down the bank to the beach and headed south along the beach.

The ranger continued briefing the visitors and residents on dingo safe behaviour and left.

The dingo was seen approx. 20mins later at the Oaks on the beach.

Additional comments and notes: This dingo is a part of a known habituated pack in the area and has been involved in several recent code C & D interactions.

Action taken: Visitors and residents briefed. Report compiled and circulated. RIC notified.

Proposed further action: Continue patrols in this area including morning and afternoons. Continue monitoring the behaviour of this dingo and the known pack in the area. Continue the closure of the campgrounds between Poyungan Rocks and Eli Creek.

Comments

Detailed report of events: sch4p3(3) and her family were stopped at Akuna creek on the 7/4/14 at 0915am. Juvenile dingo GGG13m approached the group from the fore dunes sch4p3(3) was taking photos of the dingo when her hat blew off her head. This excited GGG13m as the dingo came in, grabbed the hat and took off behind the fore dunes. The dingo did not return after this interaction.

Additional comments and notes: Ranger 7027118 viewed sch4p3(3) photos of the dingo and positively identified the dingo to be GGG13m.

Comments

Detailed report of events: * Rangers were driving through Guruman CZ at approximately 11:30am when they approached a campsite.

* Rangers observed GrGrGr lying on the grassy track approximately 3 metres from the campsite we were driving toward.

* The dingo got up and walked alongside our vehicle and away from the campsite.

* I queried [sch4p3(3) Pre] as to how long the dingo had been lying around their camp. He indicated that the dingo had been a regular visitor to their camp since they had arrived several days earlier. On this occasion he said the dingo had been lying in that spot for approximately 5-10 minutes.

* I outlined to [sch4p3(3) Pre] and his wife that the QPWS requests that campers actively attempt to deter dingoes from loitering around their campsites. I suggested that [sch4p3(3) Pre] needed to do this in the future so as to try and prevent the reinforcement of habituated behaviours from dingoes such as this one.

* While speaking with the family the dingo returned toward their camp and approached the group of us closely. I chased the dingo away with a length of PVC pipe (fishing road holder).

Additional comments and notes:

Action taken: * Chased dingo away from the campsite.

* Requested the assistance of the campers to continue to actively deter this and any other dingoes from their campsite.

Proposed further action: Refer to NRM Ranger for assessment and action.

Comments **No food or rubbish had been stored in the tent.**

Detailed report of events:

On returning to camp, it was noticed that something, probably a dingo, had torn 2 holes in a tent at the camp site. Nothing had been taken and there were no food items or anything else apparent in the tent that would have caused a dingo to rip in to the tent.

Additional comments and notes:

No dingoes were present at the time but there were a total of 5 dingoes seen in the area by the group and green was seen on a tag of one.

Action taken: Report taken

Comments

Detailed report of events: sch4p3 and his family were driving to Cathedral Beach store at around 7pm on the 8.04.14 when they saw what appeared to be a man in his early 20's sitting on the ground in front of a sch4p3(3) Prejudice the protection of an individuals right to privacy. d He was looking suspicious as there were two dingoes near by eating something off the ground. As it was dark it was difficult to see clearly but the man looked like he had some sought of food, bait etc in a circle in front of him. sch4p3 approached the man on his way up the ramp to the Cathedrals Store and asked him if he was ok. The man replied in an unfriendly manner telling him to go away. This made sch4p3 more suspicious and he tried to obtain the car registration number with the aid of his torch but was not successful.

Additional comments and notes: [] and his friend noticed the man was still there after they came back down the ramp about 20 minutes later as well as the two dingoes.

Action taken: Reported incident and continued patrols in camp zones.

Comments **The campers tried to secure food by putting a large tent peg through the 'eyes' on the esky lid but dingoes were still easily able to access the contents**

Detailed report of events:

On waking in the morning, it was observed that a dingo or some dingoes had taken a block of butter, one kg of sausages, 66 eggs, ½ kg bacon and 150 plastic wrapped cheese slices of from an inadequately secured esky.

sch4p3(3) also mentioned that he woke at 0600 to find a dingo between his tent and his tent fly. It was startled and ran away when he woke and no ID was seen.

Additional comments and notes:

No dingoes were seen taking the food but there were a total of 5 dingoes seen in the area and green was seen on a tag of one.

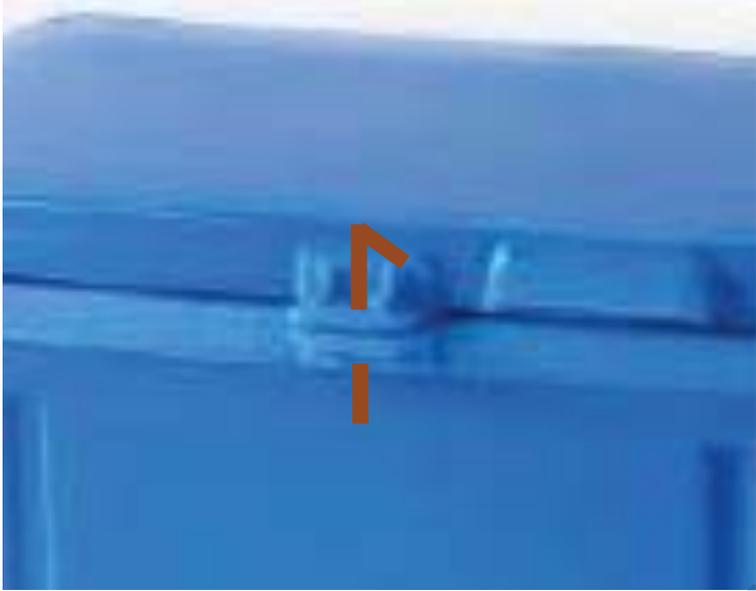

Action taken: Report taken and advice on securing food given

Detailed report of events: [sch4p3(3) Pre] reported the following interaction to QPWS ranger 7029704.

Both were driving along the eastern beach when they observed a White Toyota Land cruiser troupe carrier (older style) stopped with a dingo behind it. They looked to be stopped to take photos of the dingo but they revved the motor, "chucked a U-turn and straightened up, accelerating towards the dingo". The dingo dodged the vehicle by moving to the rocks and tucked itself in closer to the rocks.

[sch4p] pulled his vehicle in behind the troupe carrier and followed them off. The troupe carrier continued to the south side of Yidney and onto the bypass and doubled back to the original area where the dingo was. [sch4] noticed that the tyre rack at the back had not been closed or latched before the Toyota took off.

Due to having young family in the vehicle [sch4] did not want to continue following the troupe and possibly cause aggravation. A photograph was taken of the vehicle QLD registration number [sch4p3(3) Pr]

Dingo looked young (2013 born juvenile).

Additional comments and notes: [sch4p3(3) Prejudice the protection of an individuals right to privacy] [dividuals right t]

Detailed report of events: At approx. 0930 Ranger 7027330 was patrolling Nth from Eurong, on arrival at Happy Valley beachfront an a lady with two young children was seen walking Nth in the vicinity of the ramp. On continuing Nth a juvenile dingo was seen heading Sth at this point the ranger turned around and advised the lady with the children to return to the fenced area of Happy Valley which she did. The ranger then went back to the dingo who was continuing travelling Sth. The dingo was positively identified as GGPI13F and photographed. The dingo noticed the family moving toward the ramp and changed direction toward them. The ranger placed the vehicle between the dingo and the family until the family was inside the fenceline.

Additional comments and notes: The dingo displayed no aggression and got no closer than 75M to the family

Action taken: Ric Nth informed, report generated

Proposed further action: Continue patrols, monitor animal.

Comments

Detailed report of events: Whilst walking along the beach with a friend an off duty QPWS ranger observed a dingo lying on the sand close to two fishermen. As the ranger got closer they were able to identify the dingo as BWR13m from his ear tag. The dingo was observed being chased away from the fishermen but returning after a short time and lying down nearby again.

The dingo was not wary of people walking past and photos were taken to confirm identification. When the ranger was approx. 50m past the dingo they looked back and observed the dingo walking towards the fishermen and standing within 5m of them.

Additional comments and notes: A QPWS ranger vehicle had just stopped to talk to the fishermen prior to this incident.

Action taken: Report compiled and circulated.

Proposed further action: Continue patrols in this area, including mornings and afternoons. Monitor behaviour of this habituated individual. Consider closing Wongai & One Tree Rocks camping areas if behaviour continues.

Comments

Detailed report of events: At approx. 0930 ranger 7027330 was patrolling Eli Ck when a dingo approached from the Sth and proceeded along the southern bank. The dingo was photographed and watched from the Nth bank of the creek. The dingo was identified as GGPI13F. The dingo was followed up the board walk toward the toilet block and down to the beach. The dingo then headed back Nth toward the creek where it was intercepted by ranger 7027330 it then turned Sth and left the area.

Additional comments and notes: Showed no aggression at this time displays high level of habituation. Wary when approached by rangers but will walk straight toward campers.

Action taken: RIC Nth informed, report generated.

Proposed further action: Monitor animal patrol area.

Comments

Detailed report of events: Ranger 7027330 was leaving Dundubara to commence early patrol when dingo tracks were sighted inside the fence line. The ranger patrolled the fence line for any signs of breaches none were found, signs of the dingo attempting to dig out were found. With the assistance of four other rangers a sweep of the vegetated area in the campground was made no sign of the dingo was found. All camps were informed that there may be a dingo inside the fenced area, no campers reported sightings. Patrols were conducted late that evening and early the next morning no fresh signs were found.

Additional comments and notes: On first finding the tracks inside the fence line there were tracks of 3-4 dingoes being very active outside the grid on the in road. Initially this was thought to have been the activity that caused the dingo to cross the grid; however this may have been the activity post exiting the fence.

Action taken: Patrol fence line, inform RIC, sweep vegetated area, brief campers, patrol camp and fence line, generate report.

Proposed further action: Investigate design and engineering measures to facilitate the swift removal of dingoes from fenced areas.

Comments

Detailed report of events: sch4p3(teenage daughter witnessed a Nissan Patrol drive up to GGG13m and proceed to throw unidentified food items to the dingo. The incident occurred on the beach in front of their camp.

Additional comments and notes: Latter the same day GGG13m loitered around their camp while they were having dinner.

Action taken: Report generated, campers in area briefed.

Proposed further action: Increase patrols

Comments Waeco esky's are quite secure however must still be strapped down as dingoes are able to gain access	

Detailed report of events: sch4p31 awoke on the morning of the 14/04/14 to find that his Waeco esky had been broken into and saw dingo tracks all around his campsite. His two daughters said that they heard "the dingoes" outside their tent in the night. The dingoes stole 1kg of sausages, milk and butter.

Additional comments and notes:

Action taken: sch4p31 was asked to secure the waeco esky with a strap and to be extra vigilant with food security. He was also warned to actively deter the dingoes, as they are likely to return.

Proposed further action: Continue to patrol area and make campers aware that this type of behaviour is occurring in this area.

Comments **Stayed in vehicle and didn't feed dingo.**

Detailed report of events: Patrolling rangers observed GGG13m approach a white landcruiser at the front passenger door. His face was up turned towards the window in a manner consistent with soliciting food then it lay down on the beach next to the stationary vehicle in close proximity as pictured.

The second male dingo (BWY13m) went to the fore dunes and found a dead bird to play with.

Additional comments and notes: This behaviour is regularly observed from GGG13m. There are concerns this dingo will eventually be hit by a vehicle. Dingo did not display aggressive behaviour.

Action taken: Took photos and video. Interaction reported to RIC NRM. Rangers stayed in the vicinity until the two vehicles left.

Proposed further action: Refer to NRM Ranger for assessment and action.

Comments

Detailed report of events: On the 15th April, ranger 7027118 was contacted by a Second Valley resident, notifying QPWS that a dingo was seen inside the fence. After investigation it was confirmed that a dingo was inside the fenced area.

Rangers 7028018 & 7028020 trapped on the nights of the 16th & 17th April, inside the fenced area and captured the animal at 2025 on the night of the 17th. The dingo was an untagged juvenile male dingo later tagged PuOW13m. The dingo was released later that night.

Additional comments and notes: Due to four reported dingoes in the past month inside the Eurong fenced area (1 unconfirmed) and all scheduled fence inspections and maintenance completed, NRM rangers are investigating the possibility that the dingoes were encouraged inside the fence intentionally.

Action taken: Interviews taken and a report generated and circulated. Dingo ranger notified.

Proposed further action: Continue investigations into how the dingoes are entering the fenced area.

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments: **The family involved had been briefed about dingo safety earlier that morning by myself and 7026804**

Detailed report of events:

On exiting the workshop driveway, myself and 7027772 observed a dingo close by a red 4WD
sch4p3(3) Pre I saw the dingo pick something up and eat it near the passenger side of the car. I
drove up to the red 4WD and saw the dingo pick up a bread crust. I observed an adult female in
the front passenger seat, a very young child behind her and a slightly older child seated behind
the driver's seat. I got out of my vehicle and asked the female what she was doing feeding a
dingo. The female stated that her 18 month old child had thrown bread crusts out the window. I
explained the importance of dingoes not associating food with humans. She was very very
appologetic.

Additional comments and notes:

Action taken: Spoken to, recorded vehicle registration details, reported.

Comments **No food or rubbish had been stored in the tent.**

Detailed report of events:

On returning to camp on 2 occasions 16th @ 1500 and 17th @ 1530, it was noticed that something, probably a dingo, had torn holes in a tent at the camp site. The only thing taken was a board game, both times (photo).

There were no food items or anything else apparent in the tent that would have caused a dingo to rip in to the tent.

Additional comments and notes: On 16/4/14 at 2240, some cleaned plates were removed from a picnic backpack. They were dropped near by.

3 Dingoes were seen in the area. Tags were White & Red, Yellow & Beige (?) and one was seen to be green.

Action taken: Report taken

Comments

Detailed report of events: Whilst on patrol, myself and Ranger 7028641 observed a stationary Hilux by which a dingo (confirmed through ear tag to be GY13m) was scrounging around within 2m of the car. The adult female passenger at one stage as we were approaching the car had her hand draped outside the car window and the dingo was sniffing at the ground, although there was insufficient evidence to suggest that she had dropped the dingo any food. The woman began photographing the dingo as we pulled up alongside the vehicle and I exited our vehicle to talk to them, stopping them as they attempted to drive off. I asked them how long the dingo had been around for, and the woman replied "half an hour" and then I provided them with a quick dingo briefing (established that they were camping at Dilli Village and aware of illegality of feeding dingoes) and suggested that we are concerned about dingoes being nonchalant around vehicles due to the risk of vehicle strike and possibility of being thrown food, to which the male driver responded "that's why we were leaving" before they departed.

Additional comments and notes: GY13m very habituated and regularly sighted on Eurong beachfront

Action taken: Spoken to, recorded vehicle registration details, reported.

Proposed further action: Monitor dingo activity on Eurong beachfront, consider temporarily closure of One Tree Rocks and Wongai camping zones to mitigate dingo activity.

Comments

Detailed report of events: At 14:00 on the 18th April, rangers whilst patrolling the One Tree Camping area noticed a dingo going in and out of campsites. When the rangers approached the dingo is promptly ran up the sand dunes and sat down and watched. It was later discovered by the owners of the camps that the dingo had ripped into their tents and eaten all their chocolate Easter eggs.

Additional comments and notes: The dingo is most likely a member of the habituated Eurong pack.

Action taken: Interviews taken and a report generated and circulated. Dingo ranger notified.

Proposed further action: Continue camp briefings. Continue early morning and afternoon ranger patrols for compliance, community liaising, risk mitigation and monitoring purposes during the busy Easter holiday period.

Questionnaire: Specify visitor type camper	
Did they receive an information pack with their permits Yes	
Did they read the Dingo Brochure Yes	
Did the people follow 'dingo safe' messaging? (Ranger to assess) Yes	
Comments Campers not present at camp, no breach of dingo safe message detected at camp (all food secured - had been briefed)	

Detailed report of events: Whilst on patrol, ranger 7028026 and myself observed two dingoes loitering around a vacated campsite (van and gear present but no persons; all food and rubbish secured). The initial observation was from the beach 40m away, and on driving up the driveway of the camp one of the dingoes fled into the bush and thus remained unidentified (not sure of gender or if tagged) whilst the other dingo was curious of our vehicle and not wary of us. I was thus able to photograph and positively identify the dingo as BGB01f (confirmed through ear tag, scarring on face and pale fur coloration). The dingo fled into the bush within approximately 30 seconds of our vehicle being present.

Additional comments and notes: Photos of interaction attached

Action taken: Photographed and reported.

Proposed further action: Monitor activity, continue to brief camps in territory

Comments

Detailed report of events: GGG loitering around camps, walking through camps, walking close to people, laying on the beach, laying under parked vehicles, sitting next to vehicles having photos taken, chasing vehicles moving between camps from K'gari to Dundubara.

Additional comments and notes: Campers were all advised of this dingo and it's behavior and no incidents were reported.

Action taken: Report completed

Proposed further action: NRM dingo ranger to advise

Comments **Attempted unsuccessfully to discourage dingo by throwing sand at it**

Detailed report of events: Whilst on patrol, I observed GGPI13f within 1m of local resident and two other men who were worming with a bag filled with fish offal. The men were throwing small handfuls of sand towards the dingo in an attempt to discourage her. She would move off slightly but still maintain her interest in the group. On talking to sch4p3 it was determined that GGPI13f had been around them for a few minutes and he mentioned an interaction that had occurred 10 mins prior involving GGPI13f chasing/herding two girls (has been submitted as a Code D). On us leaving the scene, GGPI13f was still within a few metres of the men.

Additional comments and notes: Very habituated. Behaviour indicates possibly consistently fed. Unwary of QG vehicles or uniformed rangers.

Action taken: Interviews taken and a report generated and circulated. Dingo ranger notified.

Proposed further action: Monitor, continue morning and afternoon briefings in known territory.

Comments **Were not attempting to discourage dingo presence**

Detailed report of events: Whilst on patrol, we observed GY13m loitering around a group of men fishing and worming, often approaching to within 5m, demonstrating particular interest in their worming bag containing fish frames. The dingo would occasionally retreat and lie down on the wet sand feigning disinterest about 10m from the men. I spoke briefly to a member of the group who suggested that the dingo had been present for "a couple of hours".

Additional comments and notes: Dingoes around Eurong beachfront seem to be particularly interested recently in worming activity.

Action taken: Interviews taken and a report generated and circulated. Dingo ranger notified.

Proposed further action: Monitor, continue briefings on beach and patrols, consider temporary closure of Wongai and One Tree Rocks CZ.

Comments

Detailed report of events: During the afternoon of 19/04/2014 four tents were ripped into in a vacant campsite. Three tents did not have any food in them, the fourth had some vitamins stolen out by dingoes.

Additional comments and notes:

Action taken: Report completed and circulated.

Proposed further action: Continue patrols, including mornings and afternoons, in this area. Monitor behaviour of habituated dingoes frequenting this area.

Comments **No food or rubbish had been stored in the tent.**

Detailed report of events:

On returning to camp, it was noticed that a/some dingo/es, had torn holes in a tent at the camp site. Some paper towells, new in plastic were destroyed.

There were no food items or anything else apparent in the tent that would have caused a dingo to rip in to the tent.

Comments

Detailed report of events: Sometime between 02:00am and 07:00am dingoes gained access into an unsecured esky left out. Removed all food from the esky including several packets of ham, butter, bread, etc

Additional comments and notes: A no penalty (warning) PIN was issued.

Action taken: Report completed and circulated.

Proposed further action: Continue patrols, including mornings and afternoons, in this area. Monitor behaviour of habituated dingoes frequenting this area.

Comments

Detailed report of events: Ranger 7027522 reported that his back screen door had inadvertently not been secured overnight and on the morning of 22 April 2014 he realised that the bag of recyclable materials (primarily beer cans) had been stolen from his laundry floor and its contents strewn on the lawn. The dingo(es) responsible was neither heard nor sighted.

Additional comments and notes: I had observed an unidentified dingo passing between my house and ranger 7027522's house at 1820hrs on 21/4/14.

Action taken: Interviews taken and a report generated and circulated. Dingo ranger notified, all staff reminded of their responsibility to ensure that their residences are not accessible by dingoes, screen door checked to ensure functionality.

Proposed further action: Monitor dingo activity in local area

Comments **Rangers briefed him at barge and at camp.**

Detailed report of events: Camper advised ranger of a sighting of eight dingoes in the early morning, camper was woken by dingoes making noise around his camp at 0200, camper checked and said he counted eight dingoes "playing" around his camp, he watched until they left, when he got up he noticed that a easter egg had been interferred with. He commented on how vigilant he had been with food storage and had not issues in the past.

Additional comments and notes: Camper was reminded of his obligations and issued further information on dingo safety.

Action taken: Report completed

Proposed further action:

Comments

Detailed report of events: On patrol QPWS ranger 7028020 was informed that when two campers had returned to their camp on 21/4/14 from a day out they had found one of their swags was open and the contents of a bag were pulled out.

The visitors indicated that the fly wire had been zipped up and the canvas flap had been pulled up but not zipped. There were paw prints and scratch marks on the flywire, however no damage. It looked like the weight of the dingo had pulled enough that the zip had started to come open and the dingo has then pushed with enough force to unzip the fly wire. A bag was pulled out of the swag and the contents strewn around the vicinity. The bag contained one piece of chewing gum.

Additional comments and notes: Fly wire was intact but clear evidence of scratching was visible.

Action taken: Report taken, completed and circulated.

Proposed further action: Continue patrols in the area, including morning and afternoon. Monitor behaviour of known habituated dingoes in this area. Consider the closure of Wongai CZ if behaviour continues.

Comments

Detailed report of events: While on patrol ranger 7028020 noticed 3 dingoes running around chasing each other on Eurong beachfront. When they got closer it was observed that BWPi13f was approaching the rear of a vehicle that had the boot open. The dingo was observed sniffing the open car and preparing to jump up/into the vehicle. The QPWS ranger got out of the vehicle and yelled at the dingo, clapped their hands and walked towards the dingo to deter it from the vehicle.

The dingo moved away from the open boot, walked around the front of the car and came back towards the boot from the other side of the vehicle. The dingo was chased off again and it then started moving south along the beach. The owner of the vehicle approached from the water edge where he had been fishing and was asked to make sure that the rear of his vehicle was secured.

Additional comments and notes: Several other vehicles in the area were also spoken to in relation to leaving the rear of the vehicle open when they were on the water's edge fishing.

Action taken: Interviews taken and a report generated and circulated. Dingo ranger notified.

Proposed further action: Continue patrols and briefings in this area, including mornings and afternoons. Monitor behaviour of this individual and other habituated dingoes in this area.

Comments

Detailed report of events: While on patrol QPWS ranger 7028020 was observing three dingoes on the beach in front of Wongai Camp Zone. These dingoes were running around, chasing each other and play fighting in and around fishermen and visitors.

BWR13m and GY13m approached a milk crate being used by a fisherman to hold some gear. BWR13m stuck his head into the crate, the ranger drove towards the dingo honking the horn of the vehicle to try and deter the dingo from the crate. The dingo ran away from the crate with a sealed bag in his mouth. He moved away about 10m and dropped the bag at which time the fisherman informed the ranger that the bag held his head torch but the bag had been in contact with a bag of bait which he had in his hand. The dingo picked up the torch again and moved away about 20m, the QPWS ranger drove towards the dingo at which time the dingo dropped the bag and retreated enough that the fisherman could retrieve his torch.

As the fisherman returned to his crate he noticed that a dingo had his head in the crate again (identified as GY13m). He was chased away and the ranger told him he should put the crate in a vehicle away from the dingoes on the beach

Additional comments and notes: These dingoes had been observed for a while and a couple of other Code C interactions have been recorded.

Action taken: Report generated and circulated. Dingo Ranger notified.

Proposed further action: Continue patrols and briefings, including mornings and afternoons, in the area. Monitor the behaviour of the commonly seen habituated dingoes in this area.

Comments	

Detailed report of events: Ranger 7026936 observed some cars stopped next to Three dingoes interacting with each other on the beach. The ranger witnessed someone crouching down and approaching the dingoes within 1m, poking (what looked like) a stick in amongst the dingoes as they were play fighting.

The ranger intervened with vehicle and saw that the man was poking a "GoPro" on a 1m long pole underneath the dingoes. The man was asked to stop what he was doing and was warned that it is an offence to interfere with an animal such as a dingo that is capable of causing harm to people, on Fraser Island. He appeared to be surprised about this and evidently was not aware of any dingo safe messaging on Fraser Island.

The man was asked to move along in his vehicle after he had been briefed.

Additional comments and notes:

Action taken: Briefed sch4p3(3) P in relation to dingo safety. Early and late patrols were being carried throughout through this period until 27/4/14.

Proposed further action: Continue dingo briefing and patrols

Faxed/emailed date: 29/4/14 **Reporting Officers details:** 7026936

Comments

Detailed report of events: While on patrol ranger 7027330 in the vicinity of Yidney Rocks a dingo positively identified as GGPI13f was seen heading south. The dingo saw a man and woman worming on the beach and headed straight to them. At first the wormers tried to ignore the dingo but it came in closer lifting its head. The wormers kicked sand at the dingo which backed off a short distance. At this point the ranger drove up and threw sand at the dingo and chased it away. The wormers were briefed and told to actively deter dingoes.

Additional comments and notes: This dingo is regularly seen in this area and is difficult to deter.

Action taken: Brief wormers and other fishermen in area, report generated

Proposed further action: Continue patrolling and briefing regime, monitor animal.

Comments

Detailed report of events: Ranger observed GGPI13f soliciting food from Two fishermen and a woman who was standing with them. The dingo was approaching within 2m then would be chased away repeatedly by the people. The dingo would persistently return and when one of the fishermen would hook up on a fish the dingo would dart in at speed to try to take the fish from the line in the water. Ranger also attempted to deter the dingo by chasing it away and throwing sand at it. This was effective until the ranger was driving away who noticed the dingo return to the fishermen again.

Additional comments and notes: GGPI13f persistently loiters around fishermen in this area. The interactions between people and GGPI13f have recently escalated to code E.

Action taken: briefed fishermen, and congratulated them on making a concerted effort to deter the dingo. Early and late patrols were occurring through this period.

Proposed further action:

Comments

Detailed report of events: While on patrol ranger 7027330 saw a dingo loitering around a group of fishermen at Cathedrals beachfront. On approaching the dingo was positively identified as GGG13M a dingo that frequents the area. It was observed that every time a fisherman hooked and reeled in a fish the dingo approached nose in the air. The fishermen were actively discouraging the dingo but it would simply back off 5 to 10m and return. The ranger then threw sand and yelled at the dingo which the moved south about 50m and went to sleep. The fishermen were briefed and advised to continue actively deterring the dingo.

Additional comments and notes: This dingo is highly habituated with recent reports of it being feed, from its behaviour around fishermen it seems it is used to acquiring food from that source. The animal is not reported to have displayed aggression at this stage however its behaviour is deteriorating. This dingo is also often found asleep on the beach during the day leaving it open to potential car strike.

Action taken: Fishermen briefed, RIC informed, report generated.

Proposed further action: Monitor animal, continue briefing regime

Comments

Detailed report of events: Ranger 7026936 was providing a dingo briefing to sch4p3(who is a guest at the Yidney rocks apartments. sch4p3(mentioned that he witness a white, late model, Hilux pull up next to GGPI13f and throw items of food out the window. The dingo then proceeded to eat all of the food that the occupants of the vehicle threw out.

Additional comments and notes: sch4p3(did not record the registration of the vehicle. This dingo is a part of a known habituated pack in the area and has been involved in several recent code C, D & E interactions.

Action taken: Currently, patrols are being undertaken early morning and late afternoon to monitor the behaviour of GGPI13f and provide dingo briefings to visitors in the area. Regular liaison is occurring with all accommodation managers and guest in the area and all people are encouraged to record details of any feeding of dingoes.

Proposed further action:

Comments

Detailed report of events: Ranger observed GY13m soliciting food from a vacant camp site. The dingo was sniffing around under the tarp of a camp in OTR CZ. The dingo was deterred by ranger 7026936 and continued patrolling through the camp zone.

Additional comments and notes: GY13m is part of a known habituated pack in the area.

Action taken: Deterred dingo and circulated report.

Proposed further action: Continue patrols in area to brief camps with regard to food security.

Comments

Detailed report of events: While on patrol QPWS Ranger 7028020 observed BRG13m (positively identified from tag and photographs) loitering around a group of fishermen at Yidney Rocks Beachfront. BRG13m was hanging around within 10m of the group, when chased away, would only move off to about 20m before getting close again.

He spent about 3mins sniffing around a fishing rod that was in a holder on the beach before circling the group and their cars again.

After being chased off again (yelling, clapping hands) for a third time he slowly started making his way south along the beach.

Additional comments and notes: During this interaction a RBAC tag-along tour drove through the area - one of the cars was forced to stop as BRG13m continued walking from the water to the dunes right in front of the car without stopping.

Action taken: Report completed & circulated.

Proposed further action: Continue patrols & briefings in this area, including mornings and afternoons. Monitor behaviour of all known habituated dingoes in this area. Continue with campground closures between Poyungan & Eli.

Comments

Detailed report of events: sch4p3(3) Prejud sch4p3(3) Prejudic nd sch4p3(3) Prejudice were camping in Gurruman Camping zone (Eastern beach Fraser Island) on the 05.05.14. At 1640 in the afternoon sch4p3 and fellow campers noticed a dingo walk passed their camp out onto the beach in front of their camp. sch4p3 was trying to take photos of the dingo when two vehicles stopped near the dingo.

A Dark Ford Ranger Dual cab with canopy Registration plates: sch4p3(3) Prejudi
Travelling with a Maroon dual cab with canopy.

The lady from the Ford ranger initially got out of the vehicle and got within a very close range to take photographs of the dingo. Soon after this sch4p3 noticed that both the lady and man (driver of ford ranger) appeared to be feeding the dingo. Photos of this action were taken by sch4p3. The people remained in the area for a five to ten minute period and then decided to leave.

Additional comments and notes: From photos dingo identified as GGG13M

Action taken: Photographs obtained and circulated, report generated, Information forwarded to Compliance unit.

Proposed further action: Prosecute offenders.

Comments

Detailed report of events: Ranger 270330 was patrolling Nth past Cathedrals beachfront as a group of fishermen were approached two dingoes were seen loitering in the area. The dingoes were Identified as GGG13M and RBW13F. While speaking to the fishermen both dingoes were seen approaching fishermen as they caught fish lifting their heads.

Additional comments and notes: These dingoes show no aggression at this stage they are very difficult to deter however.

Action taken: Brief fishermen to deter these animals, NMU RIC informed, report generated

Proposed further action: Breif fishermen and camps, monitor animals

Comments

Detailed report of events: While looking on Instagram the photo below was seen posted by **s.68(4)(c) Copyright**
s.68(4)(c) Copyright infringement. infringer

This photo looks to have been taken using a phone which would mean the photographer was within very close proximity of the dingo.

Additional comments and notes: **s.68(4)** has been spoken to on numerous occasions about his behaviour around dingoes, especially the habituated pack around Oaks/Yidney.

Action taken: Report generated. RIC informed.

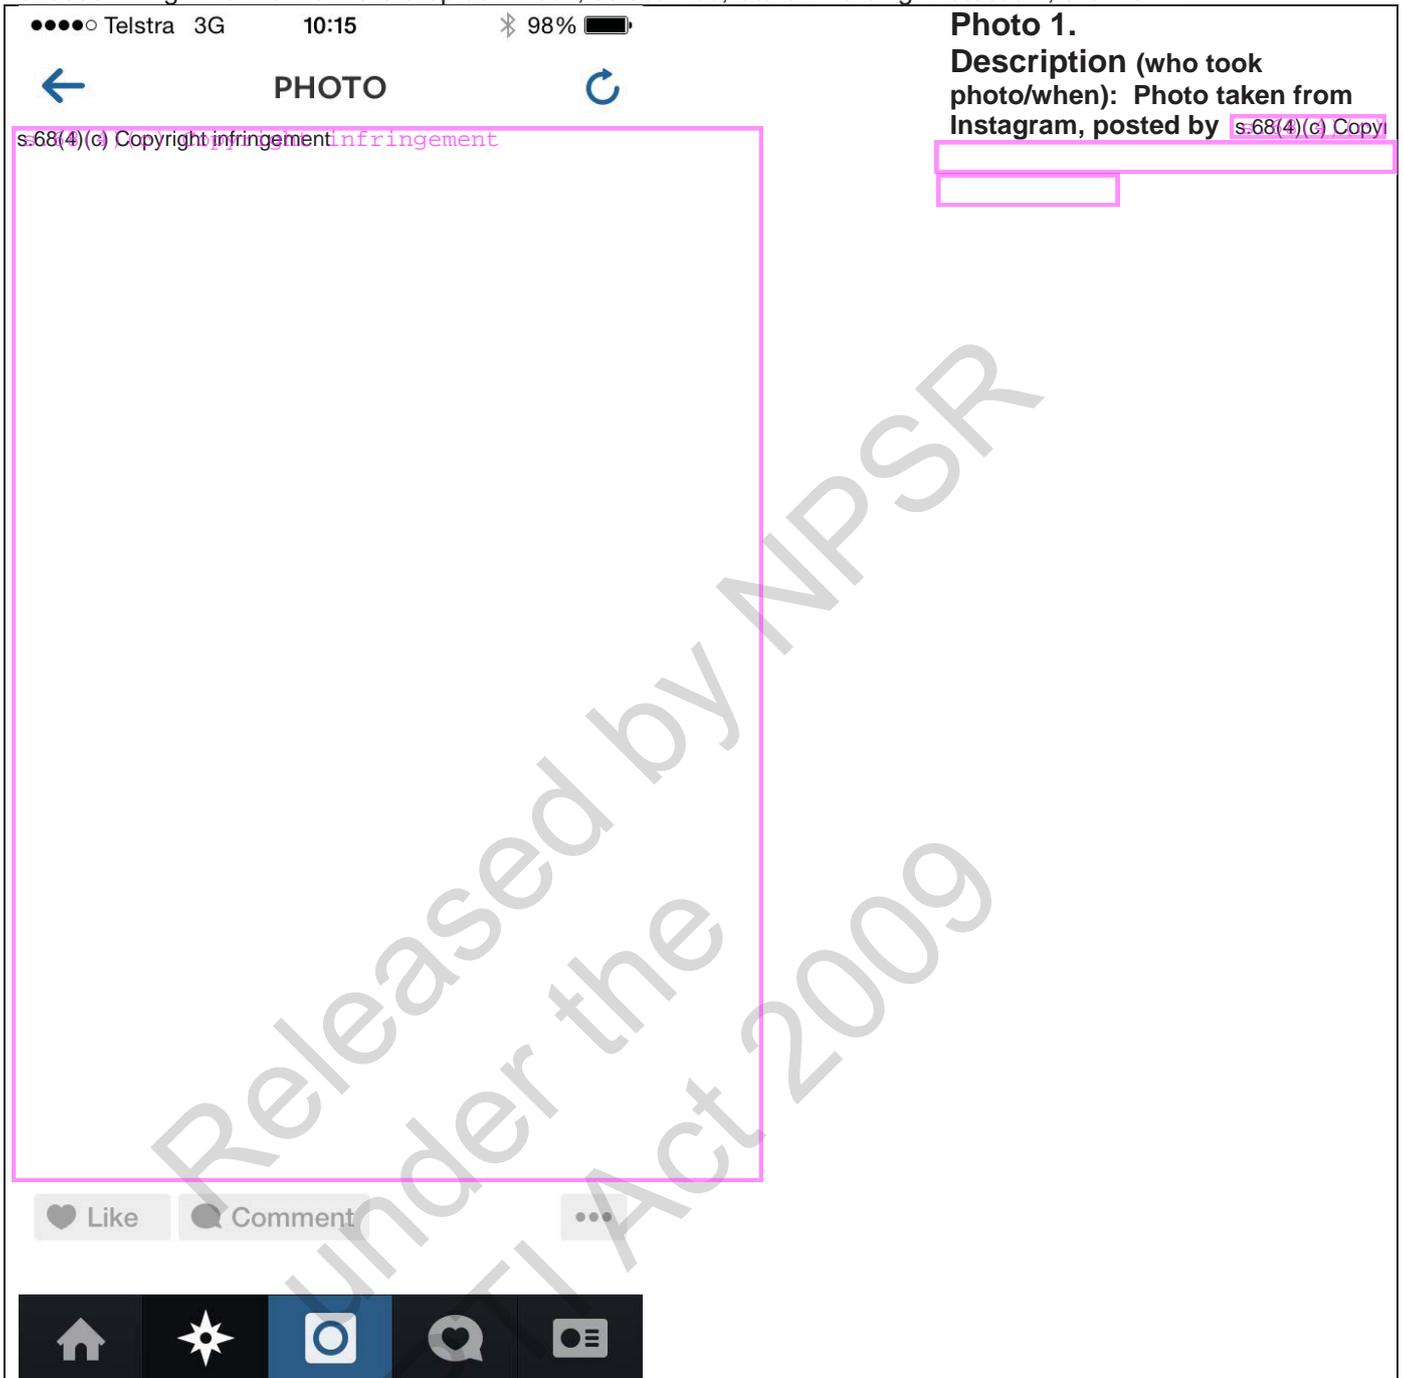

Proposed further action: Follow up with **s.68(4)(c) Copyright** and **s.68(4)(c) Copyright** regarding posting of photos showing inappropriate dingo interactions which may encourage visitors to undertake similar behaviour.

Comments **Should have discouraged dingo**

Detailed report of events: Whilst briefing a camp at the northern end of Wongai camping zone, ranger 7027308 noticed a dingo sleeping on the dune approximately 15m from the camp. Upon finalising the information provision to campers, ranger 7027308 ran slowly towards the dingo, waking it up by clapping our hands and yelling at it. We confirmed the identity as BWR13m through an ear tag in its left ear. BWR13m moved slowly to the base of the foredune, yawned and slowly sauntered southwards.

Additional comments and notes: Dingo was not wary of QPWS uniform at all.

Action taken: Moved along by rangers, encouraged campers not to allow them to loiter.

Proposed further action: Consider temporary closure of Wongai camping zone, particularly if a litter of pups occurs adjacent this season.

Comments **Was walking alone with a stick**

Detailed report of events: Whilst on patrol, ranger 7026466 and myself noticed local resident sch4p3(3) Prejudice walking along the beach carrying a stick sch4p3(3) Prejudice the protection of an individuals right to privacy. We stopped and chatted to her for approximately 5 minutes, and as we were leaving we came across GGPI13f 100m north on the beach. We photographed GGPI13f to confirm her identity and stopped to observe her behaviour (as sch4p3(3) F continued north along the beach towards us). GGPI13f became interested in sch4p3(3) F and began to follow her at a distance of between 5 to 10 metres for a couple of minutes before a vehicle pulled up and the occupants began to speak to sch4p3(3) F and a Fraser Explorer Bus driven by sch4p3(3) Prejudice also pulled up to allow his clients to photograph the dingo. GGPI13f was not wary of rangers or QG vehicle. As we again moved away, GGPI13f continued to stand and then sit on the beach within approximately 10m of sch4p3(3) F. GGPI13f eventually lay on the sand in this same location and did not follow sch4p3(3) F when the car drove off and she continued to walk northwards. A male and female couple carrying a stick walked out of Happy Valley township and then south along the beach and GGPI13f showed no interest in them. We lost sight of GGPI13f as she appeared to head towards the foredunes/coffee rocks west of where she had been lying.

Additional comments and notes: sch4p3(3) P reported two earlier interactions with an unidentified dingo at the Yidney Rocks beachfront (separate code Cs)

Action taken: Reported

Proposed further action: Monitor, continue closure of adjacent camping zones to mitigate risk, consider temporary closure of camping zones where litters are identified/present.

Comments **Long term resident of Fraser Island**

Detailed report of events: While on patrol QPWS Rangers spoke to a local resident regarding the following interaction. A juvenile dingo was following **sch4p3(3)** whilst she was walking alone on the beach. The dingo approached her several times from behind to within 1 metre and was eventually smacked by a stick. The dingo took off.

Additional comments and notes: Rangers were in the vicinity around 15:00 and observed GGPi13f in the area. **sch4p3(3) Prejudice the protection of an individuals right** bag that was noisy in the breeze and did not contain food inside. This may have caused the initial attraction to her.

Action taken: Report completed & circulated.

Proposed further action: Continue patrols & briefings in this area, including mornings and afternoons. Monitor behaviour of all known habituated dingoes in this area.

Comments **Part of a family of long term residents of Fraser island**

Detailed report of events: While on patrol QPWS Rangers spoke to a local resident regarding the following interaction. A juvenile dingo was hanging around [sch4p3] and [sch4p3(3) Prejudice the p] while they were fishing. The dingo approached them several times from behind and was eventually smacked by their fishing rod to deter it. The dingo sat down and watched from a short distance then moved on. The dingo was described as part of the local Oaks family pack. The interaction was reported as approximately 5 minutes in total.

Additional comments and notes: Rangers were in the vicinity around 15:00 and observed GGPi13f in the area.

Action taken: Report completed & circulated.

Proposed further action: Continue patrols & briefings in this area, including mornings and afternoons. Monitor behaviour of all known habituated dingoes in this area. Continue with campground closures between Poyungan & Eli.

Comments **Not sure if resident - vehicle seen a number of times on the island**

Detailed report of events: Ranger observed BY13m on several occasions in the vicinity of a silver Landcruiser sch4p3(3) Pr The owners were fishing and the dingo was sitting in the vicinity watching them. It loitered around their vehicle in a non threatening manner. The owners were approached by ranger and advised they did not have any issues with this dingo but a dingo took their worming bag the day before.

Ranger observed this dingo around the vehicle and owners on or around 9:45 am, 11:10am (on return trip), 13:30 and after 15:00pm. The same dingo was still loitering at the vehicle.

Additional comments and notes: Dingo did not display threatening behaviour.

Action taken: Report completed & circulated.

Proposed further action: Continue patrols & briefings in this area, including mornings and afternoons. Monitor behaviour of all known habituated dingoes in this area.

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **No**

Did they read the Dingo Brochure **No**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **No food in tents food secured, most had camped on the island before.**

Detailed report of events: The group arrived to the campsite at approx. 1800 and began to set up camp two dingoes began loitering around. One described as a male in good condition and the other as a smaller dingo, neither could be confirmed as tagged. The campers chased them off on a couple of occasions and found them hard to deter. A short time later on of the campers noticed that a bag had been removed from his tent. The bag was found a short distance away torn open, some items missing.

Additional comments and notes: Latter that evening a Code D tent rip occurred at this site. GGG13M has been sighted in this area outside his normal pack boundary.

Action taken: Briefed campers, Report generated.

Proposed further action: Patrol, monitor and brief area.

Comments

Detailed report of events: Whilst driving back to base 7027130 observed GGM eating a fish frame three meters away from fishermen cleaning fish. 7027130 spoke to the fishermen who said that the dingo had retrieved the fish from out of the water, 7027130 warned them that it was an offense to feed or leave food available for dingoes, instructing them to bury their fish offal.

7027130 arrived in a separate vehicle shortly after and observed GGM loitering directly behind fishermen still fishing for several minutes until 7027130 left the scene. The fishermen were digging a hole to bury their fish frames at this time.

Additional comments and notes: 7027130 believed that the dingo was fed but did not witness it.

Action taken: interaction report

Proposed further action:

Comments

Detailed report of events: At approx. 1130hrs ranger 7027330 was patrolling south past Wyuna CZ when a dingo was noticed loitering around some fishermen. One of the fishermen was disposing of unwanted live pippies this had attracted the attention off the dingo. The dingo was positively identified as GGG13M from his ear tag. The fishermen were briefed and told to bury the pippies. At this point the ranger chased the dingo away by throwing wet sand at the animal. The dingo retreated 100m down the beach layed down and went to sleep.

Additional comments and notes: This animal displays no aggression at this stage and is regularly seen during the day on the beach sleeping, this activity could lead to a car strike as this animal shows no fear of vehicles and approaches them. The dingo was also outside its normal pack boundary.

Action taken: Report generated, Briefed fishermen.

Proposed further action: Monitor animal, continue briefing

Comments

Detailed report of events: Untagged Female dingo most likely a subadult (photos shown to rangers 7027816 and 7027130), was loitering around their campsite, possibly attracted by BBQ breakfast. Dingo continued to hang around for several hours at one point following the family as they went for a walk along the creek.

Additional comments and notes: Three families camped together. Only ones present at Awinya on Saturday. Had arrived previous evening.

Action taken: 7027816 and 7027130 briefed campers on dingo safety, including taking taking their rubbish to the WTS. Some rubbish bags had been tied in trees, although overall camps where tidy.

Proposed further action: Continued monitoring of area

Comments

Detailed report of events: 7027130 returned from filling water tanks to find dingo loitering around tourists parked in the carpark at lake allom. The dingo was there for approximately 10 minutes while 7027130 briefed them on dingo safely. The dingo was scared away by 7027816 as he reversed back down to the carpark following other duties.

Additional comments and notes:

Action taken: interaction report briefed campers.

Proposed further action: monitoring of area

Questionnaire: Specify visitor type **Independent**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **They allowed the dingoes to get close and did not deter them. They crouched down to the dingo's level to take photos.**

Detailed report of events: Whilst investigating the report of a Code E interaction (see separate report), ranger 7028020 was informed of this interaction:

[sch4p3(3) Prejudice the protection of a] was driving south along the beach around Wongai CZ when she noticed two dingoes very close to two visitors. As she got closer she observed that the visitors were not deterring the dingoes, and were crouching down to take photos. The dingoes were within 1m of the visitors and appeared to be sniffing their clothes on several occasions.

[sch4p3(3) Prejudice the protection of an individuals right] proceeded to film some of the behaviour, before exiting her vehicle and approaching the visitors. [sch4p3(3) Prejudice the protection of an individuals right] and asked the visitors if they could get into their vehicle as the behaviour shown by the dingoes and themselves was inappropriate. She explained the dingo safe messaging and the visitors advised that they had been dropped off by some friends who had gone fishing and they didn't have a car.

Ranger 7028020 spoke to the visitors [sch4p3(3) Prejudice the protection of an individuals right] and they mentioned that they had walked from their campsite to the beach to take photos of the sunset and two dingoes had approached them. The dingoes had not got closer than 1m and they never felt threatened by them. [sch4p] mentioned that the dingoes had started to 'play' with [sch4p3(3) Prejudice the protection of an individuals right] as she spoke to them (see separate Code E report).

Ranger 7028020 spoke with [sch4p] on 26/05/2014 in a follow up interview and [sch4p] said that if the [sch4p3(3) Prejudice the protection of an individuals right] had not filmed the interaction they would not have reported anything as they did not feel threatened at all and were not worried about the behaviour of the dingoes.

Additional comments and notes: Follow up interviews conducted on 26/05/14 over the phone.

Action taken: RIC NRM informed (as part of several interactions occurring at the same time). [sch4p] & [sch4p3] and [sch4p3(3) Prejudice the protection of an individuals right] interviewed. Footage obtained from [sch4p3(3) Prejudice the protection of an individuals right]

Proposed further action: Continue monitoring behaviour of habituated animals in this area. Continue patrols around the area. Consider the closure of Wongai CZ while habituated behaviour is being displayed.

Comments **Has been coming for 40-50 years**

Detailed report of events: While fishing approx. 2km south of Wongai CZ [sch4p3(3) Prejudice the] had two dingoes loitering around and soliciting food. [sch4p3(3) Prejudice the] were fishing for 4 to 5hrs and several times during that time the dingoes would approach [sch4p3(3) wife] ([sch4p3(3) Prejudice th] while she was in the water and sniff her bait bag. They also came very close when she caught any fish, and were not easily deterred (yelling, kicking water).

The dingoes would also retreat just above the water's edge and lie on the sand for periods of time watching the couple.

Additional comments and notes:

Action taken: Interaction reported and circulated.

Proposed further action: Continue patrols and monitoring of habituated behaviour in this area. Consider the closure of Wongai CZ while highly habituated dingoes are displaying this behaviour.

Comments

Detailed report of events: After a reported Code E interaction, sch4p3(3) Prejudice the protection of an in was waiting for QPWS staff and observing the behaviour of GY13m around a campsite in Wongai CZ. She observed the dingo start to sniff at and jump at a tent so started filming the dingo.

The footage, obtained by QPWS, shows GY13m chewing on a guide rope, jumping up and grabbing the fly (ripping it) and then moving around the tent to the front where it jumps onto the tent and rips the front open to gain access.

The dingo enters the tent and is inside for approx 1min before exiting with a bag in his mouth. GY13m then drops the bag in front of the tent and proceeds to eat out of it before picking it up and moving back behind the dunes out of site.

Shortly after the dingo moves on sch4p3(observes sch4p & sch4p (previous Code C report) return to their campsite, enter the tent, remove some of their belongings and start to pack up their campsite.

sch4p3(approached sch4p & sch4p and let them know that a QPWS ranger would be coming down soon to talk to them about the dingoes.

Ranger 7028020 spoke with sch4p & sch4p regarding a previous Code C report, however they did not mention the tent rip to the ranger. sch4p & sch4p had packed up and left before the interview with sch4p3(has been completed.

A follow up discussion was had with sch4p on 26/05/14 over the phone:

sch4p admitted that their tent had been ripped into and the dingo has stolen a bag of peanuts. They didn't believe that the dingoes would be attracted to peanuts. sch4p also mentioned that if the sch4p3(3) Pre hadn't been there and spoken to them they would not have reported the interactions as they did not feel threatened at any time and were not worried.

Ranger 7028020 explained that it was important for QPWS to know when interactions occur so we can monitor the behaviour of dingoes in the area and ensure all visitors are aware of the dingoes and their behaviour.

Additional comments and notes: Follow up interview conducted on 26/05/14 over the phone.

Action taken: RIC NRM informed (as part of several interactions occurring at the same time). sch4p & sch4p and sch4p3(interviewed. Footage obtained from sch4p3(3)

Proposed further action: Continue monitoring behaviour of habituated animals in this area. Continue patrols around the area. Consider closure of Wongai CZ if habituated behaviour continues.

Comments **Regular visitors and locals – been coming here for 40-50 years**

Detailed report of events: sch4p reported being "harassed" by three dingoes when she was fishing over a number of days (husband sch4p3(nearby). sch4p3(3) Prejudice the protection of an individuals right to pri and didn't feel confident reeling in her catch without her husband standing alongside her due to the proximity and interest shown by the dingoes. sch4 usually likes to walk along the beach when she visits Fraser Island but has expressed her reluctance to do so on this trip due to the dingo activity. One of the dingoes was within a metre of her at one stage, sniffing at her bait bag over her shoulder.

Additional comments and notes: sch4p3 described the dingo behaviour as being the worst that he's encountered in his 40-50 years of visits. Multiple tent rippings at this camp – generated as a separate code C.

Action taken: Reported, reiterated dingo safe messaging.

Proposed further action: Temporary closure of One Tree Rocks and Wongai CZ to mitigate current activity.

Comments **Regular visitors and locals – been coming here for 40-50 years**

Detailed report of events: Campers reported that over three days, unknown dingo(es) ripped four large (>1m) holes in their tent whilst they weren't present at their camp. On the first occasion, a 2L long life milk was ripped open within the tent, afterwards no food was kept within the tent, but the rippings continued until the tent was actually left open for inspection by having the doors pinned back over following days. A dingo had chewed through a power lead used for lighting until the plug was detached from the lead, and the plug on the light was chewed on also.

Additional comments and notes: Dingoes reported to be regularly visiting camp but usually discouraged by being threatened by a stick held over head or being chased off. Dingoes reported to have a "green tag" and a "red tag" but no ears specified, and a third (smaller) dingo. Dingoes were also harassing sch4 when she was fishing on the beach (separate Code C generated).

Action taken: Reported, reminded campers of food security obligations and penalties.

Proposed further action: Temporary closure of One Tree Rocks and Wongai CZ to mitigate current activity.

Comments **Has been coming for 40-50years**

Detailed report of events: After returning from fishing south of Wongai sch4p3(3) Prejudice the p found that their tent had been ripped into in two places.

The dingo(es) had ripped through the fly at the front of the tent, then through the side of the tent under the fly.

There were two casks of wine and 2 2l UHT milk containers inside the tent. The milk containers had been punctured and the milk had leaked out, the wine casks were untouched.

Additional comments and notes:

Action taken: Interaction reported and circulated.

Proposed further action: Continue patrols and monitoring of habituated behaviour in this area. Consider the closure of Wongai CZ while highly habituated dingoes are displaying this behaviour.

Comments **Regular visitors**

Detailed report of events: Campers reported that a dingo(es) had stolen tomato sauce from atop their table inside the awning of the camper trailer, that had been inadvertently left open overnight.

Additional comments and notes: Campers also reported regular dingo activity around their camp and on the beachfront, describing behaviour as 'not aggressive'.

Action taken: Reported, reminded campers of food security obligations and penalties.

Proposed further action: Temporary closure of One Tree Rocks and Wongai CZ to mitigate current activity.

Comments No one spoken to - FITs, Tag-alongs and CTO passengers present at site at the time.	

Detailed report of events: Whilst cleaning portaloos on the Eli Creek beachfront I observed a tagged sub-adult female dingo (unable to determine tag colours) sniffing around the Eli car parking area (amongst visitors and vehicles). The dingo was not interested in approaching people, although people approached her to within 10m to photograph her. She was not wary of QG vehicle when I drove within 30m of her when heading off.

Additional comments and notes:

Action taken: Reported.

Proposed further action: Monitor activity in beachfront area.

Did they read the Dingo Brochure **no**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **yes**

Comments **Had done pre-visit reading online**

Detailed report of events: Campers reported a ripped tent (through screen and floor liner), discovered when they returned from fishing in front of their camp. Dingo(es) had removed a pillow and bed linen from within the tent. There was no food stored within the tent. A heavy, large bag containing fishing tackle had also been dragged 5m and teeth marks were evident in the canvas.

Additional comments and notes: All food was secured appropriately at the camp; a recent spate of tent rippings has been prevalent at One Tree Rocks and Wongai CZs. Men suggested that three dingoes were regularly sighted around their camp – yellow/green tag in left ear (GY13m); red/white tag (possibly BWR13m), and a third dingo described as having “spots on its nose”. Three dingoes were also around the men when they were fishing – a female ranger stopped and spoke to them on this occasion.

Action taken: Reported

Proposed further action: Temporary closure of One Tree Rocks and Wongai CZ to mitigate current activity.

A heavy, large bag containing fishing tackle had also been dragged 5m and teeth marks were evident in the canvas.

Additional comments and notes: All food was secured appropriately at the camp; a recent spate of tent rippings has been prevalent at One Tree Rocks and Wongai CZs. Men suggested that three dingoes were regularly sighted around their camp – yellow/green tag in left ear (GY13m); red/white tag (possibly BWR13m), and a third dingo described as having “spots on its nose”. Three dingoes were also around the men when they were fishing – a female ranger stopped and spoke to them on this occasion.

Action taken: Reported

Proposed further action: Temporary closure of One Tree Rocks and Wongai CZ to mitigate current activity.

Comments **Intentional feeding of wildlife**

Detailed report of events: On the 12/06/14 [sch4p3(3) Prejudice the protection of an individ] reported a possible dingo feeding interaction to QPWS. Ranger 7028018 investigated the reported interaction.

On the 3rd June 2014 at approx. 13:00, a guest (identity unknown) staying at Second Valley came into the Eurong bakery visually upset. The guest reported to bakery staff [sch4p3(3) Prejudice the p] that he had just witnessed a tall, slim man wearing a [sch4p3(3) Prejudice] and a white hat on the beach, encouraging and feeding a dingo bread so he could take its picture. The man reporting the interaction was upset because he was concerned about the long term implications of feeding and his 2 year old daughters safety.

Additional comments and notes: The man feeding the dingo was identified as a new [sch4p3(3) Prejudice th] staff member, however this will be further investigated in collaboration with [sch4p3(3) Prejudice] management.

Action taken: Reported interaction investigated. Report generated and circulated. RIC notified.

Proposed further action: Continue further investigation and respond accordingly.

Comments

Detailed report of events: Ranger 7027330 was briefing a camp in Eugarie CZ when fishermen were seen chasing a dingo away from where they were fishing. On closer inspection the dingo was identified as BWY13M. The fishermen were spoken to and said the dingo was not displaying any aggression however it was very difficult to deter. The fishermen were asked to continue chasing the dingo away. At this point the dingo had moved approx. 50m up the beach and layed down.

Additional comments and notes: At this stage the animal is displaying no signs of aggression, however is highly habituated. Seems to be copying GGG13M his deceased sibling's behaviour.

Action taken: Briefed fishermen, RIC NMU informed, Report generated

Proposed further action: Continue briefings, Monitor animal

Comments

Detailed report of events: At 1330 on the 5/6/14 the Eurong resort reported a sighting of a dingo inside the fence to the Eurong QPWS office. Ranger 7026936 was able to confirm this report, as dingo tracks seen crossing the front vehicle grid. Enough sand had built up in the middle of the grid to allow the dingo to gain access over it.

Ranger 7026936 opened the vehicle gate near the beach bar as this area tends to be frequented when dingoes are inside the Eurong fence. The dingo was released at 1430.

Additional comments and notes: Resort staff were notified of the dingoes release immediately and thanked for their prompt report.

Action taken: Dingo released and excess sand dug from all grids around Eurong township. Fence inspection was carried out and grid wires were tested and working

Proposed further action: Complete regular checks of sand build up especially in the high use vehicle access grids to Eurong and Happy Valley townships. Timely clean out crucial as fence breaches are usually avoidable and are resource intensive.

Comments **After reading brochures packed food and rubbish into vehicles**

Detailed report of events: sch4p3(3) party arrived at Burad CZ set up camp and then read the supplied brochures on dingo safety. Prior to reading the information they had their food stored in canvas camp cupboards, they then packed the food away in their vehicles. Later in the evening the party went down the beach to fish. At approx. 2200hrs the party returned and found a dingo dragging a bag containing clothes and personal items away from the camp, the unidentified dingo was chased off and the bag retrieved. On inspection of the camp a tent was found to have been torn open and the air mattress damaged.

Additional comments and notes: A similar incident occurred in Wyuna CZ earlier the same evening. BBR10M has been seen in the area and is a known tent ripper.

Action taken: Interview conducted, RIC NMU informed, report generated

Proposed further action: Monitor area; continue briefings of all camps in area.

Comments **Should have discouraged the dingo when first seen.**

Detailed report of events: sch4p3(3) and her partner were cooking in the camp kitchen. They had noticed a dingo with an orangey tag loitering around the area, they ignored the dingo. On finishing dinner they were packing up, when they turned their backs to gather the cooking equipment the dingo jumped on the table and ran away with a loaf of bread.

Additional comments and notes: sch4p3(3) was informed that they should have discouraged the dingo as soon as it was seen loitering in the area. 2Y06F, ORW09M, RBW13F, BWY13M and an untagged Juvenile male have been sighted in the area at times inside the fence line. Until the grids are energised and the dingoes removed from the compound this will continue being an issue.

Action taken: RIC NMU informed, briefed camps in Cathedrals, report generated

Proposed further action: Monitor activity, brief campers, Energise grids ASAP, remove dingoes from fence line,

Comments

Detailed report of events: sch4p3(3) and his young son were walking back from the toilet when they noticed a dingo following them. They kept their eyes on the animal and continued to walk toward their campsite. The dingo continued to follow and closed the distance between them to 1m at this point sch4p3(3) shone the torch he was carrying in the dingo's eyes. At this point the dingo ran away.

Additional comments and notes: .2Y06F, ORW09M, RBW13F, BWY13M and an untagged Juvenile male have been sighted in the area at times inside the fence line. Until the grids are energised and the dingoes removed from the compound this will continue being an issue.

Action taken: RIC NMU informed, briefed camps in Cathedrals, report generated

Proposed further action: Monitor activity, brief campers, Energise grids ASAP, remove dingoes from fence line,

Comments **Had reported all food and rubbish was stored in their vehicle.**

Detailed report of events: sch4p3f and his partner had set up camp and went down the beach to fish. An unidentified dingo was seen trotting along the beach sniffing, the dingo then went up into the dunes and was lost sight of. sch4p3f was not concerned as the camp area had no food available. On returning to their camp they found their tent ripped, the blow up mattress torn and some of their belongings moved around inside the tent. They tidied up their camp, on dark an unidentified dingo was sighted around their camp. At this stage they decided to pack up and move to Cathedrals Resort.

Additional comments and notes: sch4p3f and his partner were confused as to why the dingo accessed their tent as they had complied with all instructions and had no food available. They had camped at Sandy Cape with no incident. It was explained that it may have been a curious juvenile or smells that had been generated while camping may have caught the dingo's attention.

Action taken: NMU RIC informed, report generated

Proposed further action: Patrol and brief in area, monitor dingo activity.

Comments Had left camp free of food sources the containers were new and empty.	

Detailed report of events: sch4p3(3) and her partner set up camp and packed all food in their car as advised by resort staff. At 0800 they left camp for the day, on their return plastic containers left in front of their tent were found to be damaged. On speaking to other campers they were informed that three dingoes had been seen in the area of their tent. One had been seen trying to drag away a 10L water container.
--

Additional comments and notes: 2Y06F, ORW09M, RBW13F, BWY13M and an untagged Juvenile male have been sighted in the area at times inside the fence line. Until the grids are energised and the dingoes removed from the compound this will continue being an issue.

Comments

Detailed report of events: Rangers 7027330 and 7027816 were patrolling north on the beachfront of Yuru CZ when a dingo was seen lying near a vehicle on the beach. The rangers pulled up to the vehicle and identified the dingo as BWY13M. The dingo was chased away by ranger 7027330. The campers who were at the vehicle were cleaning fish and explained they had been chasing the dingo away but it continued to return. The campers were advised to continue chasing the dingo away and to dispose of the fish frames in the required manner. When the rangers drove off the dingo was still in the area.

Additional comments and notes: This dingo is highly habituated and is demonstrating similar behaviours to GGG13M his deceased sibling.

Action taken: Report generated

Proposed further action: Monitor animal, continue camper briefings

Comments

Detailed report of events: The party had been out fishing for the afternoon on their return they found their tent ripped again in a different spot (this camp had a tent rip on the evening of the 6th). Nothing else in the camp had been disturbed and nothing was taken from the tent.

Additional comments and notes: This is the 3rd incident in two days for this camp. A dingo described as a male with an orange/red tag with a high front sock was seen on the beach the afternoon of this interaction. The description is consistent with BBR10M as is this behaviour.

Action taken: Interview conducted, RIC NMU informed, report generated

Proposed further action: Monitor area; continue briefings of all camps in area.

Comments

Detailed report of events: While patrolling through the top campground in Cathedrals Resort rangers 7027330 and 70227816 saw three dingo's trotting from the west through the camp area. The dingoes were positively identified as 2Y06F, RBW13F and an untagged juvenile. The dingo's trotted across the camp area toward the eastern perimeter fence.

Additional comments and notes: The grid at Cathedrals has not been energised; the Dundubara pack has been accessing the Resort via the grid. The personal gate has been wired open until the grid is wired and energised. For future reference the perimeter fence should not be closed until the grid is active.

Action taken: Wired gate open, report generated.

Proposed further action: Patrol area, brief camps, energise grid ASAP.

Comments **The day after their food was taken these campers left their campsite with a bag of onions, apples and bread unsecured in the annexe of their tent (they indicated they "didn't think dingoes would eat that") .**

Detailed report of events: * Campers returned to their tents at approximately 2:30pm to find multiple food items on the ground in the vicinity of their tents.

* It was evident that a dingo/es had gained entry to the front/annexe section of their tent and opened their fridge and subsequently removed numerous items of food.

* The tent annexe had been ripped in two places.

* The latch on the fridge was actually quite difficult to access and undo. The group of campers had no understanding that it would be possible for a dingo to attempt this.

* The campers had booked their permits through Manta Ray barges and received a small format "Dingoes can be dangerous" flier in addition to a FIVG.

* The group acknowledged that they had not read the information contained in these publications.

Additional comments and notes:

Action taken: Code C Interaction Report completed and emailed to distribution list

Proposed further action: Refer to NRM for action

Comments **Permits obtained at Rainbow Beach. Brochures were not provided. They bought a map at Eurong Resort. Ranger proved them with brochures and briefing after interaction reported.**

Detailed report of events:

Ranger 7026480 was patrolling for a reported injured dingo and enquiring with passing motorists when this interaction report was obtained.

sch4p3(and his wife were camping at Wongai camping zone. sch4p4 had wrapped his plastic food storage containers in a large tarp and tied off with a rope before pushing them under the trailer. He woke at around midnight to the sound of the tarp being ripped at by a dingo or dingoes. sch4p4 banged on the side of the tent which scared off the dingo he observed.

No food was accessed.

Additional comments and notes: Wongai and One Tree Rock have been assessed as high risk for closing due to numerous tent ripping interactions. Camping zones are to be temporarily from 14 June 2014. This was an opportunistically obtained interaction report.

sch4p3 reported seeing several dingoes during their stay.

Action taken: Report generated and circulated. Wongai camping area temporarily closed.

Proposed further action: Continue monitoring dingo activity in this area

Comments **Permits obtained at Rainbow Beach. Brochures were not provided. They bought a map at Eurong Resort. Ranger proved them with old dingo brochure and briefing after interaction reported. Previous brochure not being reprinted or readily available.**

Detailed report of events:

Ranger 7026480 was patrolling for a reported injured dingo and enquiring with passing motorists when this interaction report was obtained.

sch4p3(and his wife were at Eli creek when a group of males that looked to be in their 20's approached a dingo with a tag in its left ear. One of the men held out his hand for the dingo to sniff. The dingo approached the man.

sch4p3(and his wife observed a family in the vicinity that included a child in nappies. The parents were observing the interaction and moved the family away further down the creek.

sch4p3(and his wife moved away from the interaction to go and have lunch. When they returned approx. half an hour later the dingo was still in the area asleep under a car.

Additional comments and notes: Several interactions are being reported of dingoes being encouraged in this area. This was an opportunistically obtained interaction report. sch4p3(reported seeing several dingoes during their stay.

Action taken: Report generated and circulated.

Proposed further action: Continue monitoring dingo activity in this area where resourced available.

Comments **Alleged feeding of wildlife - denied. One visitor is a unit owner and regular visitor**

Detailed report of events: While conducting a search for a reported injured dingo ranger 7026466 was approached by KBRV driver [sch4p3] regarding an alleged feeding of a dingo that occurred approx. 200metres north of Yidney rocks by 3 men fishing near a blue jeep. The driver allegedly witnessed fish being thrown to the dingo by 1 of the men.

Ranger 7026466 immediately went to investigate the reported interaction observing juvenile dingo BRG13m heading south from the reported interaction area. When interviewed, the men denied all knowledge of the alleged offence and stated the dingo picked up a piece of something possibly washed in bait at the waters edge.

Ranger 7028018 arrived approximately 5 minutes into the discussion.

Additional comments and notes: Thirty minutes prior, ranger 7026466 had spoken to 1 of the three men with the [sch4p3(3)] Prejudice the protection of an ind at the described vehicle. The ranger enquired about the reported injured dingo, that another female dingo in the vicinity may come their way to solicit food and to keep their bait and catch secure. [sch4p3] stated he was a unit owner at [sch4p3(3)] Resort and a regular visitor to the island and was aware of the obligations regarding Dingo safe messages and food security.

Action taken: Reported interaction investigated, fishers involved reminded of dingo safety and food storage messages. Interaction report generated and circulated. An offence could not be determined based on circumstantial evidence - an infringement was not issued in this instance.

Proposed further action: Continue education of visitors regarding bait and food security. Continue regular liaison with CTO operators to report dingo interactions.

Comments

Detailed report of events: Whilst on patrol, ranger 7027904 and myself observed PuGR13m loitering on the Wongai beachfront. It was not wary of the QG whilst we got photographs from a distance to confirm identity.

Additional comments and notes:

Action taken: Photographed to confirm identity.

Proposed further action: Monitor behaviour.

Comments

Detailed report of events:

sch4p and his colleague observed an older man (60ish) bending down on his knees with an outstretched arm encouraging a tagged dingo to approach him. The dingo approached him and his 6-8 mature aged friends.

CTO tour drivers in the vicinity including sch4p yelled at the man to stop what he was doing.

The man responded by stating he'd been coming to the island for 40 years and knows dingoes. The man got up and moved on.

Additional comments and notes: This dingo is seen regularly in the Eli Creek area. ROR13f is regularly observed in this area.

Action taken: Report generated and circulated. Encouraged CTO observations of this nature to assist with risk mitigation against human initiated interactions with dingoes.

Proposed further action: Continue monitoring dingo activity in this area

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **Long time visitors no food or rubbish available, fridge secured with strap and metal clips.**

Detailed report of events: sch4p3 and his wife left camp at 0830 for a trip to the western beach. On their return they found a dingo had accessed their tent under the front door. The dingo had dragged their fridge toward the door damaging the securing strap and tore the fly screen on the sleeping area of the tent. The dingo did not access any food or rubbish as they had taken it all with them in their vehicle.

Additional comments and notes: The campers reported seeing dingoes in the area regularly. The Dundubara pack juveniles have been loitering through this area.

Action taken: Interview conducted, briefed campers, RIC Nth informed, report generated.

Proposed further action: Continue briefing and patrolling regime.

Comments **Not relevant for this interaction report**

Detailed report of events: Dingo BWY13m was initially reported inside the fence line on or around 17:30 24/6/2014. Ranger 7027330 responded to the event. Dingo seen by ranger and attempted to remove 25/06/2014 - 09:30.

Liaison between resort managers/owners and rangers 7026466 & 7028018 continued until dingo release 15:30 25/06/2014. No obvious signs of entry around the grid areas and immediate gates.

Dingo released by following a scent lure attractant and walking through an open gate.

Additional comments and notes: Dingo did not show signs of aggression or risk whilst inside the fence line.

Action taken: Interaction responded to, dingo released and report produced.

Proposed further action: Continue fence security until activity settles and any breach areas are secured.

Comments **Driver had given all the passengers the dingo safety spiel.**

Detailed report of events: Rangers 7026466 & 7028018 were approached by CTO driver sch4p3 who stated the following in conversation. A female tour participant with a KBRV tour driven by sch4p3 was observed by the drivers crouching low behind the tour bus taking a 'selfie' with a dingo licking her face. The CTO drivers dealt with the situation.

Additional comments and notes: This dingo has been regularly observed in this area and is conducting regular code C behaviour. KBRV drivers are all aware of the dingo safe messages and deliver these messages to their tour participants

Action taken: Interaction reported.

Proposed further action: Continue regular liaison with CTO operators and appropriate behaviour around dingoes.

Comments **Driver had given all the passengers the dingo safety speal.**

Detailed report of events: Rangers 7026466 & 7028018 were approached by CTO driver sch4pt who stated the following in conversation. Tour participants with KBRV were in the water at Eli Creek when dingo GGPI13f approached two Asian guests as they splashed in the water. The tourists ran up the creek and the dingo 'chased' their movements from the shore not entering the water.

The dingo was chased off.

Additional comments and notes: This dingo has been regularly observed in this area conducting regular code C behaviour. The 'Following closely' category was used as the most appropriate category in the code C selections.

Action taken: Interaction reported.

Proposed further action: KBRV drivers are all aware of the dingo safe messages and deliver these messages to their tour participants.

Comments **The boy was puffing himself up to appear large in an attempt to deter the dingo**

Detailed report of events: At approx. 16:30 ranger 7028018 was patrolling the beach and noticed a dingo in the surf standing next to a teenage boy fishing. Ranger 7028018 drove up to the boy who was puffing his chest up in an attempt to look large and to deter the dingo. The boy stated that the dingo (GGPi13f) was trying to access the bait in his front pocket.

Additional comments and notes: It was suggested by the ranger that the boy put the bait into the bucket with a lid he had and place it in his parents car.

GGPi13f (multiple code C, D & E interactions) is known for behaving problematically towards visitors on the beach.

Action taken: All fishermen on the beach within close proximity to GGPi13f were briefed on dingo safety procedures. Report generated and circulated.

Proposed further action: Continue ranger patrols along the beach and monitor dingo behaviour in the area

Comments

Detailed report of events: sch4 and a four other members of their camping group were enjoying a cup of tea and looking at the sunrise at approximately 6.20am in Marloo CZ, when a dingo approached their area and ran away with a camera and tripod. The dingo seemed to be a young male with black markings on it's back and it is believe not to have had an ear tag. The campers chased the dingo north along the dunes and then inland into the bush. They were unsuccessful in relocating their "Go Pro" and tripod, after searching adjacent bush for some time.

Additional comments and notes: The campers were regular visitors to the Island and kept a tidy camp area, free of food items and rubbish.

Action taken: Reported incident and continued patrols in camp zones.

Proposed further action:

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **No**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments

Detailed report of events: A dingo was hanging around vehicles and people, when rangers watched the dingo approached 2 young boys at the back of the vehicles while Dad and Uncle watching whales not their children.

Additional comments and notes:

Action taken: Went up to the people and gave them a good talking to about dingo safety as they are from another country

Proposed further action: Nil

Comments

Detailed report of events: Encounter started approx 9:10am, with the first sightings being a pair, one male, one female!!

Breakfast was finished approximately 10 to 15 minutes earlier, dirty dishes and cooking utensils had not been washed, and where on the table!!

Initial pair came within 2 metres of both of us, the dingo pair where sniffing the ground and area, at times pausing and making eye contact. At no stage did the dingoes show what we would deem aggressive behaviour. Ears where upright and alert, tail too!!

One of this pair moved around our vehicle, and at this point we noted that the back of the utility was open, tailgate down, and this is where we kept our food. One of us moved to shut the back of the utility, the whole time the Dingo stood and watched. It was then noted that there appeared to be another 4 more Dingoes

following this initial pair!!

We had an approximate counter of 6 Dingoes visible at the same time, uncertain if there were any more!!

During the entire encounter, my wife and I stood, with arms folded, moving to keep the nearest Dingoes in sight at all times. Trying to act as a barrier (between them and our tent/camping space), more as standing our ground, but trying not to be aggressive. The initial pair did move to walk into our camping zone, more than once, and each time my wife and I stood our ground, stopping them from walking through!!

I did arm myself with a folding shovel, but at no point was this lifted, or swung in an aggressive manor!!

One of the initial pair moved around the back of our camping site, myself moving to maintain eye contact, and my wife staying to maintain eye contact/barrier with the remainder. Just as this unfolded, the pack then moved away from our camping site!!

The remainder of the pack stayed their distance, during this encounter!!

After some minutes had passed, we had noted that a Dingo had re-appeared on the north side of site. We are guessing that the pack had not moved away, but had instead circled around the rear of our campsite, using the small dunes behind our tent. We had three Dingoes walk through, then a fourth ran from the top of the small dune behind our tent, to within 2 metres of our tent, and me (who stood there with folding shovel hanging by my side). These four then moved in an easterly direction to stand on top of the dune overlooking the beach, which placed them between us and the beach. They watched for a few moments, then another two appeared and when they joined the other four they then continued north of our location!!

Camp site GPS coordinates: 25 degrees, 6 minutes, 32 seconds, South!!!! 153 degrees, 18 minutes 43 seconds, East!!

We had had other encounters, but never more than one Dingo each time was seen. Most times the Dingo would come within 2 metres of camp, even being bold enough to mark a tree, yawning twice whilst led was cocked, and maintaining eye contact at all times. This is what we both deemed, bold behaviour!!

Every day we would see signs (paw prints on our shade cloth ground cover) that a Dingo had been through our campsite whilst we were out!!

Everyday that we were away from camp we were diligent in cleaning up, and making sure that our site was of little interest to a passing Dingo. Our foods, toiletries and the likes travelled with us. There was no hanging towels, cords, ropes, or otherwise about our site. Our camp chairs also travelled with us. All that was left outside our tent was a table, gas stove, gas bottle, kettle and water container. Inside the tent was our clothes bag, clean and dirty clothes, and bedding.

Relea

Additional comments and notes: The above report was submitted by the camper electronically and is written as firsthand experience. The pack of six dingoes has been sighted recently with 2 yellow and an alpha male with the sub adults.

Comments

Detailed report of events: Four children (two twelve years + two fourteen years), playing on the sand dune behind the Maheno wreck. Dingo approached along back of beach and started running up the sand dune towards the children. The children's father who saw the incident unfold, picked up a fishing rod holder and started running towards the dingo and yelling at it. At this point the dingo stopped running towards the children and briefly sat down. As the father approached closer it trotted sideways down the dune and continued on its way, along the beach.

Additional comments and notes: Report only received yesterday afternoon at Cathedral shop. 7027816 saw several photos of dingo taken by fourteen year old and was able to clearly identify it.

Action taken: Notified RIC NRM, Notified NMU Dingo Ranger, report generated

Proposed further action: Continued briefings and patrols

Detailed report of events: 7026804 and 7027292 pulled up into the queue for the barge and we observed GY13m and another tagged male dingo loitering around the barge landing area, around queued vehicles and a group of hikers sitting on the dunes waiting to be collected by the FI taxi. GY13m was closest to the group of hikers, whilst the other tagged male loitered around the front of the queue. Neither were wary of vehicles. 7027146 was already present in the queue and had spoken to the hikers about dingo safety and their appropriate behaviour. The dingoes were present until the barge pulled away to head back to the mainland, and were observed to approach the group of hikers within 1-2m when the taxi pulled up and they began to load their gear into the car. One of the male group members eventually ran at one of the dingoes, yelling at it and trying to discourage its presence. The dingo retreated slightly at this action. No other efforts to discourage the dingoes were evident from any other parties present.

Additional comments and notes: GY13m tag had a blue button inside the ear, front left sock to top of toes, front right sock to top of toes but angling upwards inside leg. Small horizontal mark evident on forehead, equidistant between eyebrows (refer photos). Other tagged male dingo too distant to ascertain identity.

Action taken: Report Generated

Proposed further action: Patrol and monitor animals

Comments

Detailed report of events: At 0700 Friday 4th July 7027518 observed two dingoes walking towards vehicles waiting for the barge both dingoes walked around vehicles and people for over 15 minutes. Both were approaching people and vehicles with noses in the air sniffing for food. Both walked within three metres of people. Some people tried to shoo them away unsuccessfully. They would retreat to the foredune but then come straight back.

Additional comments and notes: Before GGPu13M got to the vehicles BRR12M approached him and dominated him. GGPu covered and snarled and BRR12M lost interest and walked up onto the foredune.

Action taken:

Proposed further action: Continue monitoring area.

Comments

Detailed report of events: Ranger 7026936 was carrying out pest control work at the Eli Creek day use area on the 6/7/14. BRG13m and ROR13f were observed loitering constantly around visitors at the creek edge throughout the entire day. There were no signs (or reports) of aggressive behaviour observed by ranger 7026936, however both dingoes were approaching visitors within 1m, soliciting food. Visitors were observed attempting to deter the dingo from approaching closely, to no avail.

Additional comments and notes: These dingoes are from a litter that is known to be highly habituated. It is highly likely that these dingoes were loitering around the Eli Creek DUA due to the 10kg (approx) of whole fish that was found buried at this site on the morning of 5/7/14.

Action taken: report generated and circulated

Proposed further action: continue regular patrols to Eli Creek during high visitation.

Detailed report of events: On morning patrol 7027330 sighted an unidentified dingo high up on the south bank of Eli creek another dingo was sighted near the portable toilets and was identified as BRG13M. On closer inspection of the creek bank three holes were found full of under sized whole Dart. Dingoes and birds had been feeding on the exposed fish which had been buried very shallow on the north bank of the creek 30m from the entrance to the board walk. Dead fish were also sighted in the creek. BRG13M showed no interest in the exposed and went to sleep in the sun on the south bank of the creek.

Additional comments and notes: As the fish were whole and buried very shallow in large numbers it is believed that this was to feed and attract dingoes to the area.

Action taken: All fish removed and reburied away from the area. RIC Nth informed, report generated.

Proposed further action: Patrol area

Comments

Detailed report of events: Dingo hanging around two fishermen for over half an hour. Trying to steal fish, but unsuccessful. Dingo was consistently chased away but persisted in hanging around.

Additional comments and notes: Dingo approached to within two meters of rangers car, whilst talking to fishermen. Entire pack of six dingoes loitering on beach from Cathedrals north in the afternoon, RBW exhibiting the most habituated behaviour.

Action taken: Notified Dundubara dingo ranger, report generated.

Proposed further action: Continued monitoring and patrols

Comments

Detailed report of events: On morning patrol 7027330 sighted a dingo sitting on the beach behind a fisherman. On approaching the dingo was identified as BWY13M. When approached the dingo moved a short distance away and layed down in a wheel rut. The fisherman was spoken to and advised to actively deter dingoes. The fisherman was not aware that the dingo was behind him.

Additional comments and notes: This dingo is regularly seen during the day on the beach, it is highly habituated. This dingoes behavior show potential for a car strike.

Action taken: RIC Nth informed, report generated

Proposed further action: Monitor animal, Continue patrolling and briefing regime.

Comments

Detailed report of events: At approx. 1500 [sch4p3] and his grandson went down to the Happy Valley beachfront. [sch4p3] and his grandson began playing with a ball, the young boy ran after the ball when he saw a dingo approaching. The boy ran back to his grand father. The dingo approached to within 5m and continued to follow them around. The dingo was described as a small skinney male with possibly a yellow ear tag. At this point a vehicle pulled up and offered to take them to Happy Valley. On his return to Happy Valley [sch4p3] rang the dingo hotline and reported the interaction. At 1600 ranger 7027330 called [sch4p3] and conducted an interview. At the conclusion of the interview [sch4p3] was going back to the beach in a vehicle to see if he was able to confirm the dingo identification. [sch4p3] was later contacted and was not able to confirm the dingo identification.

Additional comments and notes: The dingo showed no aggression. [sch4p3] was unsure of the identification, no dingo regularly seen in the area matches that description. When spoken to latter [sch4p3] had witnessed two other interactions on the beachfront that afternoon.

Action taken: Interview conducted, report generated.

Proposed further action: Monitor dingoes in the area , continue patrolling and briefing regime.

Comments

Detailed report of events: At approx. 1630 sch4p3 went to the Happy Valley beachfront to see if he could identify a dingo that was involved in an earlier interaction, he was unable to find the dingo involved. However he witnessed an unidentified dingo jump into the back of a ute and take a bait bag and run of into the bush.

Additional comments and notes: The Oaks pack are highly habituated, occurrences like this are increasing in frequency.

Action taken: Interview conducted, report generated.

Proposed further action: Monitor dingoes in the area, continue patrolling and briefing regime.

Questionnaire:	Specify visitor type Staying in rental accommodation
Did they receive an information pack with their permits	unknown
Did they read the Dingo Brochure	unknown
Did the people follow 'dingo safe' messaging? (Ranger to assess)	No
Comments	Teenager closest to dingo was unfamiliar with Dingo Safe messaging

Detailed report of events: Whilst driving north along the beach towards Eurong office, myself and ranger 7026254 observed a dingo (identified as BWR13m through an ear tag in its left ear) within 2m of a teenage boy standing near the water's edge with a plastic shopping bag of pilchards on the ground in between the two. BWR13m then moved in quickly and grabbed the bag, removing himself about 3m before attempting to consume the pilchards. The teenager did not seem to make an effort to retrieve the bag, so we drove the QG vehicle to within 2m of the dingo and honked the horn at him, startling him and he then dropped the bag, which the teenager then retrieved. BWR13m retreated approximately 5-10m at this point and lay down watching the other teenager fishing.

Additional comments and notes: BWR13m remained in the area when we left, despite ranger 7026254 attempting to shoo him away. His behaviour and complacency around vehicles indicates that he may be at risk of vehicle strike.

Action taken: Ranger 7026254 then spoke to the closest teenager about keeping his bait and catch secure, warned him of the \$330 fine for failing to secure food and gave him a dingo safe briefing. He claimed not to have known any dingo safe information.

Proposed further action: Continue opportunistic briefings and patrols.

Comments

Detailed report of events: Whilst walking through Central Station day use area, we noticed a dingo lying on the edge of the vegetated area within 40m of the eastern toilet block. A bus was departing the parking area at the time. I photographed the dingo with my zoom camera for identification purposes, noting that it did not have a tag and was a male. The dingo was not wary of our presence. After showing the photographs to dingo rangers, the dingo was confirmed to be untagged adult male 13Green10m (had been previously tagged but tag was intentionally removed a couple of years ago). On leaving the dingo and continuing through the day use area, about a minute later 13Green10m again lay down and then proceeded to howl for approximately 20 seconds. He later arose and continued sniffing around the ground in the local area.

Additional comments and notes: See attached photographs

Action taken: Photographed for identification purposes

Proposed further action: Consider retagging if appropriate

Questionnaire: Specify visitor type **campers**

Did they receive an information pack with their permits **unknown**

Did they read the Dingo Brochure **unknown**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **no**

Comments **Should have kept their camp less attractive to dingoes**

Detailed report of events: Campers reported having work boots and a bag of clothing stolen overnight from their camp at Ocean Lake camping zone. All items were retrieved the following morning. Due to all campers being asleep/in bed at the time, the responsible dingo/es weren't identified.

Additional comments and notes: Nil

Action taken: Reported

Proposed further action: Monitor dingo activity and continue briefings in local area.

Comments

Detailed report of events: sch4p3(3) woke up on the morning of the 11/07/14 to find his wife's fishing waders down towards the beach with bite marks on them. No dingoes were present.

Additional comments and notes: No dingoes came within their camping area on the day of the interaction, although on the night of 11/07/14 there was a separate dingo interaction that will be reported.

Action taken: Reported incident and continued patrols in camp zones.

Proposed further action:

Comments **The accused mans side of the interaction was not obtained to determine.**

Detailed report of events: Ranger 7026466 was travelling the eastern beach and observed BRG13m, a sub adult male dingo loitering around a group of people and digging at fish scraps near them. On further investigation the people advised they did not leave the scraps there and the dingo was not approaching them. [sch4p3(3)] advised the ranger that he and the group were fishing between the Maheno and Cathedral Beach the day before (10/7/14) when a dingo tagged in the right ear was hanging around them. No further tag details were obtained.

They shoed the dingo away a few times as it was persistent.

A vehicle pulled up ([redacted] Holden rego number [sch4p3(3)] with a man described as a white man that looked to be in his 50's, with a [sch4p3(3) Prejudice the protection of an individuals right to privacy] This man got out of the vehicle and produced a slingshot. He proceeded to take aim and fire at the dingo.

[sch4p3(3) Preju] yelled at the man who stated he was protecting himself. He then unpacked his fishing gear and proceeded to start fishing. The dingo moved on and did display any sign of injury.

Additional comments and notes: There have been recent reports of visitors using stock whips to deter dingoes on the eastern beach.

Action taken: Interaction reported. Interaction will not be followed.

Proposed further action: Continue patrolling high risk areas and visitor education regarding Dingo safe messages.

Comments

Detailed report of events: Whilst driving northwards along the beach, ranger 7026254 observed GGPI13f trotting north along the beach, out the front of the currently closed Poyungan camping zone. She was being tailed by a tour bus, perhaps to allow passengers to photograph her from the bus?

Additional comments and notes:

Action taken: Reported

Proposed further action: Monitor activity, continue closure of camping zone given GGPI13f presence

Comments

Detailed report of events: sch4p3(3) and his wife were relaxing under their caravan annex at about 10pm when a group of seven dingoes came from behind the foredunes. There was seven dingoes present, a juvenile male was attacked by two adult males and the younger dingo tried to escape by getting under sch4p3(3) P caravan. The young dingo then ran to the north of the camp site with the other dingoes in pursuit.

Additional comments and notes: The campers were regular visitors to the Island and kept a tidy camp area, free of food items and rubbish.

Action taken: Reported incident and continued patrols in camp zones.

Comments

Detailed report of events: Rangers 70266466 & 8028018 were conducting routine patrolling in high risk areas when KBRV CTO Driver [sch4p3(3)] informed them that fishermen fishing south of Eli Creek looked to be offering a tagged male dingo small fish or bait.

[sch4p3(3)] spoke to the fishermen who were not overly receptive to him. They all looked to be drinking. Rangers went to Eli creek and observed 4 director-camper chairs with a 750ml bottle of rum half full on the ground between two of the chairs, fishing gear and esky and only 1 fisherman fishing at the location described by [sch4p3(3)] No dingoes were observed in the vicinity south of Eli Creek by the rangers.

Rangers continued to Eli creek (approximately 100 metres away) and observed BRG13m loitering in the area scratching at the ground and foraging amongst RBAC vehicles and near other CTO vehicles (pictured below). He did not approach humans or act in an aggressive manner while being observed.

Additional comments and notes: BRG13m is regularly seen in this area with other sub adult dingoes. There have been regular reports of this pack being allegedly fed and encouraged. CTO operators have been asked to assist QPWS in ensuring dingo safe messages are conveyed to their tours and anyone they feel they can or need to approach to discuss with if behaving inappropriately towards dingoes.

Action taken: Interaction reported.

Proposed further action: Continue regular patrols in this area to educate visitors about dingo safe messages and prevent inappropriate interactions that may lead to high risk behaviour. The previous dingo booklet/brochure is still unavailable for use and distribution to the public. Education is assisted by using brochures such as these when permits are purchased and rangers can refer people to them during education.

Detailed report of events: Rangers observed GGPI13f on the beach 50 metres south of Yidney Rocks approach a group of people to within 5 metres in a non-aggressive manner. She continued her activity until the people moved on.

Additional comments and notes: GGPI13f is regularly seen in this area along with her siblings.

Action taken: Interaction reported

Proposed further action: Continue regular patrols in high risk area for education of visitors regarding Dingo safe messages and preventing adverse human/dingo interaction. Revise and reprint the dingo safe booklet/brochure.

Comments

Detailed report of events: Spoke to camper [sch4p3(3) Prejudi] on the beach where he had an untagged male dingo withing 5-10 metres of him, we asked if the dingo had been hanging around while he was fishing and he mentioned that it had stolen his shoe, I advised [sch4p3] that he needs to have a stick with him and a secure box/bucket to keep his gear in or bring his vehicle down, [sch4p3] decided to pack up, we waited till he was in the fenced area then moved on.

Additional comments and notes: this dingo is often seen loitering around Dundubara and prints would indicate he gets around the fencline.

Action taken: report generated

Proposed further action: Continued briefings and patrols and making fisherman aware of their obligation regarding storage of property.

Comments

Detailed report of events: sch4p3(1) was fishing when rangers saw a dingo sitting at her vehicle eating fish out of her bucket. sch4p3(1) was made aware of the incident and encouraged to leave her buckets in the vehicle. She understood the seriousness of the event and couldn't believe she had let it happen. I advised her about her obligations regarding food security and storage and she understood.

Additional comments and notes: this dingo is a regular to the area and seems to be unwary of humans.

Action taken: report generated

Proposed further action: Continued briefings and patrols and making fisherman aware of their obligation regarding storage of property.

Questionnaire: Specify visitor type **campers**

Did they receive an information pack with their permits **yes**

Did they read the Dingo Brochure **yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **yes**

Comments **all food secured at camp**

Detailed report of events: Campers reported 'old female with blue and green tag in floppy right ear' passing by their camp at a distance close enough to identify tag colours. Through this description, the dingo positively identified as BGB01f, whose ear has flopped in recent days, potentially after a fight with another dingo. BGB01f did not demonstrate any interest in spending any extended time around the campers.

Additional comments and notes: Nil

Action taken: Reported.

Proposed further action: Monitor wherever possible.

Comments

Detailed report of events: At approx. 16:45, sch4p3(from KBRV contacted ranger 7028018 to notify him that an untagged dingo was moving in amongst visitors watching the sunset. The dingo was being encouraged and approaching people on the beach. KBRV staff were monitoring and briefing visitors on how to behave safely around dingoes.

Additional comments and notes: A number of untagged juvenile/sub adults are regularly seen on the beach directly outside the KBRV resort.

Action taken: Interaction reported to rangers by KBRV staff. Report generated and circulated.

Proposed further action: Continue monitoring the area. Carry out capture and tagging procedures of commonly seen dingoes around KBRV.

Comments **Well set up camp regular campers**

Detailed report of events: At approx. 1230 sch4p3(3) was in her camp at Woralie CZ when a dingo was seen in their camp. sch4p3(3) attempted to chase the dingo away however the dingo took little notice of her. sch4p3(3) called her husband who chased the dingo away. A short time later the dingo was seen sitting on the high ground behind the CZ watching their camp. Her husband chased the dingo away with a golf club.

Additional comments and notes: No identification was obtained, this site is the overlap between Awinya and Moon point pack

Action taken: Interview conducted, report generated

Proposed further action: Patrol and camper briefs.

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **No**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **Should have actively deterred the animal**

Detailed report of events: sch4p3() was surf fishing, as he moved down the beach an unidentified dingo followed him closely and into the water as he fished. The dingo continued to loiter around until another fisherman arrived.

Additional comments and notes: There are several sub adults from the Dundubara pack that are displaying high levels of habituation.

Action taken: Interview conducted, report generated.

Proposed further action: Monitor area, continue patrolling and briefing regime

<input type="checkbox"/> lunging (attempting to nip or bite)	
Questionnaire: Specify visitor type camper	
Did they receive an information pack with their permits No	
Did they read the Dingo Brochure No	
Did the people follow 'dingo safe' messaging? (Ranger to assess) No	
Comments Had read the Fraser Island brochure (online permit) did not think a dingo would rip a tent. Food was left in the tent.	

Detailed report of events: sch4p3(3) caught the barge on foot at approx. 0900 walked down to the Coolooli CZ and set up his camp. Latter in the afternoon sch4p3(3) walked up the beach past the barge landing to the entrance to the inland track and read the signage there. While there he sighted a dingo in the area so he picked up a stick and walked on the in road and turned left toward the CZ. As he started toward the CZ he noticed a dingo following him within 5m. The dingo lost interest and followed some vehicles out the out track to the beach. sch4p3(3) walked to the CZ without seeing a dingo, on arrival at the CZ the same dingo he had seen earlier appeared from the bush along the beachfront. sch4p3(3) walked to his tent and found it had been torn open, his gear spread out and his food stolen. The dingo followed him to his camp and stayed in the area. The dingo was identified as tagged in the left ear only. sch4p3(3) attempted to chase the dingo away but it only retreated a short distance and returned. No other attempts were made to deter the animal for fear of making the animal aggressive. At 1730 sch4p3(3) began ringing for assistance. At approx. 1800 the dingo lost interest and was believed to have left the area however it was dark and sch4p3(3) could not be sure it was not still in the area. Fraser Island police picked sch4p3(3) up and transported him to Eurong base where he stayed the night.

Additional comments and notes: Food was left in the tent and the camping gear had a well used smell. sch4p3(3) was surprised that a dingo would rip a tent and was concerned for his safety especially at night. sch4p3(3) was still visibly shaken by the incident. The Eurong sub adults have been sighted in the area regularly and on inspection of the vacated camping area it was evident that multiple dingoes had been through the area during the night.

Action taken: SR informed, interview conducted, camper returned to barge and seen off, patrol conducted of area.

Proposed further action: Increase this areas patrols, a stronger message may be required for hikers.

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **No**

Did they read the Dingo Brochure **No**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **The campers said they have been coming to Fraser Island for the past 15 years and are aware of food security. I gave them the Fraser Island and dingo brochures with the briefings.**

Detailed report of events: A large group of campers reported that the morning of the 19/07/14 when they woke up they noticed that their esky had been dragged a short distance away from their camp and was open with food missing, and dingo tracks all round the area. The campers are unsure on how the dingo/es got the esky open.

Additional comments and notes:

Action taken: Report conducted

Proposed further action: Continue to monitor and briefings in this area.

Detailed report of events: While on patrol 7027330 saw a dingo loitering around a fisherman, the dingo followed the fisherman into the water until it was chest deep in the water. The dingo was positively identified as BPuB13M. At this point the dingo was chased off by the ranger. The fisherman was then informed to actively deter dingoes.

Additional comments and notes: This dingo is a member of the Dundubara pack recently tagged and is displaying high levels of habituation.

Action taken: Report generated

Proposed further action: Monitor this animal, continue patrolling and briefing regime

Comments

Detailed report of events: On or around 9:30 am [sch4p3(3) P] called the Eurong QPWS Ranger station and spoke to ranger 7026466 regarding an alleged feeding incident he observed in the 26th July 2014.

[sch4p3(3) Prejudice] and his family, including his son driving in a separate vehicle in convoy were travelling north along the Eastern beach between Happy Valley and Eli creek within the 40km zone when they observed the following interaction.

They were following at approximately 150 metres, a [sch4p3(3) Prejudice] Landrover with registration plates [sch4p3(3) Prejudice] partly obscured by [sch4p3(3) Prejudice] over the sides of the vehicle. This led [] to believe this was a local or professional fisherman.

The vehicle stopped at a dingo approximately half way between the high and low tide mark in the middle of the beach.

A man described as [sch4p3(3) Prejudice] got out of the drivers side door, then got something out of the back of the vehicle tray and took approximately 2 steps towards the dingo before throwing the obtained object towards the dingo that stood approximately ~20 feet away. The driver then returned to the vehicle.

The dingo had not moved at that stage until the unidentified item landed in front of it. The dingo took 2 steps towards the object, lowered itself to the sand and proceeded to mouth or chew whatever it was that was thrown by the described driver. A gender of the dingo could not be ascertained because the dingo was lying on the ground when [sch4p3(3) Pre] convoy passed.

[sch4p3(3) Pre] recalls communicating with his son via 2-way radio as they passed and stating "did you just see that" referring to the alleged feeding of a dingo.

They were not able to obtain photographs and did not look to see if the dingo was tagged due to watching the fisherman's actions.

Additional comments and notes: [sch4p3(3) P] stated he did not have any numbers or contacts to call the department about this incident until this morning. [sch4p3(3) P] stated he has knowledge of the Landcruiser series he observed therefore the vehicle details should be accurate.

[sch4p3(3) Prejudice]

Action taken: Report taken and [sch4p3(3) P] advised that the matter may be taken further. He has stated that he can be contacted if the compliance matter is to be taken further.

Proposed further action: Referred to compliance officer due to the matter being a suspected Pro fisherman.

Comments

Detailed report of events: While fishing to the north of dundubara and a pack of five dingoes hung around the vehicle and ourselves, at times four dingoes would sit 30 metres away and appeared to send one dingo in to check us out, it would stand five to ten metres away standing still with it's tail down and ears flat. We constantly tried to move them on but they were persistant and continued to send in the single dingo which appeared to be a sub adult. Another fisherman turned up but was driven off and gave up after the constant loitering of these dingoes. We had a chat with him and he said he was going home as he'd had enough of the dingoes.

Additional comments and notes: These dingoes are persistant and have the potential to be a problem once the tailor fisherman arrive.

Action taken: report generated

Proposed further action: Continued briefings and patrols and making fisherman aware of their obligation regarding storage and personal safety.

Comments **Unsecured food left in the tent.**

Detailed report of events: On the 3/8/14 sch4p3(3) Prejudice returned to his campsite at Gabala C.Z to find that his tent had been ripped open and food taken from inside the tent.

Additional comments and notes: Initially spoke to a mother looking after numerous children by herself on the importance of dingo safety on 7/8/14. Then inspected camp site and discussed the importance of removing food from the camp cupboards to a more secure location. The campers showed us the rip in the tent. The dingo safety briefing was then delivered to the campers.

Action taken: Advised Dingo ranger of interaction, completed interaction report.

Proposed further action: Continue patrols and briefings of campers and visitors in this area. Continue monitoring dingo behaviour in this area.

Comments

Detailed report of events: While observing BRG13m and GGPI13f rangers 7028018 and 7028020 saw a white 4wd vehicle stop next to BRG13m. A male passenger got out of the vehicle and walked towards the dingo taking photos on his phone.

The visitor proceeded to crouch down with his back to the dingo and attempt to take a 'selfie'. The dingo started to walk away and the visitor appeared to encourage it to return. 7028018 & 7028020 drove towards them (taking photos). As the rangers got close they beeped the horn of the car which startled the dingo who then walked away.

7028018 spoke to the visitor and briefed him on dingo safety. The visitor said "it was ok as he hadn't touched the dingo". They were informed that they had to remain in the car to take any future photos of the dingoes.

Additional comments and notes: BRG13m & GGPI13f have been involved in numerous Code C, Code D & Code E interactions.

Action taken: Visitor briefed. Dingoes monitored until they left the area. Continued patrol of eastern beach.

Proposed further action: Continue patrols and briefings, including extra patrols being conducted around Eli Creek. Continue closure of camping areas between Poyungan Rocks and Eli Creek.

Comments

Detailed report of events: We bagged up two bags of large, cooked prawn heads (estimated weight 1-2kg) which had been buried in the Eli Creek parking area (within 10m of the creek) and subsequently dug up by a dingo/es (as evidenced by scattered nature and paw prints in sand). Unsure as to quantity consumed by dingo/es. Prawns were fresh (not odorous or discoloured) suggesting that they were buried within 24 hours prior to our removing them. The large amount of prawn heads suggests that possibly a large group of people had consumed them and were responsible for their incorrect disposal above the high tide mark.

Additional comments and notes: Other incidents of fish/fish waste or similar disposal at Eli Creek have been noted recently.

Action taken: Bagged and removed prawn heads for disposal at waste transfer station.

Proposed further action: Monitor, investigate options for appropriate surveillance of this area

Comments

Detailed report of events: Guest staying at rental accommodation reported 3-4 dingoes loitering around the southernmost house in the Oaks area. The unidentified dingoes (no genders or tag descriptions able to be provided) were reportedly loitering around under the deck of the house and at the base of the stairs onto the deck. The dingoes presence was also observed by 6 other guests.

Additional comments and notes: No photos available

Action taken: Reported

Proposed further action: Monitor local area to ascertain identification, consider installation of trail cameras locally to aid this.

Comments **Were vigilant with bait and catch security, but weren't actively discouraging dingo**

Detailed report of events: Whilst on patrol along the beach between Happy Valley and Eli Creek, I observed a dingo (identified as BRG13m through tag in left ear – refer photos) lying behind some fishers. When we pulled up closer in our QG ute, BRG13m stood up and sauntered off, wary but also curious of the QG. I spoke to one of the fishermen, and he reported that BRG13m had been present for approximately ten minutes, but had not stolen anything nor acted aggressively.

Additional comments and notes: Fisherman also reported that two vehicles had earlier driven at BRG13m in an attempt to 'run it over'. Incident was also witnessed by Air Fraser ground crew who texted ranger 7026466 "2 white southbound utes one with canopy and both have rods just covered a dingo with sand and chased it down the beach at Happy Valley 15 minutes ago". No regos or other vehicle descriptions provided. I drove south along beach but did not encounter vehicles matching these descriptions.

Action taken: Reported, spoke to fisherman.

Proposed further action: Continue patrolling and opportunistic briefings as required

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **no**

Did they read the Dingo Brochure **no**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **no**

Comments **Read information on 'internet' pre-visit, mostly about fishing (couldn't specify which websites)**

Detailed report of events: Ranger 7028026 and myself dropped into a camp at Cornwells camping zone which had some food security concerns. No persons were present, so we left a notice for some food storage corrections and then drove onto the beach where we observed the following:

- Dingo lying on the beach behind two cars and some people fishing, two persons (a male and female) at base of the foredune photographing dingo with a long-lensed camera.
- I photographed the dingo in an attempt to ascertain its ear tag, and observed a small dart fish being thrown to the dingo by an unsighted person between the two cars. Ranger 7028026 also observed this action. Dingo identified as PuGR13m through tag in left ear.
- Ranger 7028026 and I left our car, and I formally introduced myself to the two men and one woman present, outlining my observation of a fish being thrown to the dingo, and asked the group who could tell me about that.
- Man made an admission to the effect of "Yeah, I did that". Other male then queried us "So, you're not allowed to feed dingoes at all?" We responded in the negative. The persons present, all of Asian descent, demonstrated that comprehension and use of the English language was not an impediment.
- I asked the man who made the admission if he had read any information relating to Fraser Island before his trip and he stated that he had read information on the internet, but 'mostly about fishing'.
- I suggested to the man that information about dingoes and not feeding dingoes was more prevalent than information on fishing.
- I asked the man if he had any identification on him, and he stated that it was back at the camp, so I said that we would go back to the camp to retrieve it.
- I then went and spoke briefly to the male and female couple who had been photographing the dingo and they stated their anger and disbelief at what had unfolded. I provided this couple with my work email address as they offered to send me photographs of the dingo.
- I returned to the alleged offender and told him that we would meet him back at his camp to obtain his identification. We had established that his camp was the same one with food security concerns as Ranger 7028026 identified the woman present with the two men fishing as being from that camp.
- On his arrival at the camp, I asked the man if he had any justified reason for feeding the dingo, to which he replied "No, I just saw it sitting there and decided to throw it the fish."
- The man, identified as [sch4p3(3) Prejudice the protection of an individuals right to privacy] claimed that he hadn't seen any information about food security or not feeding dingoes and I pointed out to him that his group was camped opposite the Cornwells group camp area at the entrance to which is a sign visible from their camp regarding strapping food containers (artwork attached), as well as information appearing on barges, numerous signs across the island and at toilet blocks.
- Ranger 7028026 ran through our camp food security concerns with [sch4p3(3)] and he agreed that we could take his rubbish bags for disposal.
- I informed [sch4p3(3)] that the next course of action was to refer the matter to my supervisor and that the likely outcome was a fine or prosecution. [sch4p3(3)] asked if he would be notified by mail, and I confirmed that would be the case, usually within a fortnight. I stated to [sch4p3(3)] that he would be contacted via mobile phone if our legal team required further clarification.
- [sch4p3(3)] then went back to the beach to retrieve a car for securing food in, as per our instructions. We waited at the camp to ensure that the food was attended until this time. When the car arrived at the camp, I recorded the camping tag details as "[sch] booking number [sch4p3(3)] 12 persons, 10-15 August 2014."

Additional comments and notes: Reported to A/SR Fraser Island and RIC NRM and dingo rangers on patrol to Eli Creek – Happy Valley area. Other photos from witnesses will be provided once received.

Action taken: Formal interview conducted. Email address provided to witnesses to provide photos.

Proposed further action: Investigating support for prosecution rather than an on the spot fine.

Comments

Detailed report of events: Whilst on patrol at approx 06:30 rangers 7028020 and 7027330 observed a group of fishermen chasing two dingoes and throwing sand at them on the northern side of Eli Creek. As the rangers approached they could see that two dingoes were fighting with a third dingo in the surf. The fishermen finally chased away two male dingoes (identified as GBW11m & RBG13m) by yelling at them and throwing sand. The female dingo who was walking out of the surf was identified as BGB01f. The fishermen said that they had stopped as they thought the two male dingoes were going to kill the female and wanted to stop them.

Once the male dingoes had walked away BGB01f emerged from the surf and stood very close to the fishermen and hid under their car until the two male dingoes were out of sight.

As the two male dingoes headed south along the beach GGPI13f appeared from behind the dunes and joined the group. The three dingoes were excited - playing, mouthing and licking each other before heading off into the dunes.

BGB01f was observed scavenging at the waters edge before heading into the dunes.

Additional comments and notes: GBW11m, BRG13m & GGPI13f were tracked by the rangers to the southern side of the creek where they were wary of the QG (not coming within 15m of the vehicle) and were observed pulling a fish frame from a hole, taking it up to the dunes and dropping it without eating it. They soon headed off into the dune vegetation and were lost from sight.

Action taken: Fishermen spoken to regarding the interaction. Observations made of BGB01f. RIC NRM notified.

Proposed further action: Continue patrols in this area, including briefings of campers & fishermen. Continue closure of campzones between Poyungan & Eli Ck

Comments

Detailed report of events: Initial report received from QPS 1914hrs who had been advised by FI Beach Resort manager of the presence of a dingo within the Eurong fenceline. I spoke to SR FI and made a determination not to immediately respond due to darkness and risk of making dingo wary of rangers (and therefore complicating herding efforts during daylight hours). FI Beach House manager left message on Eurong office answering service at 1837hrs (retrieved at 0830hrs 13/08/14).

I returned call to FI Beach Houses manager and he advised of the following:

Unidentified dingo (unsure of gender or if tagged) observed down 'First Avenue' (first row of houses) and then followed into 'Second Avenue' (second row of houses) where, following consumption of something outside house 23 (manager thought that item may have been a frog) it entered an enclosed area below a house, effectively cornering itself with the manager blocking the only apparent entrance/exit. The dingo apparently became frantic at this point and has fled underneath the fence railing (which the manager had not thought possible). Dingo was not sighted again after fleeing. Manager made an effort to notify all of their guests of the presence of a dingo within the fenced area, due to the high number having children with them.

Additional comments and notes: QPWS staff sweep of the area will occur if further sightings of a dingo within the fence are confirmed, as dingo may have self-exited overnight.

Action taken: I deployed to Eurong fenced area at 0615hrs 14/8/2104 to investigate, checking grids and gates for evidence of entry/exit. Dingo prints were located on the outside of the Second Valley front grid and between the Eurong roundabout and Eurong rear grid/pedestrian gate (it was evident that the dingo was investigating options for exiting). I contacted Eurong Beach Resort reception to advise that I needed to be called in the event of a sighting, and a crew of rangers was deployed to remove sand from the Eurong front and rear grids (with the aid of CAT loader) and to complete a full fenceline inspection. There was no evidence to suggest that a dingo had entered via a grid or propped/unsecured gate. Contractor has been contacted for grid pump out to base of grid to provide more time between required maintenance.

Release se

Proposed further action: Monitor area, trap and tag as required, respond to further reports of dingo within fenceline as required.

Comments	Fish catch obviously wasn't secure

Detailed report of events: Local resident / accommodation onsite manager sch4p3(3) Prejudi rang to advise of "dingoes harassing fishermen" out front of Poyungan Rocks. A female dingo with a "Pink, White and darker coloured ear tag" (confirmed by responding dingo ranger as BWPi13f in area shortly after interaction) and two unidentified males approached fishermen from the south, headed north but then turned around and headed back towards the fishermen again. One of the dingoes was observed running up to a bucket and stealing an unsecured fish from it. The dingoes weren't discouraged easily, and were loitering within 5m of fishermen, before eventually losing interest and moving on.

Additional comments and notes: Dingo ranger 7028018 attended area within 10 minutes of report being phoned through - observed BWPi13f in area (photo attached) but no other dingoes sighted.

Action taken: Dingo ranger responded - attended scene

Proposed further action: Monitor area, increase education at rental accommodations, trap and tag as required

Comments

Detailed report of events: I was walking alone along Middle Rocks boardwalk at about 8.00am picking up rubbish. I noticed a dingo approximately 25m ahead of me with his head down sniffing at something, when he noticed me the dingo ran towards me. I had a long rubbish "grabber" in my hand and I swung it in the air and yelled at the dingo, it came within five metres and then backed off. I noticed it was a sub adult, male dingo with an ear tag, but I could not ascertain the colours. I went on with my work and the dingo kept his distance all the time watching me with his tail up, possibly dominant testing me. I realised after a while that the dingo was not going to leave the area so I started walking back to the QG parked outside the Middle Rocks toilet block. As soon as I turned to walk the dingo ran towards me from about 20 m away and I turned to face him and yelled at the dingo, he came within about 5m moving side to side and the dingo then ran off up the hill.

Additional comments and notes: No other visitors were at risk as there was no one on the boardwalk and no cars were in the car park.

Action taken: Report generated and circulated. Dingo ranger informed.

Proposed further action: Continue visitor briefings when in the area.

Comments

Detailed report of events: At the time of the dingo appearance myself and a colleague were conducting a fence check at K'Gari. An unidentified female, adult dingo approached a personal access gate, looking around and sniffing around the gate at the rear of the property about a minute after we checked that gate. The dingo walked away calmly from us.

Comments

Detailed report of events: Whist driving past a camp in Caree camping zone sch4p3 noticed GY13m eating fish frames on the beach. GY13m then progressed up the beach to the vacant camp and grabbed an unidentified item from the camp table.

Additional comments and notes: sch4p3 took photographs of the animal - identified to be GY13m by ranger 7027118. Photographs below.

Action taken: Report generated and circulated

Proposed further action: Monitor dingo activity in the sandy cape area - as this individual is originally from the Eurong area. Brief camps in area.

Comments **Had taken dingo safety message seriously and had an immaculate campsite despite the tent ripping**

Detailed report of events: Between 10am and 4pm Tuesday 2/9/2014 sch4p3(3) Prejudice the protectiound their tent ripped after coming back from a day trip. No food was in the tent however their clothes were scattered around the campsite. There had been 4-5 dingoes loitering around the area leading up to the incident. They couldn't see if the dingoes were tagged however sch4p3 describe 1 adult male in good condition, 1 adult male in poor condition, and the other 2-3 Dingoes were female or young dingoes.

Additional comments and notes:

Action taken: Report generated and dingo ranger advised

Proposed further action: Continued camper briefings and advise visitors on dingo issues within the area

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments

Detailed report of events: The photos were taken at Eli Creek where what appears to be a sub adult dingo stole a shoe from a man in a tour group, the dingo had been loitering around the area while the tour group was there, the dingo lost interest in the shoe and continued to loiter in the area. There were other tour operators there and from the advice I was given no one discouraged the dingo from loitering.

Additional comments and notes: The tour participant passed the photos and details onto me but chose to remain anonymous

Action taken: report generated

Proposed further action: Day use visitors to be advised to secure all items when walking up the creek.

Comments

Detailed report of events: Ranger 7028018, whilst patrolling the beach, noticed many fresh dingo tracks on the sand directly opposite the entry to the Eli Creek boardwalk.

The dingo (untagged sub-adult male) then appeared in front of ranger 7028018, from the north of Eli Creek, and both the dingo and the ranger startled when they noticed each other. The dingo promptly ran away and sat in the dunes and watched.

The dingo then stood up, walked onto the beach (whilst keeping a wary distance) and sat down on the sand watching the ranger. Ranger 7028018 photographed the dingo for identification purposes.

The dingo coughed/barked, did a backflip and ran away into the vegetation.

Additional comments and notes: The untagged sub-adult male dingo behaved mildly habituated but maintained a wary distance.

Action taken: Photographs taken. Report generated and circulated.

Proposed further action: Continue ranger patrols to and around the Eli Creek DUA to monitor dingo activity and to brief campers and visitors.

Comments

Detailed report of events: sch4p3 and his sch year old son had left there camp at 1100 and returned at 1400 to find that the small tent his son had been using had been torn open along the screen and his clothes had been scattered about the camp. sch4p3 stated that all foodstuffs and rubbish were in the vehicle with him while they were away from camp. On inspection his camp was well maintained and all food and rubbish was secured. sch4p3 had read his information pack and was following dingo safe messaging

Additional comments and notes: Nearby campers had noticed a lean dark coloured dingo had been loitering in the vicinity for the past few days.

Action taken: report generated and supervisor advised

Proposed further action: Continued briefings and patrols

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **Campers left chocolate and wraps inside their tent which has encouraged the dingo to enter.**

Detailed report of events: The sch4p3(3) Preju were away from their camp between 1300 and 1530 on the 14/9 and returned to find that their tent had been torn by a dingo in two places (see photo's below). They found that the dingoes had taken a block of chocolate and a packet of wraps that were stored in their tent.

Additional comments and notes:

Action taken: Campers were briefed on the correct storage requirements in order to prevent this happening. Report generated and circulated.

Proposed further action: Continue dingo safety briefings in all camp zones.

Comments

Detailed report of events: A phone call was received by ranger 7026936 at 1330 on the 15/9, from sch4p3(3) Prejudice the protection to report that a dingo had ripped into their tent while they were away from their camp. sch4p3(3) also reported that the dingo may have possibly consumed some of her partners Sleeping tablets. Ranger 7026936 went to meet with sch4p and sch4p3(3) at their camp immediately to gather details of the interaction.

Between 0830 and 1230 on the 15/9 sch4p returned to his camp where he found a dingo had ripped into his tent (see photos below). No food or rubbish was stored in the tent sch4p3 found that the dingo had chewed a box of his medication (sleeping tablets) and that three tablets were missing. No other items were missing from their tent.

Additional comments and notes:

Action taken: Interviews carried out. Report prepared. Extensive search of all trafficable places in the area was carried out in the case that a dingo may have become sick from consuming the medication.

Proposed further action: Monitor trail camera footage in surrounding area to ensure resident dingoes are still present.

Did the people follow 'dingo safe' messaging? (Ranger to assess) **No**

Comments **People involved could have either left animal alone or left water at a distance for it without interacting with it.**

Detailed report of events: Ranger 7026466 was advised of the following interaction on the 29th Sept 2014 by sch4p3(3) F who advised he had become aware of the interaction.

The interaction occurred on the Moon Point Road. A dingo pup was observed on the road by visitors staying in Happy Valley who stopped, picked it up and, gave it water then returned it to the road and left.

No other details were given regarding the people involved in the interaction.

Additional comments and notes: The Moon Point road is currently closed to unauthorised traffic. Interaction report delayed due to inaccess to the associated photograph.

Action taken: Supplied information reported in interaction report.

Proposed further action: Continue QPWS education regarding leaving wildlife alone.

Comments

Detailed report of events: Ranger 7026466 received a phone call from Eurong Resort management at approx. 07:45 notifying them of a dingo inside the Eurong fence.

Ranger 7026466 contacted rangers 7028020 & 7028018 who responded by inspecting the reported dingo and confirmed the report.

At approx. 09:45 BWPi13f was released through a vehicle access gate.

Additional comments and notes: It is suspected that the dingo entered the dingo deterrent fence via the Eurong Resort beachside grid due to broken electrical wires.

Action taken: NRM rangers notified. Resort and township stakeholders notified. Rangers released the dingo. All stakeholders notified of the release. Report generated and circulated. Fenceline and grids inspected.

Proposed further action: Inspect the grids and fenceline in the following days for any signs of failure.

Did they read the Dingo Brochure **No**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **Bucket was lidded and he chased the dingo off.**

Detailed report of events: sch4p3(was fishing in front of his camp when he noticed a dingo looking at his bait bucket. As sch4p3(headed back toward his bucket the dingo got the lid off the bucket. At this point sch4p3(chased the dingo away.

Additional comments and notes: sch4p3(was unable to give any identification of the dingo. PuGR13M has been sighted in the area.

Action taken: Interview conducted, Ric NMU informed, area monitored, camps briefed.

Proposed further action: Monitor animals in area, continue patrolling and briefing regime.

Comments

Detailed report of events: sch4p3(3) reported a concerning dingo encounter to Rangers at the Dundubara base this morning at 0900hrs.

She indicated:

* her family sch4p3(3) Prejudice the protection of an inc had been camped at Winnam CZ for 2 nights commencing 20th September 2014

* At approximately 1600hrs she was sitting in a chair at their campsite with her partner (their daughter was in the tent) when a 'large' dingo ran into their camp area

* the dingo appears to have be moving towards them with some intent to challenge them she believes

* her partner jumped up when he noticed the dingo was a couple of metres away and grabbed a shovel to chase it away

* as this dingo was running away she noticed that there were two other dingoes moving off from immediately behind their campsite - sch4p3(3) had not been aware of their presence prior to seeing them run off

* sch4p3(3) stated that the dingo that approached them was distinctly larger and in better physical condition than the other two that accompanied it.

* sch4p3(3) and her family elected to end their beach camping due to this event and their concern that a similar or more serious incident may occur - they continued camping at a privately managed fenced campground (Frasers at Cathedral - where they are currently staying until Friday)

Additional comments and notes: sch4p3(3) indicated that when her family arrived at this camping node they noticed a large amount of recent or fresh rubbish had been left there by a previous group of visitors. She collected this rubbish to dispose of it. It contained food packets and various scraps.

sch4p3(3) also indicated that friends of theirs had been camped in that area a week or so prior and had had their tent ripped and food stolen from within the tent.

Action taken: Completed report and emailed to distribution list.

Comments **Campers were storing all of their food in a tent.**

Detailed report of events: At approximately 0200 on the 23/9 sch4p was awoken to a dingo ripping into a tent next to the one she was sleeping in. She scared the dingo off and found that tim tams and biscuits had been stolen. sch4p had stored all of her food in a separate tent to the one she was sleeping in.

Additional comments and notes:

Action taken: Camper was asked to store all food in their vehicle and to be vigilant with food and rubbish security.

Proposed further action: continue to brief campers between Poyungan rocks and Eli creek to ensure campers are storing food and rubbish correctly

Comments

Detailed report of events: Ranger 7027330 was patrolling north through Wyuna CZ when a dingo was sighted in the surf 20m from some fishermen. The dingo then left the surf and trotted south at this point he was positively identified as PuGR13M. The dingo then noticed some children playing in a creek and changed direction toward them. Ranger 7027330 placed the vehicle between the children and the dingo and moved the dingo south out of the camp zone.

Additional comments and notes: PuGR13M has been sighted in the area over recent days and is a known code D animal.

Action taken: Briefed parents of children in creek, monitor animal until it left area, Ric NMU informed, report generated

Proposed further action: Monitor animal, continue patrolling and briefing regime

Comments

Detailed report of events: sch4p3(had an interaction with two dingoes, one being a male with green ear tag and the other unknown late on the night of the 25/09/14 in his Burad camping area. He was about to exit his large canvas tent to use the toilet when he was met by the dingoes in the front annex area. He did not notice them straight away but the dingoes were seemingly looking for food scraps etc and the dingoes came within two or three meters of sch4p3(sch4p3 got a fright and yelled at the dingoes and they left the camp ground.

Additional comments and notes: The dingoes did not rip tent or annex and did not take food/rubbish.

Action taken: Reported incident and continued patrols in camp zones.

Proposed further action:

Comments

Detailed report of events: Ranger 7027330 had just completed interviewing a camper involved in a code D interaction when a dingo approached the camping area from the west. The dingo was positively as PuGR13M. The dingo was followed north through the camp zone to Kurnung creek where the animal went inland.

Additional comments and notes: PuGR13M has been sighted in the area over the last week and is a known code D animal

Action taken: Dingo monitored until it left CZ, campers briefed, Ric NMU informed, report generated.

Proposed further action: Monitor animal, continue patrolling and briefing regime.

Comments

Detailed report of events: sch4p3 and his family left their camp at Guluri for a half an hour Between 1830 and 1900 on the 29/9. On their return they found that a dingo had ripped into their main tent shower tent and an inflatable mattress had been ripped (See photos below). According to sch4p3 toothpaste was the only thing inside the tent that may have attracted the dingo.

Additional comments and notes:

Action taken: Report generated

Proposed further action: continue to brief campers between Poyungan rocks and Eli creek to ensure campers are storing food and rubbish correctly

Faxed/mailed date: 1/10/14 **Reporting Officers details:** 7026936

Comments

Detailed report of events: Two adult and 1 teenage visitors were running along the beach in front of Happy Valley when they observed two dingoes.

1 dingo, a red tagged male, approached the group to within 5m, and was extremely difficult to discourage.

Eventually he moved off and the group returned to happy Valley.

Additional comments and notes: Reported to Sailfish Resort managers and QPWS rangers. A red tagged male has been involved in previous interactions in this area and has been identified as BWR13m through photos.

Action taken: Interaction reported, visitors advised not to run/jog on the beach, report compiled and circulated.

Proposed further action: Continue visitor briefings in this area. Monitor behaviour of all dingoes in this area.

Faxed/emailed date: 01/10/14

Comments **Ranger had provided dingo safety briefing earlier the same day**

Detailed report of events: sch4p3(3) Prejudice and partner returned to their camp at the south end of Guluri camp zone to find two untagged sub-adult dingoes loitering at the camp.

After yelling and chasing the dingoes away they found that their tent was ripped.

No food was stored in the tent; however they mentioned that they had eaten in the tent earlier that day.

Additional comments and notes: Details given to rangers 7028728 & 7027772 on 3/10/14 at Eli Creek at 12:30pm.

Action taken: Report generated & circulated.

Proposed further action: Continue dingo safety briefings in this area. Monitor behaviour of all dingoes in visitor areas.

Comments

Detailed report of events: My colleague and I (7027848, 7028595) were returning to base after completing some duties at Middle Rocks and we were heading south of Indian Head when we notice two dingoes ahead of us loitering around parked 4x4's. Fishermen were near by at the water's edge. The dingoes had their heads down, sniffing and obviously looking for food. The fishermen had informed us that they chased them away but the dingoes slowly made their way back after a while and were loitering. I instructed my colleague to drive towards the dingoes to get a photograph and better ID of the dingoes but instead the two dingoes ran up and over the adjacent sand dunes.

Additional comments and notes: The dingoes did not take food/rubbish from the area.

Action taken: Reported incident and continued patrols in camp zones.

Proposed further action:

Comments **All food and most possessions were removed from the tent.**

Detailed report of events: On the 13/10/2014 at approx. 17:00, sch4p3(3) Preju and sch4p3(3) Prejud were fishing off the beach opposite the Winnam camping area when they were approached by two dingoes.

The two dingoes headed directly to a closed bait bucket, sniffed it then ran up the dunes towards the Winnam camping area.

sch4p3 and sch4p decided to stop fishing and head back to their camp (2-3 mins later) at the Winnam camping area.

When sch4p3 and sch4p arrived back at their camp they noticed that their tent was ripped but nothing was missing.

No dingoes were seen at the campsite.

Additional comments and notes: The two dingoes on the beach were identified by sch4p and sch4p as the same two dingoes (BWR13m & untagged female) previously encountered by them earlier that morning (Code D snarling).

BWR13m has previously displayed tent ripping behaviour and is a known habituated dingo.

The only items sch4p and sch4p had in their tent was a tube of tooth paste in a side tent pocket.

Action taken: Interview conducted and a report generated and circulated. Dingo ranger notified.

Proposed further action: Continue ranger camp briefings and dingo monitoring in the area.

Comments

Detailed report of events:

sch4p3(3) and three other female visitors were in their camp around 7pm when they were approached by a dingo - no sex of tag identified.

The four women got into their car to get away from the dingo.

While they were in their car they observed the dingo rip a hole in their tent and pull all their luggage out.

The dingo stole a hairbrush and some medication (anti-histamine tablets) before moving away about 20mins and sitting down chewing on the brush.

The ladies were yelling from the car and making noise, however the dingo was not deterred and sat for around 30mins before moving off of its own accord.

Additional comments and notes: A dingo returned on several occasions throughout the evening, loitering around the camp.

Action taken: Dingo safety messaging given to campers. Report generated & circulated.

Proposed further action: Continue camper briefings in this area. Observe and record all dingo movements.

Comments

Detailed report of events:

sch4p3(3) and his friends were sitting on the dunes in front of their tents around 7pm.

When they returned to their tents a short while later they found that a dingo had ripped into the back of one of the tents, pulled their pillows out and torn them apart.

They did not see or hear the dingo, and there was nothing in their tents.

Additional comments and notes:

Action taken: Dingo safety messaging given to campers. Report generated & circulated.

Proposed further action: Continue camper briefings in this area. Observe and record all dingo movements.

Comments

Detailed report of events: At approx. 16:45 on 23/10/14, sch4p3(3) P and her husband observed 2 dingoes (1 male 1 female) on the beach near Yidney Rocks in close proximity to a 4WD that had stopped to fish.

The dingoes did not appear aggressive but were comfortable and relaxed around the three fishermen, lying within 1m of the vehicle.

The fishermen were not doing anything to deter the dingoes.

Additional comments and notes: Photos provided from 23/10/14 and 24/10/14 from the same spot show an untagged juvenile female dingo, and a male dingo possibly tagged.

Interaction report sent via the dingo.range@npsr.qld.gov.au email address on 27/10/14.

Action taken: Interaction report completed and circulated.

Proposed further action: Continue patrols and monitoring of all dingoes in this area. Continue briefings of all visitors in this area.

Faxed/emailed date: 30/10/14

Comments No the visitors were cooking lunch in the carpark and taking photos of the dingo at close proximity.	

Detailed report of events: At 13:48 on the 25/10/2014, ranger 7028018 was visiting Lake McKenzie on rostered days off, noticed a dingo loitering around in the carpark.

The dingo was scavenging for food scraps and was completely undeterred by the presence of large visitor crowds who were trying to encourage it closer to take photographs.

The dingo was identified as 13Green10m by his sock markings and facial scars.

Ranger 7028018 advised visitors who were encroaching too close to maintain a safe distance and not to feed or encourage the dingo.

Additional comments and notes: 13Green10m is a known habituated dingo that frequently visits the Lake McKenzie area.

13Green10m is the known father of a 2014 born litter. It is anticipated that the litter of pups may follow 13Green10m's lead when he frequents the Lake McKenzie carpark in the near future.

Action taken: Photographs taken. Report generated and circulated. Visitors briefed on dingo safety.

Proposed further action: Install trail cameras at Lake McKenzie to monitor dingo movements. Continue visitor briefings by rangers conducting regular maintenance duties.

Comments	Had previously spoken to [sch4p3] if he was aware of dingo safety which he confirmed he was.

Detailed report of events: On the 31 October at 1720hrs [sch4p3] and [sch4p3] were fishing out the front of the 'Oaks' when they turned around to notice that two dingoes were running off with a fish from their unsealed bucket. Their vehicle and bucket were 40 metres from the water line.

Additional comments and notes: At 1725hrs officers intercepted dingoes at a vehicle 100m south of incident, where the two dingoes then headed for the foreshore dunes. They stayed in this location for approximately 10mins. Photos were taken at this location.

Comments **The guest tried to deter the dingo by clapping his hands and yelling.**

Detailed report of events: The following is recount of events forwarded onto ranger 7028018 by sch4p3(3) Prejudice the (Yidney Rocks manager).

At approx. 03:45 a guest staying at Yidney Rocks accommodation was woken by the sound of scratching on the security screen of his holiday unit door. When the guest opened the door to inspect what was making the noise he noticed a dingo scratching the wire mesh on the door.

The guest yelled and clapped his hands in an attempt to deter the dingo, but the dingo did not react and moved across to the next apartment's door and continued scratching the wire mesh.

After approx. 5 minutes the dingo left.

No identification of the dingo was obtained due to the low light.

Additional comments and notes:

Action taken: Interaction reported. Report generated and circulated.

Proposed further action: Maintain regular communication with island residents and private enterprises.

Comments **Did not approach - photographed from a distance**

Detailed report of events: Whilst returning to our vehicle, WRW11f (tag absent but previously identified through sock heights, markings and known territory) and three juvenile dingoes were observed loitering around the Central Station day use parking area. They were within 10m of QG vehicle. When WRW11f became aware of my presence, she led the juveniles into the bush, and they were sighted shortly after lying behind the former office building in the day use area. They did not approach myself or ranger 7027904 but it was evident that the juveniles are less wary than WRW11f.

Additional comments and notes: A couple of people were sitting in their car in the car park, and a number of tour bus passengers were down on the boardwalk at the time, so there was a strong chance of interaction with humans after we departed.

Action taken: Photographed for identification purposes.

Proposed further action: Increased ranger/wildlife monitoring camera presence to reduce habituation potential through human interference/encouragement.

Comments

Detailed report of events: 7027330 and a volunteer were patrolling south through Burad CZ when a dingo trotted down the dune toward the vehicle. The dingo was identified as PuGR13M. The animal sat down beside the vehicle and stayed there until the ranger drove away.

Additional comments and notes: A very habituated animal that is moving between Ocean Lake and Wyuna CZ.

Action taken: Waddy Point dingo ranger informed, report generated.

Proposed further action: Continue briefing and patrolling regime and monitor this animal.

Comments

Detailed report of events: sch4p3 and his family were absent from his camp at One Tree Rocks between 1400 and 1600 on 5/11/14. When he returned back, he found that his tent had been ripped into by a dingo in two places. Clothes and pillows were found outside the tent, sch4p3 was adamant that no food items were stored in his tent.

Additional comments and notes: sch4p3 and his family relocated to a fenced camping area in Central Station.

Action taken: Report generated and circulated, sch4p3 was given the option to move his camp to a fenced campground.

Proposed further action: Consider closure of OTR & Cornwalls CZ's

Comments

Detailed report of events: Ranger 7027330 was patrolling north toward Eli Ck when a dingo was spotted on the waters edge at Eli Ck. On closer inspection the dingo was identified as GGG13F, the dingo was followed south until it crossed the creek and headed south. At this point a tourist informed the ranger that there was another dingo walking around people further up the creek. Ranger 7027330 then found the second dingo walking around tourists. A foreign tourist then called and whistled to the animal in an attempt to bring the animal closer. The tourist was informed that this was an offence and was then briefed along with others of his group. The dingo was identified as BWR13M. The dingo was foraging for scraps in the sand and resisted all attempt to move him on. All tourists in the area were briefed especially those with children. At approx. 1645 GGG13F approached from the south and also began foraging for scraps. Both animals were monitored until all tourists had left the site.

Additional comments and notes: BWR13M is highly habituated and is difficult to deter, GGG13F is still wary however the longer she associates with BWR the more habituated she will become.

Action taken: Eurong dingo ranger informed, report generated.

Proposed further action: Continue patrolling and briefing with attention to Eli Ck in the afternoon.

Comments

Detailed report of events: Ranger 7027110 and his family were at the Wanggoolba barge landing on the 11/11/2014 at 16:55 and notice an untagged male dingo loitering nearby.

The male dingo was untagged and according to staff working on the barge is regularly seen loitering in the area.

Additional comments and notes: 13Green10m and an untagged sub-adult male dingo are regularly seen in the area.

A positive identification of the dingo from the photos is unattainable.

Action taken: Interaction reported to dingo rangers. Report generated and circulated.

Proposed further action: Continue monitoring all dingo activity in the area. Capture and tag the untagged dingo for identification purposes as per the FIDCRMS 2013 recommendations.

Comments

Detailed report of events: Late at night sch4p3(heard something scratching at his tent. He went out to investigate to find a dingo knocking over rubbish bucket trying to get in. sch4p3(turned his torch on, initially tried to shoo the dingo away, the dingo stood its ground. sch4p3(then tried again with a louder voice and the dingo ran away.

Comments

Detailed report of events: On the 13/11/2014 sch4p3(3) Prejudice th her husband (name unspecified) and adult son (name unspecified) woke up at their camp in the Maheno camping area to find their eskies scattered around their camp site.

One esky had its lid ripped off completely from the hinges and all the contents taken from it; lamb, roast chicken, stew etc. They had placed heavy boxes on top of their food cooler boxes but this had not deterred the dingo/es from stealing food. The campers did not awake from their sleep.

Additional comments and notes: One unidentified dingo had been seen in the general area before and after the food stealing interaction.

Action taken: Interaction reported to 2IC Dundubara and dingo ranger. Interview undertaken and report generated and circulated.

Proposed further action: Continue ranger educational briefings on dingo safe messaging to all visitors in the area. Continue monitoring all dingo activities in the area.

Comments

Detailed report of events: At approx 14:30 on the 14/11/2014 rangers 7028018 & 7028020 were carrying out maintenance duties at Central Station, noticed WRW11f (tag missing but identified by sock markings and scars) sleeping under the western side of the forestry barracks with a juvenile female dingo.

Both dingoes displayed caution towards the rangers but remained lying under the buildings undeterred.

Additional comments and notes: Although WRW11f doesn't have a recorded management history of habituated behaviour, she is currently displaying habituation which she and her mate (13Green10m, a known habituated dingo) are teaching to their 2014 born progeny. It is also suspected that the juvenile dingoes are becoming habituated to humans through learned behaviour that is being encouraged by constant human interactions within the Central Station day use area.

Action taken: Interaction report generated and circulated.

Proposed further action: Continue opportunistic educational dingo safe briefings to CTO operators and visitors and continue monitoring dingoes in the area.

Capture and re-tag WRW11f and 13Green10m for identification purposes.

Comments **The driver should have driven at a pace as so the dingo couldn't keep up.**

Detailed report of events: On the 15 November 2014 at approximately 1800 myself 7027904 and ranger 7029188 were called to investigate a dingo incident at "The Oaks", a section of beach between Poyungan Rocks and Yidney Rocks. As we passed Yidney Rocks, we were directed by some visitors to a vehicle travelling south along the beach. We drove south and as we approached that vehicle, we noticed a dingo chasing it. We caught up with the vehicle and observed the dingo chasing the car with very strong determination to keep up. There were 2 males hanging cameras out of the left hand side of the vehicle. I drove ahead of the dingo and moved in closer to the south bound vehicle and slowed down to halt the chase. The dingo slowed and swerved and tried to continue the chase. I kept moving the QG to halt the dingo and it finally lost interest in the sth bound vehicle and began walking slowly south.

Additional comments and notes: It was a strong belief that the people in the car had given the dingo something to eat or lured it some other way. I had a brief conversation with the people in the car as I drove along side and they denied any wrong doing.

Action taken: Report taken

Proposed further action: Monitor the section of beach between Eli Creek and Eurong for dingo activity.

"Be Dingo Safe" information received Yes

Detailed report of events: Email received by Ranger – On Monday sch4p was on Fraser Island visiting Eli Creek, mid to late afternoon 2 Dingo's – One Male (the other female, but she did not come close and stayed away). The male Dingo was way too friendly and was wandering around all of us and coming up very close, at one point I could have easily patted him on the head. Ranger 1423322 phoned sch4p3 and discovered the male Dingo had also stolen an unattended thong belonging to another visitor.

Comments

Detailed report of events: At approximately 1000am on Wednesday the 19.11.14 a 'large' untagged dingo was loitering around the waddy beachfront camping ground. The dingo hung in the area (within 20meters of camps) for a few minutes and left on its own accord.

Additional comments and notes:

Action taken: Report generated and circulated

Proposed further action: Monitor behaviour of this individual, trap and tag individual, continue to brief camps in the area.

Comments

Detailed report of events: While patrolling Eli creek day use area ranger 7027330 sighted a dingo moving through parked vehicles and around people. On closer inspection the dingo was identified as BWR13M. At approx. 1545 another dingo approached from the south this dingo was identified as GGG13F, this dingo was more wary of people than BWR13M and stayed 10-20M away from people. Both animals were foraging for food scraps left by tourists. The dingoes stayed in the area until approx. 1700 and then moved of toward the north.

Additional comments and notes: These animals were involved in a recent code E interaction and it is of concern that they are frequenting a busy day use area. These animals are clearly foraging for food scraps left inadvertently or on purpose, investigations should be made into restricting eating and food preparation at the site. The site is a known attractant and habituation site for dingoes.

Action taken: Monitor animals, brief tourists in area, RIC NMU informed, Eurong dingo ranger informed, report generated.

Proposed further action: Continue monitoring these animals, patrol area, brief tourists, investigated closing area to eating and food preparation

Detailed report of events: While patrolling Eli creek day use area ranger 7027330 sighted a dingo moving through parked vehicles and around people. The dingo was identified as BWR13M the same dingo was sighted in the area the day before. The dingo was seen foraging for food scraps in the area. At approx. 1630 a dingo approached from the south this animal was identified as GGG13F, she then began to forage for scraps in the area. Attempts were made to deter the animals GGG13F left the area for a short time however BWR13M would only move away a short distance and sit down. The animals were monitored until all tourists left the area.

Additional comments and notes: These animals were involved in a recent code E interaction and it is of concern that they are frequenting a busy day use area. These animals are clearly foraging for food scraps left inadvertently or on purpose, investigations should be made into restricting eating and food preparation at the site. The site is a known attractant and habituation site for dingoes.

Action taken: Monitor animals, brief tourists in area, RIC NMU informed, Eurong dingo ranger informed, report generated.

Proposed further action: Continue monitoring these animals, patrol area, brief tourists, investigated closing area to eating and food preparation

Comments

Detailed report of events: Late in the night on the 22/11/14 a 'large, healthy' untagged dingo came into sch4p3(3) camp. sch4p3(said that the dingo was not wary - though didn't show any aggression. The dingo left the area on its own accord with its tail up in the air.

Additional comments and notes: sch4p3(has seen this particular dingo walk past their camp on a nightly basis.

Action taken: Report generated and circulated

Proposed further action: Monitor behaviour of this individual, trap and tag individual, continue to brief camps in the area.

Faxed/mailed date: 24/11/2014

Comments

Detailed report of events: Ranger 7027330 was patrolling Eli creek day use area when a dingo was sighted approaching from the south. On closer inspection the dingo was positively identified as GGG13F. The dingo seen to check areas where people had parked looking for food scraps, she was successful in some areas. Once she had checked the area she headed into the dune on the north side of the creek.

Additional comments and notes: The dingo got to within 5m of vehicles and 10m of people, it is still wary however is approaching people and vehicles closer than it has previously. Normally in company of BWR13M however this animal was not sighted on this occasion.

Action taken: Briefed tourists using area, Informed Ric NMU, report generated.

Proposed further action: Continue patrol Eli Ck in the afternoon, monitor animal, and investigate restricting food preparation and consumption at this site.

Comments sch4p3(3) believed a dingo would not be able to access his fridge this was not the case.	

Detailed report of events: sch4p3 left his camp at approx. 1200 on his return he found his tent ripped, his fridge cover had been torn off and food in the fridge had been taken.

Additional comments and notes: The camp had set up the night before and had not been briefed. Ranger 7027130 sighted an unidentified dingo in Gurruman CZ carrying a bag around the time the tent was ripped.

Action taken: Camper briefed and advised that the dingo may return. Ric NMU informed, report generated.

Proposed further action: Continue briefing and patrolling regime, monitor animals in the area

Comments

Detailed report of events: On the 30/11/2014 at approx. 07:00 ranger 7028018 was walking through the Central Station day use area and noticed two juvenile dingoes sleeping next to the old office building.

On approaching closer (approx. 15 meters from the building) a dingo started growling and barking from under the building. An adult male dingo (13Green10m) walked out and started howling. In response to his howls a number of other dingoes started howling as well.

The juvenile dingoes ran off into the forest. 13Green10m also walked off into the forest.

Additional comments and notes: 13Green10m is a known habituated dingo with multiple code C and a D interactions recorded in his management history. The howling and growling was most likely a warning to stay away from his progeny. Ranger 7028018 did not feel threatened at any time during the interaction.

Action taken: Report generated and circulated.

Proposed further action: Continue monitoring the Central Station day use area using trail cameras and ranger patrols. Fence under the area of the old office building where the dingoes are regularly loitering.

Comments

Detailed report of events: At approx. 08:15am on the 30/11/2014, rangers 7028018 & 7028020 were patrolling the beach and noticed a dingo lying close to a group of fishermen worming.

The dingo was identified as BWPi13f. The rangers spoke to a member of the fishing group who said the dingo was intermittently approaching closely and smelling their fish bait bags then lying back down on th beach.

Rangers briefed the fishermen on QPWS dingo safe messaging.

Additional comments and notes: BWPi13f is a known habituated dingo with multiple code C and D interactions in her management history. The fishermen said the dingo was not showing any signs of aggressive behaviour.

Action taken: Interview undertaken. Report generated and circulated.

Proposed further action: Continue early morning and evening ranger patrols. Continue ranger briefings to campers and visitors on QPWS dingo safe messaging. Continue monitoring the dingoes within the area.

Comments

Detailed report of events: At approx. 07:30am on the 30/11/2014, off duty ranger 7027110 was working on the beach adjacent to the Eurong QPWS ranger base.

The ranger turned around and was startled by a female dingo (tagged) approaching closely and sniffing at his bait bag.

Two other dingoes (both male and tagged) also appeared from the beach foredunes and headed directly towards him.

A vehicle driving by intervened and asked if the ranger needed a lift to safety which he replied no.

The ranger picked up his bait bag and slowly walked back up the beach to his house.

The dingoes continued travelling along the beach.

Additional comments and notes: BWPi13f was identified by rangers 7026466 & 7028018 minutes after the interaction.

BWPi13f is a known habituated female with multiple code C and a D interactions in her management history.

The two other tagged male dingoes may have been members of BWPi13f's pack. PiYPi11m and OPuO13m.

Action taken: Interaction reported. Report generated and circulated.

Proposed further action: Continue ranger beach patrols and camper and visitor briefings.

Comments **Reported to Eurong Ranger and camp site was clean and free of rubbish and food.**

Detailed report of events: sch4p3(3) Prejudice the p had a tent set-up at Wyuna CZ. They were away from the camp from Monday night and Tuesday. When they returned to the camp it appears as though a dingo has ripped their tent. When they were absent no food, rubbish, dirty cloths or other items they believe would have attracted the dingo were left in the tent or camp ground. They are not aware of any missing items.

Additional comments and notes:

Action taken: Visitors briefed. Report generated and circulated.

Proposed further action: Continue morning and afternoon beach patrolling, monitoring all dingoes. Continue to educate visitors of the importance to have a "Great camp site! Safe camp site."

Comments

Detailed report of events: At approx. 08:45am on the 02/12/2014 ranger 7028018 was monitoring BWR13m dingo (multiple code C, D and E interactions in his management history) heading south along the beach towards Happy Valley.

Ranger 7028018 noticed a lady (pregnant) and 4 young children playing in the creek directly adjacent to Happy Valley.

BWR13m also notice the family and headed directly towards them. Ranger 7028018 drove up to the family and notified them that the dingo was approaching. The lady asked what she should do for which the ranger walked over to them and briefed the mother and children on dingo-safe behaviour.

BWR13m approached the group within 1m and lay down in the creek water (the dingo did not display any aggressive behaviour). Ranger 7028018 asked the family to slowly and quietly walk backwards towards the ranger vehicle and to be prepared to get into the vehicle if the dingo begins to approach closer.

BWR13m after several minutes lost interest and continued heading south along the beach.

Additional comments and notes: sch4p3(3) Prejudice the protection of an indiv was unaware of QPWS dingo-safe MESSAGING.

BWR13m was reported to have been chasing cars along the beach at Eli Creek.

Ranger 7028018 approached BWR13m in their vehicle (100 meters away). BWR13m ran over to the ranger vehicle, jumped up onto the driver's door and stuck his head in the window. BWR13m was pushed away by moving the vehicle forward.

BWR13m was also repeatedly approached by visitors driving along the beach. A number of onlookers exited their cars and approached to take photos. Ranger 7028018 briefed them all on be-dingo safe messaging.

Action taken: Dingo monitored. Beach visitors briefed. Report generated and circulated.

Proposed further action: Continue addition ranger beach morning and afternoon beach patrolling, monitoring all dingoes.

Comments

Detailed report of events: While doing beach patrol I noticed the 5 dingos in question leaving Guruman camp zone heading north. The 3 males made their way along the beach in front of dunes, the 2 juveniles went behind the dunes all meeting up again just before Dundubara Creek.

Only 1 camp site in Guruman, spoke to them they said the pack had hung around for a while before moving on. 6 people in camp 3 adults and 3 children, they were packing up as they didn't feel safe, even though dingos showed no signs of aggressive behaviour.

Comments **Attempted to move the dingoes on.**

Detailed report of events: Ranger 7026466 observed BWPi13f and her 2014 born juvenile approaching a mature-aged man and his camping area. The juvenile approached on a number of occasions while BWPi13f watched and then she also edged forward towards the camper.

When the juvenile continued to approach and got to within 4-5 metres, the man moved towards the juvenile and motioned with his arms for it to move on. It was too windy to observe any verbal direction from the camper to the dingo.

Both dingoes moved on to the dune area ~10-20 metres away.

Additional comments and notes: Ranger unable to see if the dingoes returned. Interaction reported as loitering as there is no longer an approached option. Behaviour was consistent with curious rather than soliciting for food.

Action taken: Interaction reported.

Proposed further action: Continue education of campers in this area regarding discouraging dingoes approaching camps.

Comments **Left food items in the tent and fridge freezer not securely locked with wire.**

Detailed report of events:

Two separate families camping together with camper trailers had their canvas tents ripped into by unobserved dingo/es.

They arrived back at camp to find heavy duty canvas tent and fly ripped into. Poppers and softdrink cans removed from the tent and consumed along with milk products.

Their steel fridge/freezer was unlatched by a dingo and BBQ patties, bacon and other meat products from the fridge section taken.

The second camper trailer had left their canvas open. Only the flyscreen was ripped the dingo/es had gained access and attempted to access poppers and softdrink cans secured within sealed plastic crate containers. No access was achieved.

The dingo/es had moved their large matrice within the tent and tried to pull it off the frame.

presented ranger with a dingo tag that was found in the first ripped tent.

Additional comments and notes: The family of the camp where the matrice had been moved advised that they had kelpies that had laid on the matrice. This may have contributed the dingoes attempting to access it.

The families are long term regular visitors to Fraser Island. They were concerned that they should leave the area.

The tag would have been caught during tent access. The campers described a large male dingo and juvenile in the area the forevious afternoon and early morning.

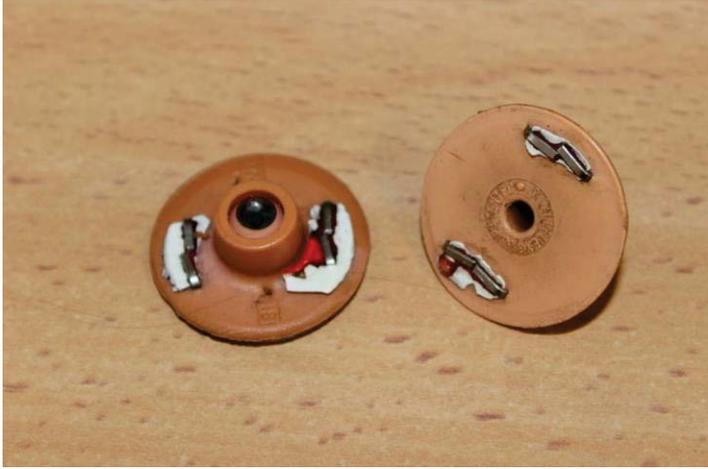

Action taken: Interaction reported. Tag identified. Northern staff advised of interaction and the probably likelihood that this would occur again due to access to food gained from the site.

Proposed further action: Visually assess whether ORW09m had definitely lost his tag. Monitor dingo activity in the area and continue briefing campers regarding dingo safe and food security measures.

Comments

Detailed report of events: sch4p3(3) P and family woke to the sound of items crashing off their outside picnic table. Upon inspection they saw a dingo on the table sniffing around. It had knocked a portable CD player and other items off the table.

The dingo moved on when they chased it off.

Additional comments and notes:

Comments

Detailed report of events: Green tagged male (PuGR13m) was loitering near a family on the beach in front of Marloo camping zone on the 23.12.2014. PuGR13m Was not wary of people and began to solicit food by inspecting a bucket (Photo 3). No food was accessed by the dingo. A lady ran down from their nearby camp and deterred the dingo with a stick - chasing the dingo away.

Additional comments and notes: The green tagged male involved in this interaction has been identified to be PuGR13m. The tag of PuGR13m has delaminated to entirely green on both the inner and outer tag.

Action taken: Photographs of interaction received from camper, Report generated and circulated.

Proposed further action: Continue to brief camps in the area throughout the holiday period.

Questionnaire: Specify visitor type **camper**

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people follow 'dingo safe' messaging? (Ranger to assess) **Yes**

Comments **Yes, went to great lengths to read up on dingo safety before visiting Fraser Island.**

Children had whistles to alert parents when dingoes were around.

Detailed report of events: sch4p3(was on the beach in front of his camp in marloo camping zone supervising five children swimming in the shallows. sch4p3(noticed a dingo had come back to area and was located on the nearby fore dune. The dingo then ran down the beach towards the children, sch4p3(ran at the dingo with a stick whilst blowing his whistle in attempt to deter the animal. A nearby camper also ran to deter the dingo with a baseball bat. The two men were successful in deterring the dingo as it left the area.

Additional comments and notes: Roughly an hour earlier sch4p3(and the children were involved in a code D interaction in the same location. sch4p3(believes that this was the same animal.

Action taken: Report Generated and circulated

Proposed further action: Continue to brief all camps on dingo safety throughout the holiday period.

Faxed/mailed date: 31.12.14

Reporting Officers details: 7028773

Code C - Dingo Interaction Report Form

Dingo ID: Unidentified dingoes

Complete high risk interaction form for all Code D and E interactions and refer to NRM ranger.

D: Threatening – growling, snarling, dominant towards humans. E: High Risk – nipping, biting, attacking

Code C - Dingo Interaction Report Form

Dingo ID: UT14m

Complete high risk interaction form for all Code D and E interactions and refer to NRM ranger.

D: Threatening – growling, snarling, dominant towards humans. E: High Risk – nipping, biting, attacking

<p>Date (of Interaction): 28/12/14 Time (of Interaction 24hrs): Approx 15:30 Location (of Interaction): Cornwells CZ Reporting Officer/s details: 7028020, 7028018 Base: Fraser Island</p> <p>Question 1: Detailed report of events.</p> <p>Whilst on patrol rangers 7028020 and 7028018 observed an untagged juvenile loitering around the vacant Palace tag-along camp in Cornwells CZ. Rangers got out of the vehicle to check the campsite was clean and to make sure the dingo had not accessed any food/rubbish. The campsite was clean, however the BBQ's smelt strongly of food so could be what attracted the dingo. The dingo was wary of the rangers, and took off when rangers yelled & clapped their hands.</p> <p>Question 2: What were the actions of the dingo(s) during the Interaction? <i>(click on box(s) to check/uncheck)</i></p> <p>C) Nuisance or problem.</p> <p><input checked="" type="checkbox"/> loitering at recognized visitor sites (people nearby) <input type="checkbox"/> stealing food or property (specify) <input type="checkbox"/> soliciting food <input type="checkbox"/> being fed or encouraged <input type="checkbox"/> living under or in infrastructure <input type="checkbox"/> following closely (distance) <input type="checkbox"/> damaging property (specify) <input type="checkbox"/> tent ripping (vacant campsite or tent) <input type="checkbox"/> entered dingo deterrent fence line</p> <p>Question 3: Dingo identification & numbers</p> <p>Was the dingo tagged: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown <input type="checkbox"/> Right Ear <input type="checkbox"/> Left Ear</p> <p>Tag description:</p> <p>a.
