**Undertaking** means this enforceable undertaking made pursuant to Chapter 10, Part 5 of the Act.

2. **BACKGROUND**

(a) The corporation is the holder of the EA, which has been issued in relation to activities at the Terminal.

(b) The EA relevantly authorises discharges to waters from discharge location W2 if the discharges meet the specified quality criteria.

3. **ALLEGED CONTRAVENTION**

(a) The complaint and summons filed by the Department in the Bowen Magistrates Court on 5 September 2018 alleges that the corporation "failed to comply with a condition of a temporary emissions licence, contrary to section 3571 of the *Environmental Protection Act 1994*".

(b) The particulars of the complaint and summons allege a failure to comply with condition TEL1 of the TEL.
4. **CIRCUMSTANCES OF THE CONTRAVENTION**

(a) On 24 March 2017, the corporation applied for a temporary emissions licence in relation to its activities at the Terminal, due to predictions of a major rainfall event associated with Tropical Cyclone Debbie.

(b) The Department issued a temporary emissions licence to the corporation on 27 March 2017, and the TEL to the corporation on 28 March 2017.

(c) Relevantly, the TEL authorised a temporary increase of the EA quality criteria for total suspended solids at discharge location W2.

(d) Following Tropical Cyclone Debbie, sampling results from rising stage sample bottles at W2 indicated elevated suspended solids.

(e) However, observations of the sediment traps at release point W2 indicated that water from the Terminal was not released to waters.

(f) The Department alleges a release to waters from release location W2 did occur.

(g) The corporation is not aware of any environmental impacts arising as a result of the alleged contravention.

5. **ACTIONS UNDERTAKEN TO PREVENT RECURRENCE OF THE ALLEGED CONTRAVENTION**

(a) As previously communicated to the Department, the corporation has continuously improved its water management infrastructure to further mitigate and manage water from high intensity and/or sustained rainfall events, including:

   (i) improving sediment removal from primary and secondary settlement ponds to facilitate improved runoff capture and retention periods, allowing for more sediment to drop out of suspension;

   (ii) establishing a purpose built sediment storage area to allow for greater flexibility in the removal and storage of sediment in managing and maintaining the site's water management infrastructure;

   (iii) reducing the catchment surrounding surge bin areas, by use of a clean water diversion to reduce the volume of clean water that reports to the water management infrastructure surrounding the surge bin;

   (iv) reducing the catchment area surrounding the settlement ponds to the west and south west, by use of a clean water diversion to reduce the volume of clean water that reports to the settlement ponds (partially complete); and

   (v) upgrading the secondary settlement pond spillway.

(b) A further package of works to continue improving the corporation’s water management infrastructure, and further manage water from high intensity and/or sustained intense rainfall events, is currently underway. The works include:

   (i) increasing the capacity of the primary and secondary settlement points and western drain;

   (ii) installing a diversion bund along the western lease boundary to:

       (A) reduce the overall catchment size of the site;
(B) act as an all-weather access road to authorised discharge location W1; and

(iii) installing an earth-fill finger bund extending out into the secondary sediment pond, to increase the flow path of water within the pond and allow greater opportunity for sediment to drop out of suspension.

6. **OBJECTIVES**

The objectives of this Undertaking are to:

(a) improve environmental monitoring at the Terminal;

(b) deliver benefits to the environment and local community; and

(c) promote the objects of the Act.

7. **TERMS**

The corporation must:

(a) within [x] months of the date of this Undertaking, take reasonable steps to obtain consent from NQBP for the installation of an AWQS on lot 22 on SP271830; and

(b) within [x] months of obtaining consent pursuant to clause 7(a), install an AWQS on lot 22 on SP271830 capable of recording the pH and flow of a release from the Terminal at discharge location W2, at an approximate cost to the corporation of [x]. The AWQS may include, for example:

(i) hydrolab sonde with sensors and cable;

(ii) level-pro sensor, tubing and bubbler;

(iii) data logger and terminal strip;

(iv) ISCO carousel autosampler including peristaltic pump;

(v) modem, batteries, cabling, solar panel, frame and housing; and

(vi) engineered concrete formwork and channelling.

The corporation will be responsible for determining the final design of the AWQS;

(c) provide an interim progress report to the Department [x] months after the date of this Undertaking; and

(d) provide a final compliance report to the Department within one month of completion of all activities.

8. **WHY UNDERTAKING IS A MORE APPROPRIATE RESPONSE TO THE ALLEGED CONTRAVENION THAN COURT PROCEEDING**

(a) The factors that led to the alleged contravention have ceased, and preventative actions have been, and are being taken as set out in clause 5.

(b) This Undertaking is a commitment by the corporation to take active steps to address the Department's concerns in respect of the alleged contravention, improve environmental monitoring and deliver benefits to the environment and local community.
(c) As such, this Undertaking will result in a net benefit to the environment and the community.

(d) This is a better overall outcome than a court imposed sanction such as a fine, and in the corporation's submission better achieves the objects of the Act.

(e) This Undertaking is also a more efficient means of resolving the matter, as it will save the parties time and resources associated with resolving the matter in court.

9. ACKNOWLEDGEMENTS

(a) The corporation acknowledges that:

(i) it has read and understood the Guideline;

(ii) this Undertaking will be published on the Department's website and may be referred to or referenced in other ways;

(iii) the Department's acceptance of this Undertaking means that the Department:

(A) must take all reasonable steps to have the Proceedings discontinued as soon as practicable; and

(B) will not recommence proceedings against the corporation for the alleged contravention described in clause 3 as long as the corporation is fully complying, or has fully complied, with the Undertaking;

(iv) if the corporation withdraws this Undertaking before it has been fulfilled, proceedings may be brought for the offences constituted by the contraventions alleged in clause 3;

(v) the Department's acceptance of this Undertaking does not affect the Department's power to:

(A) bring proceedings against the person;

(B) issue penalty infringement notices; or

(C) take any other enforcement action against the person;

in relation to any subsequent contravention or alleged contravention of the Act, that is not the subject of an undertaking;

(vi) this Undertaking in no way derogates from the rights and remedies available to any other person or entity arising from any conduct described in this proposal or arising from subsequent conduct;

(vii) it has offered an undertaking in the terms set out in this approved form;

(viii) the Undertaking does not take effect until the Department gives the corporation notice of the decision to accept the Undertaking.

(b) The corporation and the Department acknowledge that the date of the Undertaking is the date on which the notice of the decision to accept the Undertaking is given.
10. **ABILITY TO COMPLY WITH THE UNDERTAKING**

(a) The corporation has the financial ability to comply with the terms of this Undertaking.

(b) In the event of impeding liquidation or sale of the corporation, the corporation will advise the Department of the relevant circumstances and its capacity to comply with the outstanding terms of this Undertaking.

(c) In the event the corporation is sold, the corporation will advise any future owners or operators of the existence of this Undertaking, and provide a copy of this correspondence to the Department.

THIS ENFORCEABLE UNDERTAKING is made on 2019

This enforceable undertaking is submitted to the Department of Environment and Science by Abbot Point Bulkcoal Pty Ltd ACN 010 183 534 of Level 15, 10 Eagle Street Brisbane, Queensland 4000.

1. DEFINITIONS

The following definitions apply in this document.

Act means the Environmental Protection Act 1994 (Qld).

AWQS means automatic water quality station.

Corporation means Abbot Point Bulkcoal Pty Ltd ACN 010 183 534.

Department means the Department of Environment and Science.

EA means environmental authority EPPR00577113.

NQBP means North Queensland Bulk Ports Corporation.

Proceedings means the proceedings commenced by the Department against the corporation in the Bowen Magistrates Court by the complaint of Robert James Black dated 5 September 2018.

Terminal means the Abbot Point Coal Terminal.

Undertaking means this enforceable undertaking made pursuant to Chapter 10, Part 5 of the Act.

2. BACKGROUND

(a) The corporation is the holder of the EA, which has been issued in relation to activities at the Terminal.

(b) The EA relevantly authorises discharges to waters from discharge location W2 if the discharges meet the specified quality criteria.

3. ALLEGED CONTRAVENTION

(a) The complaint and summons filed by the Department in the Bowen Magistrates Court on 5 September 2018 alleges that the corporation "failed to comply with a condition of a temporary emissions licence, contrary to section 357I of the Environmental Protection Act 1994".

(b) The particulars of the complaint and summons allege a failure to comply with condition TEL1 of the TEL.

4. CIRCUMSTANCES OF THE CONTRAVENTION

(a) On 24 March 2017, the corporation applied for a temporary emissions licence in relation to its activities at the Terminal, due to predictions of a major rainfall event associated with Tropical Cyclone Debbie.
(b) The Department issued a temporary emissions licence to the corporation on 27 March 2017, and the TEL to the corporation on 28 March 2017.

(c) Relevantly, the TEL authorised a temporary increase of the EA quality criteria for total suspended solids to 100mg/L at discharge location W2.

(d) Following Tropical Cyclone Debbie, sampling results from rising stage sample bottles at W2 indicated elevated suspended solids of 806mg/L.

(e) However, observations of the sediment traps at release point W2 indicated that water from the Terminal was not released to waters.

(f) The Department alleges a release to waters from release location W2 did occur.

(g) The corporation is not aware of any environmental impacts arising as a result of the alleged contravention.

5. ACTIONS TAKEN TO PREVENT RECURRENCE OF THE ALLEGED CONTRAVENTION

(a) As previously communicated to the Department, the corporation has continuously improved its water management infrastructure to further mitigate and manage water from high intensity and/or sustained rainfall events, including:

(i) improving sediment removal from primary and secondary settlement ponds to facilitate improved runoff capture and retention periods, allowing for more sediment to drop out of suspension;

(ii) reducing the catchment area surrounding the settlement ponds to the west and south west, by use of a clean water diversion to reduce the volume of clean water that reports to the settlement ponds (partially complete); and

(iii) upgrading the secondary settlement pond spillway.

(b) A further package of works to continue improving the corporation’s water management infrastructure, and further manage water from high intensity and/or sustained intense rainfall events, is currently underway. The works include:

(i) significantly increasing the size of pumping capabilities, along with the sump and drainage system capacities in the surrounding surge bin areas;

(ii) reducing the catchment surrounding surge bin areas, by use of a clean water diversion to reduce the volume of clean water that reports to the water management infrastructure surrounding the surge bin;

(iii) increasing the capacity of the primary and secondary settlement points and western drain;

(iv) installing a diversion bund along the western lease boundary to:

(A) reduce the overall catchment size of the site;

(B) act as an all-weather access road to authorised discharge location W1; and

(v) installing an earth-fill finger bund extending out into the secondary sediment pond, to increase the flow path of water within the pond and allow greater opportunity for sediment to drop out of suspension.
6. **OBJECTIVES**

The objectives of this Undertaking are to:

(a) improve environmental monitoring at the Terminal;

(b) deliver benefits to the environment and local community; and

(c) promote the objects of the Act.

7. **TERMS OF THE UNDERTAKING**

The corporation must:

(a) within six months of the date of this Undertaking, take reasonable steps to obtain consent from NQBP for the installation of an AWQS on lot 22 on SP271830; and

(b) within [x] months of obtaining consent pursuant to clause 7(a), install an AWQS on lot 22 on SP271830 capable of recording the pH and flow of a release from the Terminal at discharge location W2, at an approximate cost to the corporation of [x]. The AWQS will collect data in direct response to releases, and facilitate informed management and mitigation strategies where necessary, to secure compliance with the Act and enhance the protection of the Environment. The AWQS, which will provide for real time monitoring of water flows at the discharge location may include, for example:

(i) hydrolab sonde with sensors and cable;

(ii) level-pro sensor, tubing and bubbler;

(iii) data logger and terminal strip;

(iv) ISCO carousel autosampler including peristaltic pump;

(v) modem, batteries, cabling, solar panel, frame and housing; and

(vi) engineered concrete formwork and channelling.

The corporation will be responsible for determining the final design of the AWQS;

(c) provide an Interim progress report to the Department [x] months after the date of this Undertaking; and

(d) provide a final compliance report to the Department within one month of completion of all activities.

8. **WHY UNDERTAKING IS A MORE APPROPRIATE RESPONSE TO THE ALLEGED CONTRAVENATION THAN COURT PROCEEDING**

(a) The factors that led to the alleged contravention have ceased, and preventative actions have been, and are being taken as set out in clause 5.

(b) This Undertaking is a commitment by the corporation to take active steps to address the Department's concerns in respect of the alleged contravention, improve environmental monitoring and deliver benefits to the environment and local community.

(c) As such, this Undertaking will result in a net benefit to the environment and the community.
(d) This is a better overall outcome than a court imposed sanction such as a fine, and in the corporation's submission better achieves the objects of the Act.

(e) This Undertaking is also a more efficient means of resolving the matter, as it will save the parties time and resources associated with resolving the matter in court.

9. ACKNOWLEDGEMENTS

(a) The corporation acknowledges that:

(i) it has read and understood the Guideline;

(ii) this Undertaking will be published on the Department's website and may be referred to or referenced in other ways;

(iii) the Department's acceptance of this Undertaking means that the Department:

(B) will not recommence proceedings against the corporation for the alleged contravention described in clause 3 as long as the corporation is fully complying, or has fully complied, with the Undertaking;

(A) bring proceedings against the person;

(B) issue penalty infringement notices; or

(C) take any other enforcement action against the person;

in relation to any subsequent contravention or alleged contravention of the Act, that is not the subject of an undertaking;

(vi) it has offered an undertaking in the terms set out in this approved form;

(vii) the Undertaking does not take effect until the Department gives the corporation notice of the decision to accept the Undertaking.

(b) The corporation and the Department acknowledge that the date of the Undertaking is the date on which the notice of the decision to accept the Undertaking is given.

10. ABILITY TO COMPLY WITH THE UNDERTAKING
