Good morning,

We are currently undertaking an investigation on multiple land parcels within Wellington Road, Woolloongabba. 3 land parcels are included on the EMR, certificates attached.

Are you able to provide any additional information regarding the listings? Including the date, who listed, site plans etc. We will also be putting in an RTI application so just looking for what information is currently available.

Kind regards,

2.0 Aspects of development and type of approval being sought

Nature of Development	Approval Type	Brief Description of Proposal	Level of Assessment
Material Change of Use	Development permit	Industry and extension	Impact Assessment
Building Work	Preliminary approval under s241 of SPA		Impact Assessment

3.0 Matters of interest to the state

The development application has the following matters of interest to the state under the following provisions of the Sustainable Planning Regulation 2009¹:

Schedule 7 Referral agencies and their jurisdictions — matters of interest specific to technical agency		
Trigger ID	Description	Technical Agency
7.2.23	A material change of use made assessable under schedule 3, part 1, table 2, item 6 or 7	EHP

¹ MyDAS does not collect data on assessable development aspects under Schedule 3—this is a matter confirmed by DSDIP during the validation process.

4.0 Assessment

4.1 Considerations and assessment

Details of contaminated land trigger

- Lot 1 on RP805860 is on the EMR for Notifiable Activity 29 - *PETROLEUM PRODUCT OR OIL STORAGE* in accordance with Chapter 7, Part 8 of the Environmental Protection Act 1994. EMR records indicate that decommissioned USTs were removed from the site in 1999.

Proposal details

- The subject MCU proposal is in response to a show cause notice issued by council and seeks to formalise the existing industrial uses onsite including the relocation of existing spray booths to the rear of the premises (Lots 24 – 27, previously located within building on Lot 1) and the construction of a mezzanine-floor storage area within the existing building located on Lot 1.
- The proposal does not involve any building work or excavation.
- The site is currently used for a motor vehicle workshop and associated spray booths.
- The site will remain on the EMR for Notifiable Activity 29 – petroleum product or oil storage until such time as a site investigation / validation report is submitted to EHP and the site is deemed suitable of unrestricted use.

Potential risks to human health and the environment with regard to contaminated land

- As the proposal is for an existing use and fit out of the existing buildings only, with no excavations to be undertaken, it is deemed that the proposal poses negligible risk to human health and the environment with regard to contaminated land matters. **As such, the proposal is deemed to meet SDAP Module 12, PO1.**

Good morning,

We are currently undertaking an investigation on multiple land parcels within Wellington Road, Woolloongabba. 3 land parcels are included on the EMR, certificates attached.

Are you able to provide any additional information regarding the listings? Including the date, who listed, site plans etc. We will also be putting in an RTI application so just looking for what information is currently available.

Kind regards,

2.0 Aspects of development and type of approval being sought

Nature of Development	Approval Type	Brief Description of Proposal	Level of Assessment
Material Change of Use	Development permit	Industry and extension	Impact Assessment
Building Work	Preliminary approval under s241 of SPA		Impact Assessment

3.0 Matters of interest to the state

The development application has the following matters of interest to the state under the following provisions of the Sustainable Planning Regulation 2009¹:

Schedule 7 Referral agencies and their jurisdictions — matters of interest specific to technical agency		
Trigger ID	Description	Technical Agency
7.2.23	A material change of use made assessable under schedule 3, part 1, table 2, item 6 or 7	EHP

¹ MyDAS does not collect data on assessable development aspects under Schedule 3—this is a matter confirmed by DSDIP during the validation process.

4.0 Assessment

4.1 Considerations and assessment

Details of contaminated land trigger

- Lot 1 on RP805860 is on the EMR for Notifiable Activity 29 - *PETROLEUM PRODUCT OR OIL STORAGE* in accordance with Chapter 7, Part 8 of the Environmental Protection Act 1994. EMR records indicate that decommissioned USTs were removed from the site in 1999.

Proposal details

- The subject MCU proposal is in response to a show cause notice issued by council and seeks to formalise the existing industrial uses onsite including the relocation of existing spray booths to the rear of the premises (Lots 24 – 27, previously located within building on Lot 1) and the construction of a mezzanine-floor storage area within the existing building located on Lot 1.
- The proposal does not involve any building work or excavation.
- The site is currently used for a motor vehicle workshop and associated spray booths.
- The site will remain on the EMR for Notifiable Activity 29 – petroleum product or oil storage until such time as a site investigation / validation report is submitted to EHP and the site is deemed suitable of unrestricted use.

Potential risks to human health and the environment with regard to contaminated land

- As the proposal is for an existing use and fit out of the existing buildings only, with no excavations to be undertaken, it is deemed that the proposal poses negligible risk to human health and the environment with regard to contaminated land matters. **As such, the proposal is deemed to meet SDAP Module 12, PO1.**

5.0 Recommendations

5.1 Technical agency advice for SARA as concurrence agency

Our department:

- (a) **has no requirements relating to the application** (SPA section 287(2)(a)).
