Did the people respond appropriately to the incident? (Ranger to assess) <b>Yes</b>	
Comments	

**Detailed report of events:** Brenton Smith and myself (John Green) were travelling south along the eastern beach turning into Eurong Resort when noticed OOR12m and untagged female were getting within 2 metres to a couple and their child who were taking photos. When we approached the couple to scare the dingo off and give a dingo briefing the couple didn't care for what we had to say and proceeded to say they're not dangerous dogs. Once scaring the dingos off we returned to our vehicle and couple and their child return to the Resort.

**Additional comments and notes:** Couple didn't responded in a positive way toward our dingo briefing but did comply with not encouraging the dingo to come closer and returned to the resort

**Action taken:** Report generated and circulated

**Proposed further action:**

Comments

**Detailed report of events:** On Thursday 28.03.13 at approximately 11.00am six RBAC vehicles were parked outside the main entrance of the Eurong resort. While at this location a juvenile male dingo was seen loitering around. The dingo (OOR12m) walked casually in and out of the group within 1m of people. sch4p3(3) Prejudice the protection of an individuals right to privacy [redacted] witnessed this and noticed that no one in the group were trying to discourage the dingo - [redacted] then went over and actively discouraged the dingo from the group.

**Additional comments and notes:**

**Action taken:** Report generated and circulated

**Proposed further action:** Continue to monitor this area.

**Faxed/emailed date:** 2.4.2013

Did the people respond appropriately to the incident? (Ranger to assess) **No**

Comments **Tag-along clients are meant to receive all information regarding dingo safety prior to visiting Fraser Island as per permitting conditions.**

**Detailed report of events:** (BRV) approached me at Central Station Wednesday 17<sup>th</sup> April and mentioned this feeding incident. As was with clients I caught up with him at Eurong resort Sat 20<sup>th</sup> and obtained the following details.

He was conducting a tour on or around the 11<sup>th</sup> April where he observed a group of 20-25 tag-along clients (backpackers) with 4 parked vehicles surrounding 4 dingoes on the southern side of the resort entrance (This is where RBAC park their trailers). He mentioned that RBAC was written on the vehicles. He recognised the dingoes as the young resident Eurong dingoes.

pulled his bus up to park for his tour to see the dingoes without exiting the bus approx 10 metres away from the RBAC group. From the bus he observed a number of the backpackers throwing chunks of food including bread rolls, ham and other items. He couldn't see a noticeable tour leader amongst the group. If he had seen a leader he stated he would have spoken to them.

had to leave for the lunch break time schedule. He has mentioned the incident to other tour drivers.

**Additional comments and notes:** This is the second feeding incident reported by regarding feeding of these dingoes. has been encouraged to photograph future feeding incidents and contact QPWS to attend the scene if possible. These dingoes are currently conducting code C behaviour and are regularly harassed by visitors and certain residents.

**Action taken:** Incident reported encouraged to photograph feeding incidents where possible and contact a ranger to attend the scene.

**Proposed further action:** Continue education of visitors and tag along tours focusing on the Eurong area.

RBAC tours are currently eating around the parked trailers on this beach entrance area on a regular basis, suggest requesting they move to another area where dingo/human interaction is less of an issue or eat in the Resort-council tabled areas within the fenced area.

Some of the Eurong dingoes have been observed sleeping under these trailers on a regular basis.

Did they receive an information pack with their permits **Yes**

Did they read the Dingo Brochure **Yes**

Did the people respond appropriately to the incident? (Ranger to assess) **Yes**

Comments

**Detailed report of events:** On returning to their campsite at 1430 on the 20/05/13, the protection of an individual's right to privacy was not breached. **and** witnessed Two dingoes exit their tent and run off. **and** found three different parts of their brand new tent that had been ripped by the dingo/es attempting to enter (See photos attached). He was adamant that the only thing inside their tent was their brand new mattress, which has been chewed by the dingoes. They were able to show me a photo of One of the dingoes that was taken shortly after it exited their tent which I positively identified as Orange Orange Red 2012 male. It is likely that the dingo with OOR12m was from a known pack in the area.

**Additional comments and notes:** left a message on the dingo hotline at the Rainbow Beach info centre which was forwarded onto me shortly after the incident occurred by

**Action taken:** was briefed and was suggested to camp in a fenced camp ground as his tent was no longer secure. He agreed to move back to Central Station camp ground. Report generated and circulated

**Proposed further action:** Explore possibilities of placing interpretative information (public notice?) in camp zones within the territory of dingoes that are known to carry out tent ripping behaviour. This information could highlight to visitors that dingoes that roam these particular CZ's are capable of carrying out this behaviour and that there is fenced camp grounds available for camping.

<input type="checkbox"/> lunging (attempting to nip or bite)	
<b>Questionnaire:</b>	Specify visitor type <b>camper</b>
Did they receive an information pack with their permits <b>Yes</b>	
Did they read the Dingo Brochure <b>Yes</b>	
Did the people respond appropriately to the incident? (Ranger to assess) <b>Yes</b>	
Comments <b>Campers are o'seas visitors with own vehicle. Bought permits at RB BP with brochures and obtained further information at the Manta Ray info office. They followed the brochure directions.</b>	

**Detailed report of events:** A group of 4 travellers were finishing off dinner when 1 dingo approached them from the south towards the back of their van within 5 metres and waited. All 4 people got to their feet, folded their arms as directed by the brochure material. They noticed 2 more dingoes approaching from the other side. They came to within 3 metres.

The group started calmly packing all the food items and associated crockery and pans away into the van.

1 dingo approached to within 1-2 metres and backed off when the (tall male) moved. The females all got into the van. After got into the van the dingoes sniffed the table and chair areas. They chewed on the side of a chair, a water container and a book (Life of PI) that was taken from the seat.

A dingo proceeded to the tent and chewed on the air matrice box, then entered the tent followed by another. Filming that occurred while the females were in the van was stopped at this stage as they wanted the phone to ring 13QGOV for assistance.

13QGOV directed them to a ranger base number that went to message. 13QGOV was called again and directed them to police 13444. 2 of the dingoes jumped up (remaining on their back legs) to look into the van windows.

The van horn was activated numerous times but did not deter the dingoes and a passing car was attracted but the occupant stopped, saw the scene from the vehicle and continued south without assisting.

A sleeping bag and backpack had been removed from the tent.

After the group noticed the tent wasn't moving anymore (20 mins passed) they got out and inspected the tent. Large holes had been made in the rear where the dingoes got out and had left of their own accord.

A toiletry bag with medication, tampons, sandals and an air bed had been chewed on.

The QPS officer on Fraser Island and a QPWS ranger met up with the group 8:40am

**Additional comments and notes:** The video and photographs were supplied by the group. Rangers identified the dingoes. No aggressive behaviour was observed in the footage.

**Action taken:** Incident reported and permission will be sought to obtain footage for educational purposes. Govi will be further monitored and briefing concentrated in that area.

**Proposed further action:** Keep monitoring this area. This particular family pack is not currently of high concern but is being subjected to constant inference that may influence their behaviour.

**Faxed/emailed date:** 21 April 2013 **Officers signature:** L. Behrendorff

Comments **when the fishermen noticed the dingo stealing the bait from their bucket they locked it away in the car.**

**Detailed report of events:** On the 3<sup>rd</sup> April at approx 10:00 two fishermen on the beach outside Govi CZ were approached by three dingos. The dingos were coming within 1-2 meters proximity and showed no signs of aggression, fear or wariness. One of the dingos walked up to a bucket next to their car and stole a mullet. The fishermen quickly chased the dingos away and put the bucket in the car. An off duty dingo ranger travelling down the beach noticed the events and stopped and briefed them on dingo safety and food security.

**Additional comments and notes:** The fishermen said the dingos went back up into the dunes and headed for their camp in Govi CZ.

**Action taken:** The off duty ranger briefed the fishermen on dingo safety and food security. He also rang the Eurong dingo ranger who promptly went down and spoke to the fishermen.

Rangers notified of the incident. Interview conducted by a dingo ranger and report generated and circulated.

**Proposed further action:** Increase patrols and camp briefings within the area.

Comments

**Detailed report of events:** On travelling northwards along the beach, myself and two other rangers observed a parked Fraser Island Discovery Tours bus adjacent to Taleebra Creek and with all passengers and the driver milling around the back of the bus eating morning tea. An esky was on the ground with its lid on, and we then noticed a dingo loitering within a couple of metres of the people and the esky. When the driver noticed us, he made an effort to shoo the dingo away. We pulled up and I spoke to the driver. He informed me that the dingo had been loitering around the group for 10-15mins but wasn't being aggressive towards anyone. I told that it was in the dingo and the group's best interests for to actively discourage the dingo from loitering around them. suggested that the dingo approached as it had smelt a container of muffins which was stashed in the back of the bus. I clapped my hands against a clip board folder and this scared the dingo off to the dunes, where it then sat and continued to watch the group. The dingo was non-plussed by the presence of rangers. We departed and there is a chance that the dingo may have moved back towards the group after we left.

**Additional comments and notes:** This dingo is observed regularly patrolling the beach between Eurong and Dilli Village. It is very habituated.

**Action taken:** Attempted to scare dingo off, spoke to driver.

**Proposed further action:** Monitor behaviour of dingo, appropriate driver and passenger reminder letters to be sent to all CTOs.

Comments

**Detailed report of events:** On the 16<sup>th</sup> April 2013, at approx 16:45, an off duty ranger was fishing on the beach opposite the QPWS Ranger base at Eurong. The ranger noticed the two dingos heading directly towards him from the south. When the two dingos were within close proximity of him, one of the dingos (OOR12m) lay down on the beach while the other (PuWW12m) walked up to him in the water and proceeded to sniff the air and gesture towards the bait bag which was on the rangers shoulder. A number of cars saw the dingos and drove towards the ranger to see if he was alright. The two dingos then left when scared away.

**Additional comments and notes:**

**Action taken:** Report generated and circulated.

Did they read the Dingo Brochure **Unknown**

Did the people respond appropriately to the incident? (Ranger to assess) **Yes**

Comments

**Detailed report of events:**

Rangers John and Brenton were driving along the beach when they saw a dingo take a freshly caught fish from a woman fishing. Shortly after, they were waved down by the woman just as another dingo arrived. She complained that the dingoes were getting too close to her and her 5yo grandson. John and Brenton then chased the dingoes away. The dingoes were not easy to move on. The female dingo kept circling back to the woman and her grandson but was eventually chased up the beach. OOR Male was chased to nearby One tree Rocks Camping zone where he took 2 drink "poppers" from a table at a camp. He then hid under a camping trailer but was chased away.

John and Brenton went back to the woman and said the dingoes had been moved on but may return. She thanked them. The grandson was taken by his parents but the woman continued fishing.

**Additional comments and notes:**

**Action taken:** Dingoes actively discouraged by QPWS staff. Initial report taken by Andrew and passed on to dingo ranger waddy point. Supervisors notified 25.04.13. Report revised, generated and circulated

**Proposed further action:** Increase patrols in this area - particularly morning and afternoon, monitor and identify dingoes in the area displaying this type of behaviour.

**Faxed/emailed date: 26.04.2013**

Comments **Was walking on beach alone. Eurong staff receive dingo safety messages.**

**Detailed report of events:** At 10:53 from Eurong beach resort contacted myself to advise that a dingo attack had occurred on the beachfront involving a female resort staff member. had attempted to contact the QPWS duty managers and other QPWS office numbers without success.

called my phone at 10:56 to report the same incident and was the First Responder in attending to the patient.

was walking down the beach when a dingo approached her from behind. She turned around and saw the dingo then ran towards the water she subsequently tripped and fell in the shallow water. The dingo attacked her, biting her left bicep between her shoulder and elbow and would not let go.

attempted to stand and return to the resort track. Witnesses observed staggering across the beach towards the track, screaming with the dingo hanging from her arm.

Witnesses approached then attracted the assistance of who grabbed a stick to fend off the dingo still attached to her arm. The dingo let go and retreated to the bush but continued to pursue throughout the incident until was behind the resort gate.

The incident was witnessed by various separate parties

a observed the incident from a distance with his was near the entrance to Second Valley when they observed what they thought looked to be two children playing in the water until they heard screaming. They ran towards the screaming and got about two-thirds of the way there before observing on her hands and knees attempting to get up out of the water with a dingo attached to her arm. As and his continued to run toward the incident two men in and a woman ran down from around the resort entrance and chased the dingo away. was nearly to the track (with the dingo still attached to her arm).

then went back to second valley to inform (ambulance first responder). went to the resort area and saw the men in the and asked if the dingo still in the area was the dingo involved, they said it was. said it was a red and white tag in a floppy left ear.

This dingo had been hanging around and his family while they were fishing the day prior to the incident.

(Resort guest) " I was approached by a woman running towards me screaming "Help, help, dingo!". I saw a dingo had a on the left arm below the shoulder and above the elbow. Her arm was in full stretch as she was staggering up the beach to the resort. I grabbed a stick and ran towards the dog that let go and ran towards the bush. It [the dingo] continually tried to return and get at her from another angle. The girls from the resort arrived tending to the injured girl while I kept the dingo away.

A passer by in a vehicle offered them a lift to the buildings but the girls refused the offer when they saw a baby in the back. The offer for using the tail-gate was also refused. The girls chose to lift and carry the injured girl about 150 yards to the building area. They asked me to stay and protect them from the dog that was still trying to get to the injured girl."

stated that "the dingo stood it's ground at the gate and had it's mind set." He had also observed the dingo licking the blood from the sand. "The girl lost a lot of blood and it was also coming down her leg from beneath her clothes." stated that the girl was going into shock and her legs were giving out

on her as the other girls were trying to get her to the gate.

Prejudice the protection of an individual's right to privacy saw a young woman walking toward the beach with a dingo following her; the woman did not seem to notice it was there. When she saw the dingo she started to cry and ran towards the water with the dingo following. As she got to the water's edge she fell over and the dingo bit her on the arm. The woman got to her feet with the dingo still on her arm. called to her husband and a friend and they ran toward the woman as they approached the dingo let go. They then took the woman beach toward the resort entrance.

The dingo was tagged in its left ear and the ear was bent down.

Eurong Resort staff in attendance included and (Manager) observed the dingo at the gate as the staff brought in. The dingo chewed on one of the girls shoes and hung around for about half an hour.

**Additional comments and notes:** OOR12m is the more dominant of the 2012 Eurong litter. He has been involved in a recent code E incident and suspected code D incident. His tag has faded to red and white. This dingo has been fed and habituated from a young age by some visitors, locals and residents.

STATEMENTS ATTACHED

interviewed by L. Behrendorff & J. Kellaway.

was interviewed by L. Behrendorff 11.24 am and later by J. Kellaway.

interviewed by J. Kellaway.

interviewed by L. Behrendorff 14.11.

and voiced concerns regarding the WPHS protocols pertaining to the way the resort staff refused the lift when a dangerous dingo was still pursuing the injured girl.

was advised by "a man" that this dingo was seen half an hour before the incident with a man who was playing tug-of-war with a coconut husk with it.

was also involved in attempting to advise a group of people half an hour after the incident who were parked near OOR12m and getting a baby out of the car to view it. When approached the people and advised them of what had happened and to return the baby to the vehicle he was reprimanded by the mother.

A Eurong Resort staff dingo safety talk was scheduled for this Thursday, and dangerous dingo signage was erected following the previous code E incident 1 June 2013.

**Action taken:** SR, AM advised 11:40. Report generated. HD process instigated.

**Proposed further action:** Discuss WPH&S process with Resort manager for dingo incident management regarding resort staff involvement.

Continue education of all visitors and stakeholders against feeding and habituation of dingoes.

Explore the option to approach media outlets for support regarding their publication of images portraying inappropriate dingo interactions that can influence visitor/stakeholder perception of safe behaviour around Fraser Island dingoes. As seen in recent media articles around the Fraser Coast and interstate.

## ATTACHMENT 1.

Statement from [redacted] the protection of an individuals right to privacy

Shortly before 11am I was approached by [redacted] his [redacted] and [redacted] in Eurong's second valley. His mobile phone number is: [redacted]

They told me there had been a dingo attack in front of the Eurong Beach Resort.

They said they were near the entrance to the second valley when they saw a dingo attacking who they thought was a child of about 10 or 11 years old.

They said they ran towards the person, but by the time they were within about 100 metres other people had run out from the entrance to the resort valley and the dingo had run away.

They said the person they thought looked like a child had been escorted towards the resort and the dingo had circled around and had been following them at a distance.

I telephoned QPWS natural resources ranger **Linda Behrendorff** to make sure she was aware of the incident. She told me she was off the island and was trying to contact a ranger on the island.

I contacted the island paramedic and asked if he had been dispatched. He hadn't been.

[redacted] said the person attacked would need medical attention so I drove with [redacted] to the Eurong Resort in the Ambulance first responder vehicle. I was contacted by the Fraser Island paramedic as I was leaving the second valley who told me he had been dispatched. He said he had been told it was a 29 year old female resort staff member.

He said he would ask Ambulance Communications to dispatch me. I told him I was already on the way. When I arrived at the resort, the patient was sitting on some steps, and another staff member, [redacted] was holding dressings on her left bicep. I placed [redacted] on the stretcher in the first responder vehicle and tended to her.

I inspected her injuries, recorded them and replaced the dressings. The bleeding had almost stopped. I administered methoxyflurane at 11.20am to reduce the pain. There was a puncture wound on the inside of her left bicep and a scratch mark. On the exterior of the left arm there was a deep wound about 5cm in diameter. There was flesh missing and the wound was between 1 and 2cm deep.

I interviewed a witness who was touring the island with her family. She is: [redacted] of [redacted]

She told me she had been on the side of the entrance road, outside the grid and near a sign (about 15 metres from the grid).

She described the incident and said it would have been about 10.45am.

She said she saw the young woman on the beach and watched as a dingo approached her. She said the woman appeared not to have seen the dingo at first. She said the woman turned around and seemed to panic and ran towards the water. The dingo chased her. She tripped and fell in the shallows and the dingo bit her on the left arm. She said the woman was screaming for help.

The witness said she had nothing to use to beat the dingo with, so she called to her husband and a friend who ran down to the beach.

She said the dingo held on while the woman struggled to her feet. She managed to get on to her feet and the dingo still held on. When they ran down to the woman the dingo released its grip and ran away.

I interviewed the patient and she said she ran from the dingo towards the water. She said she fell and the dingo grabbed her in its jaws by the left arm above the elbow. She said the water wasn't deep and her face didn't go under water.

She said the dingo held on while she struggled to her feet and didn't let go until people started running towards her.

The patient was transferred to the paramedic's ambulance and she was transported across to Kingfisher Bay. A Hervey Bay crew was dispatched to catch the ferry to Kingfisher and transport her to the Hervey Bay Hospital.

While I was tending to the patient the dingo approached the grid. [redacted] identified the dingo as the one she saw attacking the patient.

I asked [redacted] and another man to see if they could see the dingo's ear tag. They both said it was tagged in the left ear and that the ear was drooping. They said the colours were red and white.

The dingo was hovering around on the beach for some time. There were people on the beach and the dingo was moving in among them. The man who helped identify the dingo went down to the beach to warn them.

He approached a woman standing holding a baby and told her the dingo had recently bitten a woman and told her it might be best to put the baby in the vehicle. The woman responded: "Mind your own business."

- 1/ \_\_\_\_\_
- 2/ \_\_\_\_\_
- 3/ \_\_\_\_\_
- 4/ \_\_\_\_\_

Date of Incident: 10/06/13 Time: 10:30 → 11

Location: Beach - Golf front

### Description of Incident

I was standing on Maheno balcony on break with \_\_\_\_\_ when we both heard screaming from the beach. I ran to the beach to see \_\_\_\_\_ crouched down + holding her arm, An unknown woman next to her + an unknown man carrying off a dingo. Getting closer I could see she was bleeding quite badly. \_\_\_\_\_ applied pressure to her arm + I went to get \_\_\_\_\_ phone nearby when the dingo circled behind me. \_\_\_\_\_ arrived with

Name \_\_\_\_\_

Signature \_\_\_\_\_

The first aid kit + we collectively moved up the beach, the dingo

sch 4(3), 3. Prejudice the protection of an individuals right to privacy

was circling the entire time.

Once we got within the dingo fence started applying

first aid - we took her cardigan

off + realised how deep the wound was. Lots of pressure dressings

were applied, we kept her

talking as she was in shock

until the ambulance arrived

Date of Incident: 10/6/13 Time: 10:30

Location: Beach

Description of Incident

& I heard screams coming from the beach as we raced down from Mahano I seen & asked her to call & get a first aid kit on the beach I seen sitting on the ground with the lady trying to calm her, while another guy kept the dingo away. After ~~checking~~ checking the danger I put a non-adhesive dressing on the arm ~~wound~~ wound which was bleeding quite badly. I spoke to who was in shock & all she wanted was to get behind the fence she was able to walk so while I held pressure on the wound we walked her back behind the fence, staying in a tight group while the guy kept the dingo away. once behind the fence called the ambulance. & I pulled → PRO

Name

Signature

Jacket off so I could see the wound & put a new dressing on it. As her Jacket was wet & salty. I kept pressure on the wound until the ambulance came & by the time the first responders came the bleeding had slowed.

The whole time behind the fence the dingo hung around the fence trying to find a way in.
